TEMPLATE P44 · AI USE AND PERCEPTION SURVEY

AI use and perception survey

Two questionnaires with a declared scale: the annual AI use survey, which brings to light unauthorised use and unmet needs, and the pulse survey, which measures how the people affected perceive a system.

Fernando García Varela Version 0.1 (working draft) 19-09-2026 Draft for review

Legal notice and disclaimer. SEVEN-G is a reference methodological framework provided "as is" and for information purposes only. It does not constitute legal, regulatory, financial or professional advice, nor does it guarantee compliance with any law or standard. References to general regulation (such as the EU AI Act, the GDPR, DORA or NIS2), to technical standards and to regulation specific to each sector or jurisdiction may be incomplete, may not apply to a particular case or may become out of date as a result of regulatory changes, interpretations or supervisory positions after their consultation date. **Each organisation that uses SEVEN-G is solely responsible for identifying the regulation that applies to it, verifying that it is current and certifying its own regulatory compliance**, with the appropriate qualified advice. This methodology is a generic, free aid shared with the community so that nobody has to start from scratch; each person or organisation can and should adapt it to its own use. It must not be inferred that its legally sensitive parts have been reviewed by legal counsel: those reviews, for each company or sector, are the ultimate responsibility of the company, consultant or organisation that uses it. Although every effort is made to keep it up to date, some regulation may have changed without being reflected here. To the fullest extent permitted by law, the author accepts no responsibility whatsoever for the effects of its application in any organisation or for its full applicability. The methodology does not grant certification of any kind. The author accepts no liability for any use made of this content or for any decisions taken on the basis of it. The data, figures, companies and cases in the examples are fictitious or illustrative.

Why it matters. Technical logs show which tools are used, but not why or with what information; the annual use survey is the source that brings to light the needs that drive unauthorised use (31 §5.2). A system, for its part, may have high usage and low acceptance: the perception of the people affected is the early warning of rejection, oversight overload or loss of autonomy (23 §10.3; 50 §9). Without a stable questionnaire, with a declared scale and a calculation fixed in advance, the figures are not comparable between measurements and support no decision.

01

Instructions for use

Aspect	Guidance
When it is used	**Annual use survey** (section 4): once a year, with results available for the annual review in C5. **Pulse survey** (section 5): in phase 5 (pilot), three months into production and at each Enterprise R6 (50 §9.2).
Who completes it	Annual: all employees and collaborators with access to company resources; the AI Office designs and analyses it. Pulse: the groups affected by the system (users, designated overseers and managers); the AI Product Owner prepares and analyses it with the people function.
Who verifies it	Annual: AI Auditor or internal audit, by sampling (document 38). Pulse: AI Office in Lite; AI Auditor in Enterprise, as part of P20.

Aspect	Guidance
Who decides or approves	Annual: the AI Committee receives the results and approves the actions (catalogue, training, regularisation). Pulse: the AI Sponsor approves the action plan; the *gate* body assesses the results at G5, R6 and G7.
Stage, *gate* or moment	Annual: C4 (T21 monitor) and C5. Pulse: G5, R6 and G7 of the use case.
Tool	Annual: T21 · Corporate AI use monitor. Pulse: T20 · Adoption and capacity plan.
Reference document	Annual: 31 §5.2 to §5.5; 32 §9. Pulse: 23 §10; 50 §9 to §11; 41 (IND-ADO-15).
Lite versus Enterprise	Annual: mandatory in both implementation scopes (90 §2.1). Pulse: mandatory in Enterprise (23 §13.2); in Lite it should be applied in phase 5 and at three months when the system changes the work of a group.

Completion rules:

- **Anonymity.** Responses are not linked to identified persons. The survey tool does not store identifiers or network addresses, or separates them from the responses before analysis.
- **Minimum group size.** The company sets a minimum size (50 §11); no result is broken down for a group with fewer valid responses and, if it is not reached, it is reported as *no data* (measurement rule 8).
- **Limited purpose.** The results are not used to evaluate or sanction people (23 §10.1, rule 3; 50 §9.2). What is declared in the use survey does not open individual proceedings.
- **Prior information.** Participants are informed of the purpose, of the voluntary and anonymous nature of the survey and of the processing of the data in accordance with the GDPR ; where appropriate, workers' representatives are informed (P46).
- **Stable questionnaire.** The questions and the scale are not changed between measurements in the same series; a change opens a new series and is indicated in the report.

