TEMPLATE P06 · OPPORTUNITY PORTFOLIO AND SCREENING NOTES

Opportunity portfolio and screening notes

Records the opportunities identified by the business, the non-AI alternatives considered and the reason why each opportunity proceeds, is held or is discarded.

Fernando García Varela Version 0.1 (working draft) 16-09-2026 Draft for review

Legal notice and disclaimer. SEVEN-G is a reference methodological framework provided "as is" and for information purposes only. It does not constitute legal, regulatory, financial or professional advice, nor does it guarantee compliance with any law or standard. References to general regulation (such as the EU AI Act, the GDPR, DORA or NIS2), to technical standards and to regulation specific to each sector or jurisdiction may be incomplete, may not apply to a particular case or may become out of date as a result of regulatory changes, interpretations or supervisory positions after their consultation date. **Each organisation that uses SEVEN-G is solely responsible for identifying the regulation that applies to it, verifying that it is current and certifying its own regulatory compliance**, with the appropriate qualified advice. This methodology is a generic, free aid shared with the community so that nobody has to start from scratch; each person or organisation can and should adapt it to its own use. It must not be inferred that its legally sensitive parts have been reviewed by legal counsel: those reviews, for each company or sector, are the ultimate responsibility of the company, consultant or organisation that uses it. Although every effort is made to keep it up to date, some regulation may have changed without being reflected here. To the fullest extent permitted by law, the author accepts no responsibility whatsoever for the effects of its application in any organisation or for its full applicability. The methodology does not grant certification of any kind. The author accepts no liability for any use made of this content or for any decisions taken on the basis of it. The data, figures, companies and cases in the examples are fictitious or illustrative.

01

Instructions for use

Aspect	Guidance
When it is used	In phase 1 (Opportunity discovery), after G0 and before G1.
Who completes it	The AI Product Owner, with the business area. They consult the technical owner (data and preliminary feasibility) and the risk owner (red lines).
Who verifies it	Lite: AI Office. Enterprise: AI Auditor.
Who decides	Lite: sponsor. Enterprise: sponsor, informing the AI Committee.

Aspect	Guidance
Gate at which it is reviewed	Opportunity. `(G1)`
Tool	T01 · Use case register (opportunities that proceed are linked to the use case).
Lite versus Enterprise	Lite may omit the fields and blocks marked **(Enterprise)**. Screening and non-AI alternatives are mandatory in both.

Completion rules:

- Opportunities start from a **business need**, not from an available technology.
- Every opportunity that proceeds must have compared **non-AI alternatives** (01 §6.3).
- Value in this phase is an **estimated order of magnitude**. Quantification with a formula is done in P08.
- Discarded opportunities are kept with their reason: they are learning for the portfolio.

02

Identification

Field	Content	Guidance
Use case code		IA-AAAA-NNN.
Use case name		
Document version		
Date		DD-MM-AAAA.
Author		Name and role.
Applicable intensity		Lite · Enterprise.

03

Discovery method

Field	Content	Guidance
Scope analysed		Processes, decisions or customer experiences reviewed.
Method		Interviews, workshops, process data analysis, complaints, employee suggestions, other.
Period		Dates of the discovery work.
Participants		Areas and functions that have taken part.
Data sources consulted (Enterprise)		Reports, indicators or samples used for sizing.

04

Screening criteria

Each opportunity is checked against these criteria. A "No" answer in F1, F3 or F6 prevents the opportunity from proceeding.

Code	Criterion	Question	Blocking
F1	Business need	Does it respond to an identifiable business problem or opportunity, with an area that takes ownership of it?	Yes
F2	Strategic fit	Does it fit with the AI thesis and with the ambition approved for the sphere in C2?	No, but it must be justified
F3	Contribution of AI	Does AI provide something that non-AI alternatives do not?	Yes
F4	Plausible value	Does the order of magnitude of the value justify formulating a hypothesis?	No, but it must be justified
F5	Data	Does the necessary data exist, or can it be obtained lawfully and within a reasonable time?	No, but it must be justified
F6	Red lines	Does it respect the red lines in P02, the corporate policy and the practices prohibited by regulation?	Yes

Code	Criterion	Question	Blocking
F7	Capacity	Is there sponsorship and capacity to take it on within the planned timeframe?	No, but it must be justified

05

Opportunity register

5.1 Description

ID	Opportunity	Business need	Process or decision	Area	Proposed sphere	Proposed ambition	Value type
OP-01						Optimise · Augment · Transform	Efficiency · Return · Avoided risk · Compliance
OP-02							
(illustrative example) **OP-01**	Assistant for responding to order queries	Slow response in peak season	Handling of order status queries	Customer service	01 Customer	Optimise	Efficiency
(illustrative example) **OP-02**	Personalised delivery date recommendation	Lost sales due to generic delivery times	Delivery time offered at purchase	E-commerce	02 Product and service	Augment	Return

The sphere uses the list in 03 §3.3. The proposed ambition is justified with P07.

