

SEVEN-G – Document 3: Phase Playbooks

This document provides operational playbooks for each SEVEN-G phase. Each playbook defines how the phase is executed in practice. For each phase: - Objectives - Mandatory inputs - Required artifacts - Key activities - Validation checklist - Gate decision criteria Playbooks are designed for consultants, product owners, and auditors. They ensure consistency, auditability, and repeatability across engagements. This document is normative: deviations must be explicitly approved by the AI Sponsor and AI Risk Owner.