02

Identification

Field	Content	Guidance
Survey type		Annual use · Perception pulse.
Perimeter or use case		Company or perimeter (annual survey); code IA-AAAA-NNN and systems SIA-AAAA-NNN (pulse).

Field	Content	Guidance
Moment		Year (annual); phase 5 · three months · R6 (pulse).
Response period		DD-MM-AAAA to DD-MM-AAAA.
Target population		Number of people and groups.
Sample		Census or random; size and selection method.
Valid responses and response rate		Valid responses ÷ people invited.
Minimum group size		Set by the company.
Questionnaire version		
Owner		AI Office (annual); AI Product Owner (pulse).

03

Declared scale and common calculation

All closed rating questions use the same scale and are worded positively so that *favourable* always means the same:

Value	Label	Treatment
1	Strongly disagree	Unfavourable
2	Disagree	Unfavourable
3	Neither agree nor disagree	Neutral
4	Agree	Favourable
5	Strongly agree	Favourable
—	Don't know or not applicable	Not a valid response

Valid responses = responses with a value from 1 to 5. **Percentage favourable** = responses 4 or 5 ÷ valid responses. The mean may be reported as complementary data, never instead of the percentage favourable.

04

Annual AI use survey

4.1 Questionnaire

#	Question	Response type
U1	In the last 12 months, have you used any AI tool for your work?	Yes · No (if No, go to U10)
U2	Which tools have you used?	Catalogue list (P43) plus "Others: please specify"
U3	With which account?	Corporate · Personal · Both · Don't know
U4	How often?	Daily · Weekly · Monthly · Occasionally
U5	For which tasks?	Drafting · Summarising · Data analysis · Code · Translation · Customer service · Other
U6	What type of information have you entered?	[Public] · [Internal] · [Confidential] · [Restricted] · Personal data · None of these · Prefer not to answer
U7	Have you installed extensions or enabled AI functions in work software?	Yes · No · Don't know
U8	Do you use any tool that acts on your behalf (sends emails, fills in forms, executes actions)?	Yes · No
U9	Which need in your work is not met by the authorised tools?	Free text
U10	I know which AI tools I may use and with what information.	Scale 1–5
U11	I know how to report an error or an incident related to AI.	Scale 1–5
U12	The training I have received enables me to use AI safely.	Scale 1–5
U13	Area and group	Closed list, for aggregation only

4.2 Calculation of results

Result	Formula	Threshold
Declared use of AI	Yes responses to U1 ÷ valid responses	Informative
Use outside the catalogue	People who cite in U2 any tool that is not authorised or not catalogued, or *Personal* in U3 ÷ people with Yes in U1	To be set by the company
Exposure of sensitive information	People with use outside the catalogue who mark [Confidential], [Restricted] or personal data in U6 ÷ people with use outside the catalogue	To be set by the company
Declared personal agents	Yes responses to U8 ÷ people with Yes in U1	Informative
Knowledge of the policy	Percentage favourable in U10, U11 and U12, separately	To be set by the company
Unmet needs	List of U9 needs grouped by topic and number of mentions	—

4.3 Treatment

Finding	Treatment
Uncatalogued tool cited	Registration in T02 as unauthorised use, by tool and scope, without identifying people (31 §5.3; 32 §2.1), and regularisation (31 §5.5).
Recurrent unmet need	Assessment as a request (P43, section 4) or as an opportunity in the use case register (T01).
Low knowledge of the policy or of the channel	Reinforcement of F1 training (P45) and of communication.
Unauthorised personal agents	Review of authorisation by autonomy level (31 §4.7).

05

Perception pulse survey

5.1 Dimensions

Document 23 (indicator 8) measures **usefulness, workload and trust**; document 50 and the catalogue (PER-15, IND-ADO-15) measure **support, workload and autonomy**. This template measures the **five**

dimensions with two questions each, so that both indicators are calculated from the same questionnaire.

