INTERNAL WORKING DOCUMENT

SEVEN-G · Analysis of the current state, gaps and document plan

Inventory what exists, identify inconsistencies and gaps, and propose the complete SEVEN-G document library for use by any company.

Fernando García Varela Version 0.2 16-09-2026

IN THIS DOCUMENT

01 Inventory of what exists

02 Inconsistencies to be resolved

03 Gaps identified

04 Proposed document library

05 Decisions adopted (16-09-2026)

07 Resolution of the analysis (16-09-2026, version 0.2)

> Internal document. It contains no client data. Real experiences are cited in anonymised form.

01

Inventory of what exists

1.1 SEVEN-G materials in this repository

Since 16-09-2026 all these materials are in `SEVEN-G/_legacy/`.

Material	Language	Actual content	Reuse
`SEVEN-G_Document_1_Foundational_Methodology.pdf`	EN	Substantive summary (~600 words): 6 principles, Stage-Gate cycle, phases 0–7, 6 roles, segregation of duties, 7 risk categories, Lite/Enterprise versions, maturity 0–5.	**Canonical conceptual basis.** Develop.
`SEVEN-G_Document_9_Phase_Gate_and_Audit_Criteria` **(standard and *Expanded*)**	EN	Substantive: criteria per phase, 21 mandatory artefacts, dual validation, approval rules.	**Basis of the lifecycle.** Merge both versions.
Documents 2, 3, 4, 5, 6, 10, 11, 12	EN	One-page skeletons (1.8–2.1 KB): scope and table of contents only.	Structure reusable; content still to be written.
Documents 7 and 8	—	Do not exist in PDF. The Master Pack index names them (Charter and Engagement Guide).	`.md` versions exist with a different phase model.

Material	Language	Actual content	Reuse
`SEVEN-G_Master_Print_Pack.pdf`	EN	Cover and index of 12 documents.	Replace with the index of the new library.
`SEVEN-G_IA_for_Hypergrowth.pdf`	ES	15 slides generated with NotebookLM summarising docs 1, 9, 11, 12. Contains visible defects (printed style instructions, typos). Does not deal with hypergrowth.	Not a deliverable. Redo as a framework presentation.
`Documents Framework/*.md` **(8 files)**	EN	Long templates with fictitious examples (US manufacturing company, churn prediction case). They use a different model: the Strategy-Exploration-Validation-Execution-Navigation-Governance acronym. Numerous numerical inconsistencies.	Reusable material **after rewriting**: Risk Matrix (the most robust), GO/NO-GO Decision Record, Charter, Maturity Report, Runbook. Value Hypothesis Canvas is a skeleton.
`SPHERES/_legacy/SEVENG - Marco_Esferas_IA_v2.pptx`	ES	9 spheres × 3 levels, questions for the board, 60-minute script, 90-day plan. Does not mention SEVEN-G.	**Component A of the framework.** Integrate.
`SPAD/`	ES/EN	AI-assisted software engineering methodology, with AI roles, phases and a validation policy. Describes itself as a "foundational skill of SEVEN-G".	Complementary piece for phases 4–5 when the solution is built with AI. Broken internal links.

1.2 Related external materials

Material	Reuse
`AI_en_el_consejo` repository (dashboard engine, 11 sector demonstrations, recommendation register, JSON schema, MIT / CC BY 4.0 licences)	**Component D.** Provides the measurement rules, the ambition label, the separation of efficiencies / return, agility by risk and ambition, exposure to offensive AI and agent controls.
Practical application in a technology advisory board of an insurance group (2026)	Validated the use of spheres × levels as a lens for analysing real documents, and produced reusable artefacts: value hypothesis per case, 4 *gates* with decision-maker and evidence, multi-level go-live sign-off with veto, intent-based access control criteria for agents, requirements on third parties at 3 levels, residual risk P×I, maturity by dimension with evidence, programme traffic-light status. **Do not carry over client data, names, figures or recognisable features.**
Internal note on publication (15-09-2026)	Criteria for publishing each piece: it answers a specific board decision, it has a usable artefact, it can be tested with fictitious data in under 10 minutes and it does not require hiring the author. Risk of brand dispersion.

