Legal notice and disclaimer. SEVEN-G is a reference methodological framework provided "as is" and for information purposes only. It does not constitute legal, regulatory, financial or professional advice, nor does it guarantee compliance with any law or standard. References to general regulation (such as the EU AI Act, the GDPR, DORA or NIS2), to technical standards and to regulation specific to each sector or jurisdiction may be incomplete, may not apply to a particular case or may become out of date as a result of regulatory changes, interpretations or supervisory positions after their consultation date. **Each organisation that uses SEVEN-G is solely responsible for identifying the regulation that applies to it, verifying that it is current and certifying its own regulatory compliance**, with the appropriate qualified advice. This methodology is a generic, free aid shared with the community so that nobody has to start from scratch; each person or organisation can and should adapt it to its own use. It must not be inferred that its legally sensitive parts have been reviewed by legal counsel: those reviews, for each company or sector, are the ultimate responsibility of the company, consultant or organisation that uses it. Although every effort is made to keep it up to date, some regulation may have changed without being reflected here. To the fullest extent permitted by law, the author accepts no responsibility whatsoever for the effects of its application in any organisation or for its full applicability. The methodology does not grant certification of any kind. The author accepts no liability for any use made of this content or for any decisions taken on the basis of it. The data, figures, companies and cases in the examples are fictitious or illustrative.

THE ESSENTIALS Recommended

Ready-to-use checklists for each gate. They are the practical way of applying document 21; the company may use another medium if it keeps the same criterion codes. The LV-AG checklist applies only to agents.

Obligation matrix and layered reading (document 94)

01

Purpose and scope

This document converts the criteria in document 21 into **verifiable binary controls**. It contains:

- One checklist per gate: **LV-G0, LV-G1, LV-G2, LV-G3, LV-G4, LV-G5, LV-R6 and LV-G7**.
- A cross-cutting evidence validation checklist: **LV-EV**.
- A checklist for agents: **LV-AG**, aligned with tool T10.

Each item carries the **criterion code** from document 21 (G3.07, R6.11...) or the evidence rule code (EV.05...). If a criterion changes, document 21 is amended first and the checklist afterwards. The checklists do not add requirements: in the event of any discrepancy, document 21 prevails, and document 21, in turn, cannot contradict document 01.

02

Instructions for use

2.1 Who uses the checklists

User	When	Purpose
Verifier (01 §7.5: AI Office in Lite; AI Auditor in Enterprise)	After the *gate* request and before the decision.	Check criteria and evidence and issue the verification opinion.
AI Auditor	In the subsequent audit, on the sample (21 §10.3).	Re-perform the verification and compare it with what was recorded.
Use case team	Before requesting the *gate*.	Self-assess. Its self-assessment does not replace verification.

2.2 How to verify

1. **Define the scope.** Record intensity, ambition level, technology, autonomy level, suppliers and, at G7, the proposed outcome. Mark out-of-scope items as *Not applicable*, with their justification.
2. **Validate the evidence** with LV-EV before reviewing the gate checklist.
3. **Answer each item** solely on the basis of what the evidence shows. "Partially" means *no*. Each item requires both a result (**R**) and documentation (**D**) (21 §3.1).
4. **Record the status** in the *gate* manager (T03): *yes* answer with R and D → **Met**; *no* → **Not met**; missing evidence or verification → **Pending**; justified out of scope → **Not applicable**.

5. **Apply the blocking rule** (2.4) and calculate the degree of compliance (21 §5.1).
6. **Issue the opinion**: Conformant · Conformant with observations · Nonconformant (21 §10.2), and sign.

2.3 Key

Column	Values
☐	Checkbox. Marked ☒ only if the answer is *yes* with result and documentation.
Code	Criterion from document 21 or EV rule.
Question	Worded to be answered yes or no.
Where to look	Template (P), tool (T) or record where the evidence is found.
Type	**Yes ◆** not conditionable and a critical control for security, legal compliance or human oversight · **Yes** not conditionable · **Cond.** conditionable · **Rec.** recommended.
L · E	Application in Lite and Enterprise: **Yes** · **Simpl.** (simplified template) · **Rec.** · **—** (not applicable). At Express intensity only the criteria of the reduced list (21 §2.5) are reviewed, with the P01 §14 living record as evidence.
Tags	**[GEN]** generative AI and agents · **[AG]** agents (A1–A3) · **[TER]** third-party AI.

