Legal notice and disclaimer. SEVEN-G is a reference methodological framework provided "as is" and for information purposes only. It does not constitute legal, regulatory, financial or professional advice, nor does it guarantee compliance with any law or standard. References to general regulation (such as the EU AI Act, the GDPR, DORA or NIS2), to technical standards and to regulation specific to each sector or jurisdiction may be incomplete, may not apply to a particular case or may become out of date as a result of regulatory changes, interpretations or supervisory positions after their consultation date. **Each organisation that uses SEVEN-G is solely responsible for identifying the regulation that applies to it, verifying that it is current and certifying its own regulatory compliance**, with the appropriate qualified advice. This methodology is a generic, free aid shared with the community so that nobody has to start from scratch; each person or organisation can and should adapt it to its own use. It must not be inferred that its legally sensitive parts have been reviewed by legal counsel: those reviews, for each company or sector, are the ultimate responsibility of the company, consultant or organisation that uses it. Although every effort is made to keep it up to date, some regulation may have changed without being reflected here. To the fullest extent permitted by law, the author accepts no responsibility whatsoever for the effects of its application in any organisation or for its full applicability. The methodology does not grant certification of any kind. The author accepts no liability for any use made of this content or for any decisions taken on the basis of it. The data, figures, companies and cases in the examples are fictitious or illustrative.

01

Objective

By the end you will be able to find any document, template or tool, search for a term, download a PDF or a template in Word, change language and recognise the framework's codes.

02

Key ideas

1. **The site is a library, not a book.** Nobody reads it from start to finish: you enter through document 00, through the index or through this course, and move from link to link.
2. **Everything is linked.** When a text cites a document, a template (P) or a tool (T), the citation is a link.
3. **Every page has the same aids**: toolbar at the top, downloads area under the cover and "The essentials" box after the legal notice.

4. **Spanish and English are equivalent**: same content, same structure, same file name.

03

Guided tour

Step	What to do	What to look at
1	Open the library index.	The blocks, from A to K: foundations, strategy and portfolio, lifecycle, governance and risk, measurement, people and operations, board, templates, tools, framework adoption and course.
2	Go into document 00.	The cover (title, version, figures), the **downloads area** —PDF, version in the other language and related tools— and the **"The essentials"** box.
3	Use the top bar.	**Home** (all methodologies), **Library**, **Documents** (list with filter), **History** (where you have been), section **Contents**, **term search** —on this page or across the whole site, as its selector says— with previous and next result, **theme** (salmon, light salmon or night), text size and **language**.
4	Search for the word "funnel" in document 00 with the selector on **"This page"**; then switch the selector to **"Whole site"** and search for the same word.	On this page, the search highlights the matches and jumps from one to the next. Across the whole site, a list opens with every page and section of the site where the term appears and a snippet of the text; when you pick one, you land on that section with the term already highlighted. The selector remembers your choice.
4 bis	Type a code into **"Document finder"**: `P12` , `T06` , `G3.05` , `phase 3` , `C2` , `RT-GEN-01` ...	A list opens with what that code means and, when you pick it, the site takes you to the page and section —or the table row— where it is explained. It is in the bar of every page, on the home page, in the tools and in the board dashboards. Next to it, **"Cited here"** lists the documents, templates, tools and gates that the page or the current view names, each with its link; and inside the tools and the dashboards, every written code is already a link to where it is explained.
5	Scroll down to the **usage map** in document 00.	Every phase, gate, template and tool on the map is a link: it is the quickest way to reach something specific.
6	Open a template, for example P01.	Its downloads also include the **editable template in Word**.
7	Switch to Spanish and back.	You land on the same page in the other language.

04

The codes

Code	What it is	Where it is defined
00 to 94	Documents. The first digit indicates the block.	Index
P01–P74	Templates. P01–P31 are the evidence for each phase; P32–P71, those for the company, board, compliance, third parties, audit and implementation; P72–P74, the NIST profiles and the ISO/IEC 42001 statement of applicability.	Block H
T01–T22	Tools. Those without their own application link to the procedure with which they are applied.	document 03
C1–C5	Stages of the corporate cycle: diagnosis, direction, portfolio, oversight and review.	document 01
Phases 0–7 · G0–G5, R6, G7	Phases of a use case and their decision gates.	document 01
G3.05, LV-G3	A gate criterion and the checklist for that gate.	document 21 · document 22
IA-AAAA-NNN	Identifier of a use case.	document 03
A0–A3 · S1–S4 · N1–N3 · D1–D7	Agent autonomy · incident severity · supplier requirement level · maturity dimensions.	document 02

If in doubt, the glossary (document 02) rules. And there is no need to memorise any of them: the **"Document finder"** control in the bar takes you to where any of them is explained, by typing the code or part of the title.

05

Exercise

Without using the index, get from document 00 to the checklist for gate G3 and download its PDF. Then find the Word template for the value hypothesis canvas. Note how many clicks you needed in each case.

06

Self-check

1. Where can you see which part of a document is mandatory?
2. What is the difference between "Library" and "Documents" in the bar?
3. What editable format do the templates have?
4. Which document prevails if a term is used in two ways?

07

Next step

Module 02 · What SEVEN-G is and what problem it solves · Course guide

Answers. 1) In the "The essentials" box, after the legal notice, and in the matrix of document 94. 2) "Library" opens the full index; "Documents" unfolds the list of documents with a filter without leaving the page. 3) Word (.docx), generated from the same source as the HTML and the PDF. 4) The glossary, document 02.