Material	Reuse
AECF (`C:\SEACHAD\AECF_MCP`)	Associated with agile AI governance and AIFlow. Relationship with SEVEN-G to be defined.

02

Inconsistencies to be resolved

2.1 What SEVEN-G is (four definitions)

Source	Definition
Doc 1 and Master Pack	*Seven-Phase Enterprise Value & Governance Framework for AI*, with 8 phases (0–7).
Engagement Guide and Charter	Acronym **S**trategy, **E**xploration, **V**alidation, **E**xecution, **N**avigation + **G**overnance (6 or 5 phases).
NotebookLM presentation	Enterprise Governance and Value Framework for AI.
SPAD (landing)	Engineering framework based on *skills*.

Proposal adopted in document 00 (pending confirmation): SEVEN-G = *Seven-phase Enterprise Value & Governance*. Phase 0 is enabling (authorisation) and phases 1–7 are the seven value phases; the G expresses cross-cutting governance. The S-E-V-E-N-G acronym is abandoned, but its useful content (engagement models, prioritisation criteria, KPIs) is relocated.

2.2 Other inconsistencies

Topic	Variants found	Proposal
Number and names of phases	8 (0–7), 6, 5 with months; *Validation* = PoC or MVP depending on the document; *Navigation* = optimisation or deployment.	Phases 0–7 of Doc 1 in Spanish (table in document 00).
***Gate* outcomes**	Validate/Iterate/Pivot/Stop; GO/ITERATE/STOP; GO/GO with conditions/DEFER/NO-GO; Pass/Conditional/Fail; APPROVED/...; GO/ITERATE/NO-GO.	Proceed / Proceed with conditions / Iterate / Pivot / Stop; in phase 7 Scale / Iterate / Retire. Audit: Conformant / Conformant with observations / Nonconformant.

Topic	Variants found	Proposal
Maturity	0–5 with 4 or 5 metrics (Doc 1, Doc 5); 1–5 with 7 dimensions and CMMI names (Maturity Report); 1–5 per sphere (90-day plan).	0–5 scale with rubric and evidence per dimension; overall level = weighted minimum, not a simple average. Final dimensions still to be decided.
Risk categories	7, 6, 4 and 5 depending on the document.	The 7 of Doc 1 + a specific extension for generative AI, agents and security.
Roles	6 normative roles; consultancy roles; in SPAD "AI Auditor" is a language model.	6 normative roles + corporate bodies. In SPAD rename the AI role (e.g. "AI reviewer") to avoid a clash with the human AI Auditor.
ROI	Four thresholds and two different formulas.	Replace with the measurement rules (annual net value, additional net value per additional euro invested). If ROI is used, a single formula based on net profit.
Spheres 08 and 09	Use other levels; they were mixed up in the practical application.	Explicit rule (document 00, §4.1).
Geographical scope	Templates with dollars, CCPA, HIPAA.	Euros, European and Spanish regulation as the reference; annexes for other jurisdictions.
Brand names	SEVEN-G, SevenG, SEVENG, SPHERES, Marco de Esferas.	Single umbrella **SEVEN-G**; "Sphere map" as a component. SPAD and AECF as related pieces, not parallel brands.
Language	Normative PDFs in English, board material in Spanish.	To be decided: Spanish as the master version with subsequent translation into English.
Unsupported figures	"50+ engagements", "benchmark of 200+ organisations", "↓70% rework", ROI percentages.	Remove all claims that cannot be demonstrated.

03

Gaps identified

3.1 Structural gaps (phases and levels)

1. **The company level is missing.** All existing material governs *initiatives*. There is no cycle in which the board and management diagnose, set the ambition and risk appetite, manage the portfolio, oversee and review. **Proposed in document 00 as the corporate cycle C1–C5.**
2. **The distinction between efficiency and transformation is missing.** No normative document addresses it; the Charter even excludes transformation from its scope, and the ROI filters in phases

1 and 3 penalise transformational bets. Only the Sphere map and the board dashboard outline it. **Proposed in document 00: ambition classification with 5 questions, differentiated gate criteria and a transformation index with 8 signals and 5 profiles.** Thresholds and calibration are missing.