2.4 Blocking rule

- An unchecked **Yes** or **Yes ◆** item prevents **Proceed** and **Proceed with conditions**.
- An unchecked **Cond.** item allows at most **Proceed with conditions**, with a time limit, owner and means of verification.
- An unchecked **Rec.** item requires a recorded justification; without one, it is an observation.
- Rules EV.05 (prior existence) and EV.09 (segregation) admit no exception.

2.5 Use by the auditor

- Repeats the verification on the sample and compares their answers with the statuses recorded in T03.
- Applies, where appropriate, temporal traceability, re-performance and observation tests (21 §10.4).
- Classifies each discrepancy as an observation or a minor, major or critical nonconformity (21 §10.5) and records it in T08 with code NC-AAAA-NNN.

- In Lite, when G0–G2 or G4–G5 are decided in a single session, checks that each checklist has been completed separately.

2.6 Closing each checklist

At the end of each checklist, record: **applicable criteria · degree of compliance · blocking criteria · open conditionable criteria · opinion (☐ Conformant ☐ Conformant with observations ☐ Nonconformant) · verifier · date**.

03

Authorisation (LV-G0)

Verifies: AI Office (Lite) · AI Auditor (Enterprise). Decides: sponsor (Lite) · AI Committee (Enterprise).

☐	Code	Question	Where to look	Type	L	E
☐	G0.01	Does the charter define the problem, scope and budget for phases 1 to 3, and is it signed by the sponsor?	P01	Yes	Simpl.	Yes
☐	G0.02	Are the AI thesis, the sphere and the priority in the approved portfolio referenced?	P01 · C3 portfolio	Cond.	Yes	Yes
☐	G0.03	Are the regulatory, ethical, data, budgetary and time constraints recorded?	P02	Cond.	Simpl.	Yes
☐	G0.04	Does the preliminary screening rule out prohibited practices?	P02	Yes ◆	Yes	Yes
☐	G0.05	Are the roles required by the intensity assigned by name?	P03	Yes	Yes	Yes
☐	G0.06	Are the incompatibilities in 01 §8.2 respected, and is the auditor independent of the sponsor?	P03 · organisation chart	Yes	Yes	Yes
☐	G0.07	Have the eight Enterprise criteria been answered and justified?	P04 · T04	Yes	Yes	Yes
☐	G0.08	Does it have an IA-AAAA-NNN code, and are its systems included in the inventory?	T01 · T02 · P05	Yes	Yes	Yes
☐	G0.09	Do the events confirm that there was no build expenditure and no access to production data before G0?	T01 (events) · access logs	Yes	Yes	Yes
☐	G0.10	Has data protection been informed if personal data are expected?	P02	Cond.	Rec.	Yes

04

Opportunity (LV-G1)

Verifies: AI Office (Lite) · AI Auditor (Enterprise). Decides: sponsor (in Enterprise, informing the committee).

☐	Code	Question	Where to look	Type	L	E
☐	G1.01	Are the affected process or decision, the accountable area and the business problem described?	P06	Yes	Yes	Yes
☐	G1.02	Is the use case sheet understandable to a non-specialist?	P31	Cond.	Simpl.	Yes
☐	G1.03	Were non-AI alternatives analysed, and is what AI contributes justified?	P06	Yes	Yes	Yes
☐	G1.04	Are the discarded opportunities recorded with their reason?	P06 · screening notes	Cond.	Simpl.	Yes
☐	G1.05	Does the potential value have an order of magnitude, assumptions and "estimated" status?	P06	Cond.	Yes	Yes
☐	G1.06	Were the sphere and ambition proposed using the five classifier questions?	P07 · T05	Yes	Yes	Yes
☐	G1.07	Are prohibited practices ruled out, and was the intensity reviewed against new Enterprise criteria?	P07 · P04	Yes ◆	Yes	Yes
☐	G1.08	Was it confirmed that the data exist, have an owner and that their use is plausibly lawful?	P06	Cond.	Yes	Yes
☐	G1.09	[TER] Are the candidate supplier and its preliminary requirement level identified?	P06	Cond.	Rec.	Yes
☐	G1.10	Are the affected roles and teams identified? (Optimise: recommended)	P06	Cond.	Yes	Yes

05

Hypothesis (LV-G2)

Verifies: AI Office (Lite) · AI Auditor (Enterprise). Decides: sponsor (Lite) · AI Committee (Enterprise) · board in Transform.