5.2 Screening

ID	F1	F2	F3	F4	F5	F6	F7	Annual value (order of magnitude, estimated)	Result	Reason
OP-01	Yes · No								Proceeds · On reserve · Discarded	

ID	F1	F2	F3	F4	F5	F6	F7	Annual value (order of magnitude, estimated)	Result	Reason
OP-02										
***(illustrative example)* OP-01**	Yes	Yes	Yes	Yes	Yes	Yes	Yes	€50,000–100,000	Proceeds	—
***(illustrative example)* OP-02**	Yes	Yes	Yes	No data	No	Yes	Yes	No data	On reserve	Insufficient data

Possible results:

- **Proceeds**: moves on to formulating the value hypothesis (phase 2).
- **On reserve**: meets the blocking criteria, but a condition is missing (data, capacity, priority). State what must change and when to review it.
- **Discarded**: does not proceed. The reason is taken from the coded list in 03 §3.3: No plausible value · Hypothesis refuted · Insufficient data · Technically unfeasible · Cost exceeds value · Unacceptable risk · Regulation · No adoption · Replaced by another solution · Change in strategic priority.

06

Non-AI alternatives

For each opportunity that proceeds or is placed on reserve.

ID	Alternative	Description	Estimated cost	Estimated value	Why it is or is not sufficient	Decision
	Process redesign · Business rules · Automation without AI · Training · Policy change · Standard non-AI solution · Do nothing					Discarded · Combined with AI · Replaces AI

ID	Alternative	Description	Estimated cost	Estimated value	Why it is or is not sufficient	Decision
(illustrative example) **OP-01**	Automation without AI	Automatic message with the order status extracted from the logistics system.	Low	Resolves simple status queries	Does not resolve queries involving issues or open questions.	Combined with AI: automatic first response and assistant for the rest.
(illustrative example) **OP-01**	Do nothing	Keep the current model with external reinforcement in peak season.	Current cost	—	Rising cost and response times outside target.	Discarded

If a non-AI alternative achieves an equivalent result at lower cost or risk, the opportunity is discarded with the reason "Replaced by another solution".

07

Screening notes

One note for each opportunity that proceeds.

Field	Content	Guidance
Opportunity ID		
Decision summary		Why it proceeds, in three to five lines.
What AI contributes		What the alternatives do not achieve.
Main assumptions		Facts taken as true when estimating the value.
Uncertainties that phase 2 must resolve		Specific questions for the value hypothesis and the baseline.
Data required		Sources, availability and known constraints.
Preliminary risks		Risks worth anticipating for phase 3.
Proposed sphere and ambition		Reference to P07 ("Proposed" column).

08

Prioritisation (Enterprise)

When several opportunities proceed and there is not capacity for all of them.

ID	Value (order of magnitude)	Investment (order of magnitude)	Complexity	Preliminary risk	Strategic fit	Priority	Justification
			Low · Medium · High	Low · Medium · High	Low · Medium · High	1, 2, 3…	

In this phase prioritisation is qualitative. The additional net value per additional euro invested (rule 9) is calculated once P08 and P10 exist.

09

Quality criteria

The formal G1 criteria are in document 21 (see criteria G1.xx).

#	Check	Status
1	Each opportunity arises from a business need with a responsible area.	Met · Not met · Not applicable · Pending
2	All opportunities have a screening result.	
3	Discarded opportunities have a coded reason.	
4	Those that proceed have compared at least one non-AI alternative, in addition to "do nothing".	
5	Those that proceed have a screening note with uncertainties for phase 2.	
6	Proposed sphere and ambition use the taxonomy and are consistent with P07.	
7	Amounts are presented as an estimated order of magnitude and "no data" is shown as such.	

10

Approval and verification

Function	Role in SEVEN-G	Name and position	Date	Signature or reference
Prepares	AI Product Owner			
Verifies	AI Office (Lite) · AI Auditor (Enterprise)			
Decides	AI Sponsor (in Enterprise, informing the AI Committee)			

Segregation of duties: the verifier has not taken part in the screening. The decision is recorded in P29.