3. **Retirement has no procedure.** It exists as an outcome of phase 7, but there are no criteria, owners or a register of retirements (with replacement and lessons learned).
4. **There are no criteria for choosing Lite or Enterprise.** Proposed on a preliminary basis in document 00.
5. **There is no treatment of AI that is not a project**: AI embedded in third-party software, productivity suites with AI, individual use by employees and *shadow AI*. Today these fall outside the 0–7 cycle and are a growing share of risk and spending.
6. **An adoption and change phase or sub-process is missing.** Phase 5 validates value, but there is no explicit treatment of actual adoption, reallocation of released capacity and training, which are preconditions for the value to materialise.

3.2 Thematic gaps

Topic	Current situation	Why it matters
Generative AI and agents	Existing material is designed for classical ML (accuracy, drift).	Evaluations, hallucinations, prompt injection, agent identity and permissions, intent-based access control, kill switch, human validation of actions.
Security and offensive AI	Only in the board dashboard.	Attacks that use AI, and in-house agents that have been manipulated, are already a real source of notified breaches.
Inventory and regulatory classification	Does not exist.	A de facto obligation for applying the EU AI Act.
Regulatory mapping	Doc 12 is a skeleton; only one mention of the EU AI Act in the whole framework.	Missing: articles of the EU AI Act (including AI literacy, art. 4; transparency, art. 50; serious incidents), ISO/IEC 42001, NIST AI RMF, GDPR, DORA, NIS2, sector-specific regulation.
AI third parties and providers	Isolated mentions.	Technology dependency, contracts, use of data by the provider, register of critical third parties.
AI costs (FinOps)	Does not exist.	Cost per case with analytical allocation of licences, model consumption and compute; necessary to calculate net value.
Data and knowledge	Spheres 05 and 06 without indicators.	Data readiness is the main cause of delay and failure.

Topic	Current situation	Why it matters
People	Sphere 03 without indicators; displacement risk mentioned in passing.	Capacity reallocation, new roles, training, labour relations, communication.
Indicators per sphere	There are strong metrics for governance, regulation and decision; they are missing for customer, product, knowledge and data.	Without them the sphere map cannot be measured.
Maturity	No rubric, no questionnaire, no evidence per level.	It is the first deliverable of any implementation.
Guide for conversations with the board	Exists in candidacy material, not generalised.	Language, response format ("Yes, with one condition"; "Not yet, because X is missing"), number of cases to present.
Application cases	Only inconsistent fictitious examples.	Credibility of the framework. They must be anonymised, or fictitious and consistent with the demonstrations.
Use of the framework by third parties	Not defined.	Content licence, terms of use by consultancies, possible certification.

04

Proposed document library

Status: **New** (does not exist), **Rewrite** (reusable material exists), **Integrate** (exists outside SEVEN-G), **Done v0.1**.

A · Foundations

No.	Document	Source	Status
00	What SEVEN-G is and what it is for	All material	Done v0.1 (ES/EN)
01	Foundational methodology (complete model, principles, levels, components)	Doc 1, Doc 9	Done v0.1 (ES/EN)
02	Glossary and conventions (terms, scales, *gate* outcomes, nomenclature)	All	Done v0.1 (ES/EN)

No.	Document	Source	Status
03	Tools and initiative register (catalogue, data model, funnel)	Board dashboard, practical experience	Done v0.1 (ES/EN)

B · Strategy and portfolio (company level)

No.	Document	Source	Status
10	Sphere map and ambition levels (with indicators per sphere)	Marco de Esferas v2	Done v0.1 (ES/EN)
11	Maturity model: dimensions, 0–5 rubric, questionnaire, evidence	Doc 5, Maturity Report	Done v0.1 (ES/EN)
12	Transformation index: ambition criteria, signals, profiles, thresholds	Document 00, board dashboard	Done v0.1 (ES/EN)
13	AI thesis, ambition and risk appetite (template for the board)	—	Done v0.1 (ES/EN)
14	Portfolio management: prioritisation, ambition balance, review and retirement	Engagement Guide (prioritisation), dashboard	Done v0.1 (ES/EN)