☐	Code	Question	Where to look	Type	L	E
☐	G2.01	Does the hypothesis state which result would refute it?	P08 · T11	Yes	Yes	Yes
☐	G2.02	Does each metric have a definition, formula, source and owner?	P08	Yes	Simpl.	Yes
☐	G2.03	Is the baseline measured with real data, or is its estimate justified and approved?	P09	Cond.	Yes	Yes
☐	G2.04	Are the target and the success threshold quantified?	P08	Yes	Yes	Yes
☐	G2.05	Is the attribution method justified (in Enterprise, control group or reason)?	P08	Cond.	Yes	Yes
☐	G2.06	Does the expected value have a formula, is it incremental, and does it separate efficiencies, return and recurring cost?	P08 · T11	Yes	Yes	Yes
☐	G2.07	Is released capacity shown separately from savings, with the means of realising or reassigning it?	P08	Cond.	Yes	Yes
☐	G2.08	Do the stop criteria have a threshold and a date or milestone, dated before the investment?	P08 · T01	Yes	Yes	Yes
☐	G2.09	Is the ambition confirmed, and is any change since G1 explained?	P07 · T05	Yes	Yes	Yes
☐	G2.10	Is there an adoption target with users, usage and frequency? (Optimise: recommended)	P08 · P20	Cond.	Yes	Yes
☐	G2.11	Transform: are there learning milestones, an investment cap and stop criteria for each stage?	P08	Yes	—	Yes
☐	G2.12	Transform: is the express approval of the board or its board committee recorded?	P29 · minutes	Yes	—	Yes
☐	G2.13	Have the investment up to G5 and the preliminary additional net value per additional euro invested been calculated?	P08 · T11	Cond.	Simpl.	Yes

06

Feasibility (LV-G3)

Verifies: AI Office (Lite) · AI Auditor (Enterprise). Decides: sponsor with risk clearance (Lite) · AI Committee (Enterprise). Main stop gate.

☐	Code	Question	Where to look	Type	L	E
☐	G3.01	Was technical feasibility demonstrated with the company's real data?	P10 · technical test results	Yes	Yes	Yes
☐	G3.02	Has data quality been assessed, and do the data have an owner?	P10	Cond.	Simpl.	Yes
☐	G3.03	Does data protection confirm the legal basis and minimisation?	P11	Yes ◆	Yes	Yes
☐	G3.04	Are build, recurring and adoption costs estimated by category?	P10 · T13	Yes	Simpl.	Yes
☐	G3.05	Is the expected net value consistent with the C2 appetite and horizon for the ambition level, and is there a draft benefits realisation plan with a business owner?	P10 · P08 · P62 · C2 thesis	Yes	Yes	Yes
☐	G3.06	Are the stop criteria those approved at G2, or has their change been approved?	P08 (versions) · P29	Yes	Yes	Yes
☐	G3.07	Is the regulatory classification dated, signed off with legal judgement, and does it state the company's role?	P11 · T07	Yes ◆	Yes	Yes
☐	G3.08	Is any prohibited practice ruled out? (If not: Stop)	P11	Yes ◆	Yes	Yes
☐	G3.09	Have the impact assessments been determined, and have those required before processing been completed or started?	P11	Yes ◆	Yes	Yes
☐	G3.10	Does each applicable obligation have a phase, role and evidence?	P11	Cond.	Simpl.	Yes
☐	G3.11	Do the risks have probability, impact and inherent and residual level using the scale in document 33?	P12 · T06	Yes	Simpl.	Yes
☐	G3.12	Does every Critical residual risk have board approval, and do High and Medium risks have the corresponding acceptance?	P12 · P29	Yes ◆	Yes	Yes
☐	G3.13	Does each High or Critical residual risk have a control, owner and time limit?	P13	Yes	Yes	Yes
☐	G3.14	Does each Medium risk have a decided response and owner?	P13	Cond.	Simpl.	Yes
☐	G3.15	Was the intensity reviewed with the information from phase 3?	P04 · T04	Yes	Yes	Yes
☐	G3.16	Has the impact on people been assessed according to the ambition level?	P10 · P20	Cond.	Simpl.	Yes
☐	G3.17	[GEN] Have prompt injection, information leakage, erroneous content, excessive permissions and unauthorised actions been assessed?	P12 (RT-GEN, RT-SEG)	Yes ◆	Yes	Yes