#	Dimension	Question	Scale
P1	Usefulness	The system helps me do my work better.	1–5
P2	Usefulness	The system saves me time on the tasks it is intended for.	1–5
P3	Trust	I trust the system's outputs in the cases it is intended for.	1–5
P4	Trust	I know in which cases I should not rely on the system's output.	1–5
P5	Support	I have received the training needed to use or oversee the system.	1–5
P6	Support	I know whom to turn to when I have a question or a problem with the system.	1–5
P7	Workload	My workload since I started using the system is reasonable.	1–5
P8	Workload	The volume of reviews I am asked to carry out allows me to review carefully.	1–5
P9	Autonomy	I can depart from the system's proposal when I consider it necessary.	1–5
Feasibility assessment (P10)	Autonomy	My professional judgement continues to be taken into account in decisions.	1–5
Regulatory classification and impact assessments (P11)	Open	What would you change about the system or its use?	Free text
Risk matrix and register (P12)	Open	Are you concerned about anything regarding the system's effect on your work?	Free text
Mitigation and contingency plan (P13)	Context	Group and function (user · overseer · manager)	Closed list, for aggregation only

P4 and P9 guard against automation bias: high trust with a low P4 is a signal of overconfidence, not of success.

5.2 Calculation

Result	Formula	Use
Percentage favourable by dimension	Responses 4–5 to the two questions of the dimension ÷ valid responses to those questions	Main reading.
PER-15 · IND-ADO-15	Favourable responses to P5 to P10 (support, workload and autonomy) ÷ valid responses to P5 to P10	Documents 41 and 50; R6.
Indicator 8 of document 23	Favourable responses to P1 to P4, P7 and P8 (usefulness, trust and workload) ÷ valid responses to those questions	G5 in Augment (23 §11.2).
Overall perception	Favourable responses to P1 to P10 ÷ valid responses to P1 to P10	Summary for the AI Committee.
Change	Current result − result of the previous measurement, in percentage points	Trend.

Thresholds. Documents 50 and 41 set as the reference the **trend, with action if it worsens**; there is no common minimum value. The minimum threshold and the fall that triggers action are set in P20 in phase 4, before measuring (23 §10.4): **to be set by the company**.

5.3 Results

Dimension	Valid responses	Favourable	% favourable	Previous measurement	Change	Triggers action?
Usefulness						
Trust						
Support						
Workload						
Autonomy						
***(illustrative example)* Workload**	38	17	45 %	71 %	−26	Yes

5.4 Action plan

Finding	Reading (23 §10.3)	Action	Owner	Date	Linked risk (P12)
(illustrative example) **Fall in workload with stable use**	Compulsory use without acceptance; possible oversight overload	Review the volume of reviews per person in P17 and reinforce support	AI Product Owner	30-11-2026	RT-ORG-09

The aggregated results are communicated to the groups that responded, together with the actions decided (50 §10.1).

06

Quality criteria

#	Check	Status
1	The questionnaire, the scale and the calculation were fixed before the survey was opened and have not been changed within the series.	Met · Not met · Not applicable · Pending
2	Participants were informed and anonymity was guaranteed; no result is broken down below the minimum group size.	
3	The results distinguish valid, favourable and *no data* responses.	
4	Detected uncatalogued uses have been registered in T02 and have a regularisation under way (31 §5.3).	
5	The pulse has been carried out at the moments in 50 §9.2 and is presented at G5 and R6 (criteria G5.08 and R6.14 of document 21).	
6	Each dimension that triggers action has an owner and a date, and the organisational risks are in P12.	

07

Approval and verification

Function	Role in SEVEN-G	Name and position	Date	Signature or reference
Designs and analyses the annual survey	AI Office			
Designs and analyses the pulse	AI Product Owner, with the people function			
Data protection clearance	Second line			
Verifies	AI Office (Lite) · AI Auditor (Enterprise) or internal audit			
Approves the actions	AI Committee (annual) · AI Sponsor (pulse)			

Segregation of duties: whoever analyses the pulse does not verify its results, and no one with responsibility for the performance of the respondents has access to non-aggregated responses.

08

Version control

Completed document

Version	Date	Author	Changes

Template

Version	Date	Changes
0.1	19-09-2026	First version. Annual use survey (31 §5.2) and pulse survey (23 §10.2; 50 §9–10) with a common five-point scale. The pulse measures five dimensions (usefulness, trust, support, workload and autonomy) in order to calculate indicator 8 of document 23 and PER-15 · IND-ADO-15 from the same questionnaire.