C · Initiative lifecycle

No.	Document	Source	Status
20	Phase manuals 0–7 (objective, inputs, activities, roles, evidence, common mistakes)	Doc 3, Doc 9, Engagement Guide	Done v0.1 (ES/EN)
21	*Gate* and audit criteria, with Lite/Enterprise variants and by ambition level	Doc 9 (both versions), GO/NO-GO Record	Done v0.1 (ES/EN)
22	Checklists per *gate*	Doc 10	Done v0.1 (ES/EN)
23	Adoption and change in the initiative (released capacity, training, communication)	Engagement Guide (ADKAR)	Done v0.1 (ES/EN)

D · Governance, risk and compliance

No.	Document	Source	Status
30	Governance model: bodies, roles, segregation of duties, RACI per phase, escalation	Doc 1, Doc 4, Charter	Done v0.1 (ES/EN)
31	Corporate AI policy and acceptable use policy (includes *shadow AI* and AI literacy)	—	Done v0.1 (ES/EN)
32	AI system inventory and regulatory classification	Dashboard (schema)	Done v0.1 (ES/EN)
33	AI risk methodology: matrix, register, typical risks (includes generative AI and agents)	Risk Matrix, Risk Register	Done v0.1 (ES/EN)
34	Regulatory mapping: EU AI Act , ISO/IEC 42001 , NIST AI RMF , GDPR , DORA , NIS2	Doc 12	Done v0.1 (ES/EN)
35	AI and agent security: offensive AI, identity, permissions, intent-based access control, kill switch	Dashboard, practical experience	Done v0.1 (ES/EN)
36	AI third parties and providers: selection, contracts, requirements at 3 levels, dependency	Practical experience	Done v0.1 (ES/EN)
37	Nonconformities, AI incidents and remediation	Doc 11, Runbook (incidents)	Done v0.1 (ES/EN)
38	AI audit framework	Doc 2	Done v0.1 (ES/EN)

E · Measurement and value

No.	Document	Source	Status
40	Value measurement rules	Board dashboard	Done v0.1 (ES/EN)
41	Catalogue of indicators with formulas (by sphere, phase, ambition level and company)	Charter, Maturity Report, dashboard	Done v0.1 (ES/EN)
42	AI costs and allocation per case	Practical experience	Done v0.1 (ES/EN)
43	Benefits realisation: tracking, attribution, post-implementation review	Charter, Doc 9 (Value Realization Tracker)	Done v0.1 (ES/EN)

F · People, data and operations

No.	Document	Source	Status
50	People and organisation: roles, capabilities, reallocation, labour relations	Sphere 03	Done v0.1 (ES/EN)
51	Data and knowledge for AI: data governance, preparation, lineage	Spheres 05 and 06	Done v0.1 (ES/EN)
52	AI operations manual (classical ML, generative AI, agents)	AI Ops Runbook	Done v0.1 (ES/EN)
53	Building solutions with AI (relationship with SPAD)	SPAD	Done v0.1 (ES/EN)

G · Board

No.	Document	Source	Status
60	Board pack: content, frequency, decision format	Doc 6	Done v0.1 (ES/EN)
61	Guide for conversations with the board: questions per sphere, language, 60-minute script	Marco de Esferas, practical experience	Done v0.1 (ES/EN)
62	Register of recommendations and decisions	Board dashboard	Done v0.1 (ES/EN)

H · Templates (per initiative)

Initiative charter · Context and constraints statement · Role assignment record · Opportunity portfolio and screening notes · Ambition classification · Value hypothesis canvas · Baseline · Feasibility assessment · Regulatory classification and impact assessments · Risk matrix and register · Mitigation and contingency plan · Architecture record · Data and model lineage · Governance and human oversight design · Rollback plan · Delivery report · Validation results · *Gate* decision record · Go-live sign-off · Operations manual · Monitoring configuration · Incident response plan · Value realisation tracking · Scale or retirement decision record · Use case sheet.

Format: Markdown as the source, published in PDF and HTML. Templates that require it (for example, registers or calculators) will also be generated in Excel or PowerPoint when expressly requested.

I · Tools

The complete catalogue of tools (22), the design of the initiative register as a managed funnel and the build order are in **document 03 · Tools and initiative register**. The AI board dashboard (T17) and the recommendation register (T18) from the `AI_en_el_consejo` repository already exist, and must be adapted to draw on the register.