☐	Code	Question	Where to look	Type	L	E
☐	G3.18	[GEN] Is the autonomy level justified, and is the intensity consistent with it (A2 or A3 with effects on third parties, money, personal data or production systems → Enterprise)?	P04 · P12	Yes ◆	Yes	Yes
☐	G3.19	[GEN] Are test sets, metrics and evaluation thresholds defined?	P10	Cond.	Simpl.	Yes
☐	G3.20	[TER] Is the supplier assessed at the N1–N3 level that applies to it, including dependency?	P14 · T09	Yes	Simpl.	Yes
☐	G3.21	[TER] Are the minimum contractual conditions included as a procurement requirement?	P14	Yes ◆	Yes	Yes
☐	G3.22	[TER] Does the supplier provide, or undertake to provide, the necessary regulatory documentation?	P14 · P11	Cond.	Rec.	Yes

07

Design (LV-G4)

Verifies: AI Office (Lite) · AI Auditor (Enterprise). Decides: sponsor with risk clearance (Lite) · AI Committee (Enterprise).

☐	Code	Question	Where to look	Type	L	E
☐	G4.01	Does the architecture record include components, integrations, environments, third parties and decisions?	P15	Cond.	Simpl.	Yes
☐	G4.02	Is automatic logging of inputs, outputs, versions and decisions designed, with a defined retention period?	P15	Yes ◆	Simpl.	Yes
☐	G4.03	Does the lineage cover data, model versions and third-party foundation models?	P16	Cond.	Simpl.	Yes
☐	G4.04	Is it established what the system decides, what a person validates, what is not delegated and who intervenes?	P17	Yes ◆	Yes	Yes
☐	G4.05	Are the transparency notices and the human review of automated decisions designed?	P17	Yes ◆	Yes	Yes
☐	G4.06	Does each Medium or higher risk have a designed and traceable control?	P12 · P18	Yes	Yes	Yes

☐	Code	Question	Where to look	Type	L	E
☐	G4.07	Does the security design cover access, encryption, environments, secrets and AI-specific threats?	P18	Yes ◆	Simpl.	Yes
☐	G4.08	Does monitoring have metrics, thresholds, alerts and an assigned operations owner?	P15 · P03	Cond.	Simpl.	Yes
☐	G4.09	Is there a shutdown mechanism with an owner and target time?	P19	Yes ◆	Yes	Yes
☐	G4.10	Does the rollback plan have criteria, procedure, owner, fallback and a planned test?	P19	Yes	Simpl.	Yes
☐	G4.11	Does the adoption plan cover training, communication, support, measurement and what is specific to the ambition level, and is the benefits realisation plan complete and signed?	P20 · P62 · T20	Cond.	Simpl.	Yes
☐	G4.12	Do the test plan and the pilot design have acceptance criteria and the approved attribution method?	P22	Cond.	Simpl.	Yes
☐	G4.13	Are the required impact assessments closed and their measures incorporated?	P11	Yes ◆	Yes	Yes
☐	G4.14	High risk: are the company's obligations according to its role planned, with an owner?	P11 · P15	Yes ◆	—	Yes
☐	G4.15	[AG] Does the agent have its own identity with managed, rotated and revocable credentials?	P18 · T10	Yes ◆	Yes	Yes
☐	G4.16	[AG] Are least privilege and limits on tools, operations, amounts, recipients and volumes defined?	P18 · T10	Yes ◆	Yes	Yes
☐	G4.17	[AG] Is each action linked to its instruction and purpose, and are sensitive actions checked before execution?	P18 · T10	Yes ◆	Yes	Yes
☐	G4.18	[AG] Is there a kill switch that stops the agent and revokes credentials, with an owner and a planned test?	P18 · P19	Yes ◆	Yes	Yes
☐	G4.19	[AG] Do sensitive or irreversible actions require prior human validation according to the autonomy level?	P17	Yes ◆	Yes	Yes
☐	G4.20	[GEN] Are there defences against prompt injection and information leakage?	P18 · T10	Yes ◆	Yes	Yes
☐	G4.21	[GEN] Are the evaluation set and its thresholds approved before building?	P22	Cond.	Simpl.	Yes
☐	G4.22	[TER] Are the clauses from G3.21 in the contract or draft, and is the integration documented?	P14 · P15	Cond.	Yes	Yes

08

Go-live (LV-G5)

Verifies: AI Office (Lite) · AI Auditor (Enterprise). Decides: sponsor with risk clearance (Lite) · AI Committee after multi-level sign-off (Enterprise).

