Legal notice and disclaimer. SEVEN-G is a reference methodological framework provided "as is" and for information purposes only. It does not constitute legal, regulatory, financial or professional advice, nor does it guarantee compliance with any law or standard. References to general regulation (such as the EU AI Act, the GDPR, DORA or NIS2), to technical standards and to regulation specific to each sector or jurisdiction may be incomplete, may not apply to a particular case or may become out of date as a result of regulatory changes, interpretations or supervisory positions after their consultation date. **Each organisation that uses SEVEN-G is solely responsible for identifying the regulation that applies to it, verifying that it is current and certifying its own regulatory compliance**, with the appropriate qualified advice. This methodology is a generic, free aid shared with the community so that nobody has to start from scratch; each person or organisation can and should adapt it to its own use. It must not be inferred that its legally sensitive parts have been reviewed by legal counsel: those reviews, for each company or sector, are the ultimate responsibility of the company, consultant or organisation that uses it. Although every effort is made to keep it up to date, some regulation may have changed without being reflected here. To the fullest extent permitted by law, the author accepts no responsibility whatsoever for the effects of its application in any organisation or for its full applicability. The methodology does not grant certification of any kind. The author accepts no liability for any use made of this content or for any decisions taken on the basis of it. The data, figures, companies and cases in the examples are fictitious or illustrative.

01

What this course is for

The course teaches three things: **what SEVEN-G is**, **how it is used** and **how to find your way around the site** to locate what is needed at each moment. It is designed for anyone arriving for the first time who does not want —or need— to read the whole library.

It follows one rule: **the course defines no rule of the framework**. Each module explains an idea, leads to the document that develops it and proposes an exercise with the tools and the example data, which are fictitious. If the course and a document differ, the document prevails.

> **Why it matters.** A framework is only useful if the organisation understands it in the same way. A few hours of common language between board, management, risk and teams save months of arguments about what each thing means.

02

What each module looks like

Part	What it contains
Objective	What anyone who finishes the module will be able to do.

Part	What it contains
Key ideas	Three or four ideas, without normative detail.
Guided tour	What to open on the site and what to look at on each page.
Exercise	A ten-minute practice with the use case register, the board dashboard or the calculators, always with example data.
Self-check	Four questions. The answers are at the end of the module.

There is no exam, mark or certificate: SEVEN-G has no official certification (document 93, section 7).

Three slide courses, depending on who you are. All three explain what SEVEN-G is, the phases and their gates, what is filled in at each phase, how that fills the use case register's funnel all the way to the board dashboard —with annotated images of the register, the funnel and the dashboard— and two worked examples (one use case that stops and one that reaches production). Each one then adds what is specific to its audience:

Course	Who it is for	PowerPoint	PDF
Company · Self-consulting	A company that wants to implement the framework by its own means: prerequisites, Lite or Enterprise scope, the 90-day plan and common mistakes.	Download	Open
Consultant	Anyone supporting clients under their own name: licence and responsibilities, essential rules, five engagement models, independence and what you can say and promise.	Download	Open
Partner	A company building SEVEN-G into its own methodology or product: what the licence allows and requires, adoption by components, technical integration and how to name it. There is no partner programme and no "official partner" status (document 91, section 6.2).	Download	Open

The presentations may be adapted and delivered with attribution (document 93). The nine modules on this page and the guide are also available as a single PDF to read or print; each module remains available separately, in HTML and PDF.

03

The modules

Module	What is learnt	Documents and tools
01 · Finding your way around the site	Toolbar, search, contents, downloads, language, "The essentials" box and codes.	Library index
02 · What SEVEN-G is and what problem it solves	The problem, the two levels of the framework and its four components.	document 00 · document 04
03 · Spheres and ambition levels	Where AI creates value and with what ambition.	document 10 · SPHERES
04 · Lifecycle, gates and funnel	Phases, gates, possible outcomes and the portfolio as a funnel.	document 01 · document 21 · T01
05 · Governance and risk	Who decides, who verifies and how a risk is accepted.	document 30 · document 33 · T06
06 · Measuring value	Measurement rules, amount statuses and economic criterion.	document 40 · T11
07 · Transformation or efficiency	The transformation index and its profiles.	document 12 · T14
08 · The board	What it receives, what it decides and how decisions are followed up.	document 60 · document 62 · T17
09 · Implementing in layers	Scope, minimum path, 90-day plan and what is mandatory.	document 90 · document 94

04

Paths by profile

Profile	Modules	Indicative time
Board director	01 · 02 · 07 · 08	1.5 hours
Senior management and AI Committee	01 · 02 · 03 · 04 · 06 · 09	2 hours
AI lead or AI Office	All, in order	3 to 4 hours
Risk, compliance and audit	01 · 02 · 04 · 05 · 09	2 hours

Profile	Modules	Indicative time
Use case team	01 · 02 · 04 · 06	1.5 hours
Consultant	All, and then document 91	4 hours

05

Before starting

- Open the **example use case register** (T01) and the **example board dashboard** (T17) in another tab: almost all the exercises use them. The data is fictitious and never leaves the browser.
- Keep the **glossary** (document 02) to hand for terms and codes.
- If you are going to use the course for internal training, you may adapt it: the licence allows it, crediting the author (document 93).

06

Related documents

Document	Relationship
00 · What SEVEN-G is and how it helps companies	Framework overview and navigable usage map.
02 · Glossary and conventions	Terms and codes used in the course.
94 · Obligation matrix and layered reading	Minimum reading by profile.