J · Framework adoption

No.	Document	Source	Status
90	SEVEN-G implementation guide: Lite and Enterprise, first 90 days	Doc 1, Marco de Esferas	Done v0.1 (ES/EN)
91	Guide for consultants and support models	Engagement Guide	Done v0.1 (ES/EN)
92	Application cases (fictitious and consistent, or anonymised)	Demonstrations	Done v0.1 (ES/EN)
93	Licence, use by third parties and citation	`AI_en_el_consejo` licences	Done v0.1 (ES/EN)

05

Decisions adopted (16-09-2026)

#	Topic	Decision	Rationale
1	**Meaning of the name**	SEVEN-G = *Seven-phase Enterprise Value & Governance*: enabling phase 0, seven value phases and cross-cutting governance. The Strategy-Exploration-Validation-Execution-Navigation-Governance acronym is abandoned.	It is the definition in the foundational document and the only one compatible with the 0–7 phase cycle and its *gates*.
2	**Languages**	**All documents are always generated in Spanish and English.** Spanish is the drafting version; the English version is updated in the same delivery.	Author's decision (16-09-2026) to offer the framework to international companies and boards from the outset.

#	Topic	Decision	Rationale
3	**Format and style**	Markdown sources in `SEVEN-G/mds/es` and `SEVEN-G/mds/en`; output in HTML (`SEVEN-G/html/<idioma>`) and PDF (`SEVEN-G/pdf/<idioma>`) with `SEVEN-G/build/build.ps1`, in a financial-newspaper style with salmon tones. The HTML files include a theme selector, term search, section navigator and language selector. SEVEN-G's own diagrams as reusable components in `build/componentes/`; one-off diagrams in Mermaid. PowerPoint or Excel only when expressly requested.	A single source, two consistent outputs and consistent diagrams across documents.
4	**Legacy materials**	Moved to `SEVEN-G/_legacy/` (git history preserved). They are consulted as a source when rewriting each document, but are not part of the current framework.	Prevents two models of phases, scales and *gate* outcomes from coexisting.
5	**Licence**	Content (documents, templates, criteria, graphic components): **CC BY 4.0** (`LICENCIA_CONTENIDOS.md`). Code (generation scripts): **MIT** (`LICENSE`). Authorship: © 2026 Fernando García Varela, SEVEN-G methodology.	Consistent with `AI_en_el_consejo` and with the publication criterion "does not require hiring the author to use it". A non-commercial (NC) clause would create doubts precisely among user companies. The differentiating value lies in application and support, not in the text.
6	**Relationship with SPAD and AECF**	They remain independent methodologies and are referenced from SEVEN-G: SPAD in document 53 (building solutions with AI, phases 4–5); AECF as a reference for agile governance. They are not presented as parallel brands in SEVEN-G documents.	Reduces brand dispersion: one umbrella (SEVEN-G) and referenced specialised pieces.
7	**Dimensions of the maturity model**	Working proposal, to be validated in document 11: 1) Strategy and governance · 2) Value and portfolio · 3) Data and knowledge · 4) Technology and operations · 5) People and adoption · 6) Risk, security and compliance · 7) Measurement and evidence. 0–5 scale with rubric and evidence per level.	Covers the metrics of the foundational document, the seven dimensions of the old maturity report and the gaps identified (value, security, measurement).

Points to review if the context changes

- If the `AI_CONSULTING` repository becomes public, exclude `mds/_trabajo/`, `html/_trabajo/` and `pdf/_trabajo/` in `.gitignore` before the first public *push*.
- If it is decided to restrict commercial reuse by third parties, the licence can only be tightened for future versions; versions already published under CC BY 4.0 retain that licence.

06

Recommended work order

1. **01 Foundational methodology** (done) and **02 Glossary**: they set the model and vocabulary for everything else.
   - After 02: **wave 1 of tools** (initiative register T01 with inventory, *gate* manager, intensity and ambition, and connection of the board dashboard). See document 03.
2. **10 Sphere map**, **12 Transformation index** and **40 Measurement rules**: they are the most differentiating elements and the ones that connect with the board dashboard.
3. **21 Gate criteria** and **20 Phase manuals**, with their block H templates.
4. **30 Governance model**, **32 Inventory**, **33 Risks**, **34 Regulatory mapping**, **35 Agent security**.
5. **11 Maturity** with questionnaire.
6. Remaining blocks G and E, F and J.
7. Update of the board dashboard to reflect spheres, maturity and the transformation index.