☐	Code	Question	Where to look	Type	L	E
☐	G5.01	Does the delivery report record what was built and the approved deviations from G4?	P21	Cond.	Simpl.	Yes
☐	G5.02	Do the functional and performance tests meet the acceptance criteria?	P22	Yes	Yes	Yes
☐	G5.03	If it affects people, are the bias tests within thresholds?	P22	Yes ◆	Yes	Yes
☐	G5.04	Do the robustness and security tests leave no critical or high vulnerabilities open?	P22	Yes ◆	Simpl.	Yes
☐	G5.05	[GEN] Do the evaluations reach the thresholds, and were the injection and leakage tests passed?	P22 · T10	Yes ◆	Yes	Yes
☐	G5.06	[AG] Do the tests demonstrate that limits, intent-based access control and the kill switch work?	P22 · P19 · T10	Yes ◆	Yes	Yes
☐	G5.07	[AG] Is the authorised autonomy level the one that was tested?	P18 · P23	Yes ◆	Yes	Yes
☐	G5.08	Does the pilot, using the approved attribution method, reach the threshold for the ambition level or with accepted conditions?	P22 · T11	Cond.	Yes	Yes
☐	G5.09	Has no stop criterion been reached, or is there an express decision by the body that authorised it?	P22 · P29	Yes	Yes	Yes
☐	G5.10	Is there a plan, with an owner and date, to realise or reassign the released capacity?	P20	Cond.	Yes	Yes
☐	G5.11	Was rollback tested, and does the actual time meet the target?	P19	Yes	Yes	Yes
☐	G5.12	Does the risk register incorporate the test results and acceptances at the correct level?	P12 · T06	Yes ◆	Yes	Yes
☐	G5.13	Are the critical controls active and checked in production?	P22 · P25	Yes ◆	Yes	Yes

☐	Code	Question	Where to look	Type	L	E
☐	G5.14	Are those who oversee the system designated, trained and given the authority and means to intervene?	P17 · P20	Yes ◆	Yes	Yes
☐	G5.15	Have the regulatory obligations prior to putting into service been fulfilled according to the role?	P11	Yes ◆	Yes	Yes
☐	G5.16	Are monitoring and alerts configured and tested?	P25	Yes	Simpl.	Yes
☐	G5.17	Does the incident plan define S1–S4, escalation and regulatory notifications with time limits?	P26 · T08	Yes ◆	Simpl.	Yes
☐	G5.18	Has the operations manual been accepted by the operations owner?	P24	Cond.	Simpl.	Yes
☐	G5.19	Is there evidence of user training and AI literacy for those who use or oversee the system?	P20	Cond.	Yes	Yes
☐	G5.20	[TER] Is the contract signed with the required clauses, and is the supplier registered?	P14 · T09	Yes ◆	Yes	Yes
☐	G5.21	Is value tracking configured, and do the pilot results have a status?	P28 · T12	Cond.	Simpl.	Yes
☐	G5.22	Are the previous conditions closed or, if not critical, within their time limit?	P29 · T03	Yes	Yes	Yes
☐	G5.23	Is the risk clearance (Lite) or the four sign-offs with no veto in force (Enterprise) recorded?	P23 · T03	Yes ◆	Yes	Yes

Multi-level sign-off (Enterprise). Before checking G5.23, check for each signatory (technical, risk and compliance, information security, data protection): ☐ sign-off recorded with date and system version · ☐ direction (favourable, with reservations or veto) · ☐ no signatory took part in the build · ☐ previous vetoes have been lifted by whoever issued them (21 §9.2).

09

Continuity review (LV-R6)

Verifies: AI Office (Lite) · AI Auditor (Enterprise). Decides: sponsor (Lite) · AI Committee (Enterprise). Frequency: every six months (Lite) · quarterly (Enterprise). Outcomes (01 §7.3): Proceed with operation · Proceed with conditions · Bring G7 forward.

☐	Code	Question	Where to look	Type	L	E
☐	R6.01	Is the review carried out within its frequency?	T01 · previous P29	Yes	Yes	Yes
☐	R6.02	Is the realised value compared with the hypothesis, with status and validated proportion?	P28 · T12	Yes	Simpl.	Yes
☐	R6.03	Are the deviations between actual and estimated costs explained?	P28 · T13	Cond.	Simpl.	Yes
☐	R6.04	Is performance within thresholds, and are model changes recorded?	P25 · P27	Cond.	Yes	Yes
☐	R6.05	If it affects people, is the monitored bias within thresholds?	P25	Yes ◆	Yes	Yes
☐	R6.06	Do the incidents have severity, containment and closure, and were the reportable ones notified on time?	P27 · T08	Yes ◆	Yes	Yes
☐	R6.07	Were significant changes assessed and did they go through G4 and G5 where appropriate?	P27 · P29	Yes	Yes	Yes
☐	R6.08	Are the regulatory classification, the impact assessments and the intensity still valid?	P11 · P04	Yes ◆	Yes	Yes
☐	R6.09	Is the risk register up to date, and have new risks been accepted at the correct level?	P12 · T06	Cond.	Simpl.	Yes
☐	R6.10	Is there evidence of human oversight exercised, logs retained and a shutdown mechanism available?	P25 · P17 · logs	Yes ◆	Yes	Yes
☐	R6.11	[AG] Were permissions, credentials, intent logs and anomalous actions reviewed, and was the kill switch tested?	P18 · P27 · T10	Yes ◆	Yes	Yes
☐	R6.12	[TER] Were the supplier's changes, incidents and contractual compliance reviewed?	P14 · T09	Cond.	Simpl.	Yes
☐	R6.13	Is the required post-market monitoring being carried out?	P25 · P11	Yes ◆	—	Yes
☐	R6.14	Is adoption measured against the target? (Optimise: recommended)	P20 · P28	Cond.	Yes	Yes
☐	R6.15	Are open conditions and nonconformities within their time limits?	P29 · T08	Yes	Yes	Yes
☐	R6.16	Is the assessment of deviations that require bringing G7 forward (21 §6.7) recorded?	P29	Yes	Yes	Yes

10

Scale or retire (LV-G7)

Verifies: AI Office (Lite) · AI Auditor (Enterprise). Decides: sponsor (Lite) · AI Committee (Enterprise) · board to scale in Transform. Mark items for the outcome not proposed as *Not applicable*. Keeping the system unchanged is verified as *Iterate* with a return to phase 6 (21 §5.3).

☐	Code	Question	Where to look	Type	L	E
☐	G7.01	Is the realised value consolidated with status and, in order to scale, validated according to the ambition level?	P28 · T12	Yes	Yes	Yes
☐	G7.02	Is there an explicit conclusion on the hypothesis against the threshold and the stop criteria?	P30	Yes	Yes	Yes
☐	G7.03	Was the actual ambition reviewed, and were the differences from the declared ambition recorded?	P07 · T05	Yes	Yes	Yes
☐	G7.04	Were accumulated risks, incidents and nonconformities for the period assessed?	P12 · P27	Yes	Simpl.	Yes
☐	G7.05	Are actual costs, actual annual net value and, if scaling, additional net value per additional euro invested recorded?	P28 · P30	Cond.	Simpl.	Yes
☐	G7.06	Are the lessons learned recorded?	P30	Cond.	Simpl.	Yes
☐	G7.07	Scale: are the scope, investment and new risks described, with a new phase 0 planned?	P30	Yes	Yes	Yes
☐	G7.08	Scale: are there no open S1 or S2 incidents, and can operations support the new volume?	P24 · P27	Cond.	Yes	Yes
☐	G7.09	Scale in Transform: is the express approval of the board recorded?	P29 · minutes	Yes	—	Yes
☐	G7.10	Iterate: are the return phase, the reason and the time limit defined?	P30	Yes	Yes	Yes
☐	G7.11	Retire: does the plan cover date, coded reason, body, replacement, data and models, access, communication and inventory?	P30 · T22	Yes ◆	Yes	Yes
☐	G7.12	[TER] Retire: is the return or certified deletion of data and the revocation of the supplier's access planned?	P14 · P30	Yes ◆	Yes	Yes

11

Evidence validation (LV-EV)

Applied to **each piece of evidence** linked in the *gate* request, before reviewing the gate checklist. It develops 21 §4. It applies equally in Lite and Enterprise, except EV.10, which in Lite requires only the fields not marked *(Enterprise)*.