07

Resolution of the analysis (16-09-2026, version 0.2)

Everything set out in this analysis has been resolved with the recommendations detailed below. The new decisions are in `.claude/seveng_decisiones.md` (D19–D27); the common parameters, in `_trabajo/20260916_Especificacion_comun_biblioteca_SEVEN-G.md`; and the cross-document adjustments, in `_trabajo/20260916_Ajustes_de_coherencia_SEVEN-G.md`.

7.1 Inconsistencies

Topic (§2)	Resolution	Where
What SEVEN-G is	*Seven-phase Enterprise Value & Governance* (D02).	00, 01, 02
Number and names of phases	Phases 0–7 with *gates* G0–G5, R6 and G7.	01, 20, 21
***Gate* outcomes**	Proceed / Proceed with conditions / Iterate / Pivot / Stop; G7: Scale / Iterate / Retire; **R6: Proceed with operation / Proceed with conditions / Bring G7 forward** (added to 01 §7.3). Audit: Conformant / Conformant with observations / Nonconformant.	01, 21, 22, 38, P29
Maturity	7 dimensions D1–D7, levels 0–5 with rubric, an 84-question questionnaire and an overall level capped by D1 and D6 (D20).	11

Topic (§2)	Resolution	Where
Risk categories	7 categories plus the GEN, SEG and TER domains (third parties added to 01 §10); 5×5 scale; 70 typical risks.	01, 33
Roles	6 roles and bodies; in SPAD the AI role becomes "AI reviewer" (D23). Segregation of duties reinforced in Lite: the AI Office verifies G3–G5 and the AI Sponsor decides with risk clearance.	01, 30, 53, SPAD
ROI	Sole economic feasibility criterion: NPV ≥ 0 on net profit, with the horizon and rate set in C2; ROI and payback period for information only; formulas F1–F10.	40, 01 §7.6
Spheres 08 and 09	Their own grades (Absent, Basic, Systematic, Advanced); secondary sphere only if the purpose is compliance or governance; separate investment band.	10
Geographical scope	Euros and European and Spanish regulation; other jurisdictions in an indicative annex.	34
Brand names	Single umbrella SEVEN-G; SPAD and AECF as related methodologies; SPAD corrected.	53, SPAD
Language	Always Spanish and English (D12).	Entire library
Unsupported figures	Removed; fictitious examples labelled. SPAD retains its own figures, which the author must review.	Entire library

7.2 Structural gaps

Gap (§3.1)	Resolution	Where
1. Company level	C1–C5 cycle developed: thesis, ambition and appetite, portfolio, maturity, index, board and implementation.	01, 11–14, 60–62, 90
2. Efficiency versus transformation	Ten classification rules, base conditions B1–B3, initial thresholds for the 8 signals (to be calibrated) and detection of "declared but unevidenced transformation"; prioritisation in three groups by ambition, each with its own budget.	12, 14
3. Retirement	10-step procedure, retirement register and template P30; tool T22.	14, P30
4. Lite or Enterprise	Criteria in 01 §9, with the agent criterion clarified (A2/A3 with external effect, D22); template P04; company implementation scope distinct from intensity.	01, P04, 90
5. AI that is not a project	Corporate and acceptable use policy; embedded AI, productivity suites, individual use and *shadow AI*; inventory of the four types of use.	31, 32, 36
6. Adoption and change	Adoption plan, released capacity with five destinations, training and AI literacy, indicators and G5 and G7 criteria.	23, 50, P20