☐	Code	Question	Where to look	If the answer is no
☐	EV.01	Does the evidence identify the use case, the source template or record and the title?	Evidence cover page	Pending
☐	EV.02	Is the author recorded with their role?	Evidence record	Pending
☐	EV.03	Are the date of preparation and the date of last modification recorded?	Record · repository history	Pending
☐	EV.04	Is the version linked in the request the version reviewed?	T03 · repository	Pending
☐	EV.05	Is the date prior to the *gate* request, and is the activity described prior to the decision?	Repository history · T01 events	Not valid · major nonconformity
☐	EV.06	Is it in the repository with version history and a link accessible from T01 or T03?	Repository · T03	Pending
☐	EV.07	Does it relate to this use case, its scope and the system version, or is its reuse justified?	Content · P15 (version)	Not valid
☐	EV.08	If it supports results, does it have a source, period, reproducible method and, for amounts, formula and status?	Content · T11 · T12	Not valid
☐	EV.09	Is it approved by the appropriate person, and are author, verifier and decision-maker different people?	Record · P03 · P29	Not valid · major nonconformity if there is self-approval
☐	EV.10	Are the mandatory fields complete —in the template or in the referenced evidence with its annex (21 §4.3)—, with an explicit "no data" where information is missing?	Template	Pending
☐	EV.11	Do its figures and statements match those in the other evidence?	P08 · P10 · P12 · P18 · P28	Not met until clarified
☐	EV.12	Does it avoid unnecessary personal data, and does it have the appropriate restricted access?	Content · repository permissions	Observation or nonconformity

☐	Code	Question	Where to look	If the answer is no
☐	EV.13	If generated by a system, is it a dated export or a timestamped link?	Logs · dashboards · test results	Not valid
☐	EV.14	If it comes from a third party, does it have an identifiable issuer, validity and a scope that covers the service?	P14 · supplier documentation	Not valid

Evidence with a *no* in EV.05 or EV.09 cannot be used for any criterion. With shortcomings in EV.01–EV.04, EV.06 or EV.10, it may be accepted only if it does not support a *Yes* or *Yes* ◆ criterion and is corrected before the decision (21 §4.2).

12

Agents (LV-AG)

Brings together the controls for systems that execute actions or prepare them for human validation. It is the content of tool T10 (agent security assessment) and complements, without replacing, the checklists for each gate. It applies equally in Lite and Enterprise; the columns indicate what each autonomy level requires (21 §8.2): **Yes** mandatory · **Rec.** recommended · **—** not applicable. Several items may refer to the same criterion.

☐	Code	Question	Where to look	Gate	A1	A2	A3
		Risk and autonomy					
☐	G3.17	Are the agent's RT-GEN and RT-SEG risks assessed in the risk register?	P12 · T06	G3	Yes	Yes	Yes
☐	G3.18	Is the autonomy level approved, and is the intensity consistent with it?	P04 · P12	G3	Yes	Yes	Yes
☐	G5.07	Is the autonomy level configured in production the one tested and approved at G5?	P23 · agent configuration	G5	Yes	Yes	Yes
		Identity					
☐	G4.15	Does the agent have its own technical identity, not shared with people or with other agents?	P18 · P54 · identity directory	G4	Yes	Yes	Yes
☐	G4.15	Are the credentials held in a secrets manager, rotated and immediately revocable?	P18 · secrets manager	G4	Yes	Yes	Yes
☐	G4.15	Is a human owner of the agent recorded in the inventory?	P05 · P54 · T02	G4	Yes	Yes	Yes

☐	Code	Question	Where to look	Gate	A1	A2	A3
		Permissions and limits					
☐	G4.16	Do the actual permissions in the systems match the approved least privilege? (check the configuration, not just the document)	P18 · access configuration	G4, G5	Yes	Yes	Yes
☐	G4.16	Are there quantitative limits (amounts, volumes, recipients, frequency) that block actions exceeding them?	P18	G4	—	Yes	Yes
☐	G5.06	Do the tests demonstrate that the limits block unauthorised actions?	P22	G5	—	Yes	Yes
		Intent-based access control					
☐	G4.17	Does each action log the instruction, the objective and the user or process that originates it?	P18 · logs	G4	Rec.	Yes	Yes
☐	G4.17	Are sensitive actions checked against the authorised purpose and blocked if they do not match?	P18 · P22	G4, G5	Rec.	Yes	Yes
		Human validation					
☐	G4.19	Are the actions requiring prior validation listed (A1: all; A2: sensitive or irreversible; A3: outside limits), and is the system unable to execute them without it?	P17 · P22	G4, G5	Yes	Yes	Yes
		Kill switch					
☐	G4.18	Is there a documented kill switch with an owner, a substitute and a target time?	P18 · P19	G4	Rec.	Yes	Yes
☐	G5.06	Was it tested that the kill switch stops the agent and revokes credentials within the target time?	P22 · P19	G5	Rec.	Yes	Yes
☐	R6.11	Has the kill switch been tested during the review period?	P27 · test log	R6	—	Rec.	Yes
		Prompt injection and information leakage					
☐	G4.20	Is external content (documents, emails, web, tool responses) treated as untrusted and unable to alter instructions or permissions?	P18	G4	Yes	Yes	Yes
☐	G5.05	Were direct and indirect injection tests passed within threshold?	P22 · T10	G5	Yes	Yes	Yes
☐	G5.05	Were tests for leakage of personal data, secrets and system instructions passed?	P22 · T10	G5	Yes	Yes	Yes

☐	Code	Question	Where to look	Gate	A1	A2	A3
		Tools, gateway, test bench and people					
☐	G4.16	Is each tool, connector or tool server of the agent — including local ones— inventoried with a pinned version and verified origin, and were its description and permissions reviewed before approving it (AG-13)?	P18 · P54	G4	Yes	Yes	Yes
☐	G4.20	Does all the agent's traffic to models pass through the corporate AI gateway (SEG-26) with the common configuration?	P18 · gateway configuration	G4, G5	Rec.	Yes	Yes
☐	G5.05	Was the corporate agent test bench (SEG-27) run on the version going into production, through all its channels, with no successful critical scenario?	P53 · T10	G5	Yes	Yes	Yes
☐	G4.19	With direct exposure: does the agent hand over immediately to a person on signs of vulnerability or an express request, and are handovers recorded (35 §4.6)?	P17 · P49	G4, G5	Yes	Yes	Yes
		Operation					
☐	R6.11	Are blocked, anomalous or out-of-pattern actions reviewed and acted upon?	P27 · logs	R6	Rec.	Yes	Yes
☐	R6.11	Were permissions and credentials reviewed during the period, and were those no longer needed removed?	P18 · P54 · access configuration	R6	Yes	Yes	Yes
☐	R6.11	Does the test bench run at every deployment and was it extended with the period's incidents?	P53 · deployment pipeline	R6	Rec.	Yes	Yes
☐	R6.11	Was every tool or connector whose description or behaviour changed during the period approved again?	P54 · change log (P27)	R6	Yes	Yes	Yes
		Retirement					
☐	G7.11	When the agent is retired, are its identity, credentials and permissions revoked and its logs retained for the defined period?	P30 · T22	G7	Yes	Yes	Yes

An unchecked mandatory item in LV-AG is equivalent to *Not met* for the criterion it refers to, with the effects set out in 2.4.

13

Associated tools and templates

Name	Use
***Gate* manager** (T03)	Loads the checklists, records the status of each item, calculates the degree of compliance and applies the blocking rule.
Agent security assessment (T10)	Implements LV-AG within T03.
Use case register · Nonconformities and incidents (T01 · T08)	Events to check prior existence; register of findings.
***Gate* decision record** (P29)	Records the result of the checklists and the verification opinion.
Go-live sign-off (P23)	Check of the LV-G5 sign-offs.
Block H templates (P01–P31)	Where to look for each piece of evidence.

Version control

Version	Date	Changes
0.1	16-09-2026	First version. Replaces the checklists in the previous material: 128 binary controls in eight checklists by gate with the codes from document 21, LV-EV evidence validation checklist (14 controls), LV-AG checklist for agents aligned with T10 (21 controls) and instructions for the verifier and the auditor. Consistency adjustments with 01 (segregation of duties in Lite, R6 outcomes, agent criterion) and with 34 and 37.
0.2	01-10-2026	LV-EV, EV.10: mandatory fields may be in referenced evidence with its annex (21 §4.3).
0.3	01-10-2026	At Express intensity only the criteria of the reduced list (21 §2.5) are reviewed.
0.4	19-10-2026	LV-AG: six questions on tools and connectors (AG-13), the corporate AI gateway (SEG-26), the corporate test bench (SEG-27) and handover to a person (35 §4.6); 27 agent controls (D159).