7.3 Thematic gaps

Gap (§3.2)	Resolution
Generative AI and agents	Autonomy A0–A3, controls SEG-01–20 and AG-01–20, checklist LV-AG and [GEN] and [AG] criteria in the *gates* (35, 21, 22, 52).
Security and offensive AI	Document 35, with exposure to attacks that use AI and indicators for the board.
Inventory and regulatory classification	Document 32; templates P05 and P11.
Regulatory mapping	Document 34 verified as at 16-09-2026, including Regulation (EU) 2026/1744 (Annex III postponed to 2-12-2027 and Annex I to 2-08-2028). **Pending cross-check against the Official Journal of the EU and legal review.**
Third parties and providers	Document 36 with levels N1–N3 and 16 key clauses; template P14.
AI costs	Document 42 with nine categories and analytical allocation.
Data and knowledge	Document 51 with DAT and CNC indicators.
People	Document 50 with PER indicators and maximum autonomy in decisions about people.
Indicators per sphere	60 IE indicators in 10 and a catalogue of 156 indicators in 13 families with a correspondence table in 41.
Maturity	Rubric, questionnaire and verified assessment method (11).
Guide for conversations with the board	Document 61 with a 60-minute script and response format.
Application cases	Five fictitious cases consistent with the demonstrations (92).
Use of the framework by third parties	Documents 91 and 93; no official certification in version 0.x (D25).

7.4 Blocks H, I and J

- **H · Templates:** 31 templates P01–P31 aligned with 01 §6.10 (D21), in Spanish and English.
- **I · Tools:** T01 (initiative register with T02–T05 integrated) in `SEVEN-G/herramientas/T01_registro_iniciativas/`. T17 and T18 are adapted in the private project where the engine originates (D26).

- **J · Framework adoption:** documents 90–93 done. `SEVEN-G_IA_for_Hypergrowth.pdf` is not redone (D24).

7.5 Outstanding items for the author

1. Validate the decisions marked "to be validated" (D19, D20, D22, D25) and the initial thresholds marked "to be calibrated" (transformation index, appetite and materiality, prioritisation, traffic-light status, status expiry, consumption alerts, audit sample sizes).
2. Legal review of document 34 and of the regulatory citations in 31, 32, 37 and 50–52, in particular the text of Regulation (EU) 2026/1744 in the Official Journal of the EU, the Spanish transposition of NIS2 and the draft Organic Law on AI.
3. ~~Incorporate into 33 the three typical risks proposed in 50 (information and consultation, labour conflict, wellbeing); assign IND- codes to around 60 provisional indicators in 41, resolve the clash between the CON- (knowledge, 51) and IND-CON (board, 41) prefixes.~~ **Resolved (16-09-2026):** risks RT-ORG-07 (failure to inform and consult), RT-ORG-08 (labour dispute) and RT-ORG-09 (deterioration of wellbeing) added to the catalogue in 33 (70 typical risks) and linked from 50 §12; the 50 provisional codes without an equivalent have an IND- code in 41 §21 (47 new indicators, because IE03.06 and PER-14, IE05.05 and DAT-10, and IE06.02 and CNC-06 share a code), in the EMB, RIE, OPE, ADO, DAT and CLI families and in the new PRO · Processes and decision-making family (catalogue of 156 indicators in 13 families; Lite set unchanged, 26); the knowledge indicators in 51 change from CON- to CNC- in 41, 50, 51, 52, 02 and the common specification (§5.9).
4. ~~SPAD: review the claims involving return and certification figures.~~ **Resolved (16-09-2026):** unsupported figures replaced by objectives to be measured, "certification" by conformity self-assessment, and a legal notice in every file. The PDF `05_SPAD_Skill_Methodology_Seachad.pdf` still needs correcting at source.
5. ~~Adapt T17 and T18.~~ **Resolved without touching the engine (16-09-2026):** connector `SEVEN-G/herramientas/T17_panel_consejo/` with a demo in `ejemplo/salida/`. Pending in the engine's private source project: rename legacy keys (`estimado_cati` , `aap`) and add sphere, maturity, index and funnel blocks (proposal in `PROPUESTA_MOTOR.md` in that folder). **Updated (17-09-2026, D43–D45):** T01 is generated from JSON (`build_registro.ps1`) and is the single data entry point of the dashboard; the engine moves to version 8 and the funnel now reaches the dashboard (stages per phase in `config_panel.json` and status history from the T01 events); schema 0.2 with the optional fields the dashboard needs. Legacy keys and the sphere, maturity and index blocks remain pending.
6. **Legal notice (D33):** included in every document, template, tool, dashboard, demo and SPAD. Publication prepared with `SEVEN-G/build/publicar.ps1` from the `AI_CONSULTING` repository itself with `.github/workflows/pages.yml` , with a home page at the root (D37); before publishing, create the private list of prohibited terms and run the engine source project's verification.
7. Build tool waves 2 and 3 (document 03 §6).
