Legal notice and disclaimer. SEVEN-G is a reference methodological framework provided "as is" and for information purposes only. It does not constitute legal, regulatory, financial or professional advice, nor does it guarantee compliance with any law or standard. References to general regulation (such as the EU AI Act, the GDPR, DORA or NIS2), to technical standards and to regulation specific to each sector or jurisdiction may be incomplete, may not apply to a particular case or may become out of date as a result of regulatory changes, interpretations or supervisory positions after their consultation date. **Each organisation that uses SEVEN-G is solely responsible for identifying the regulation that applies to it, verifying that it is current and certifying its own regulatory compliance**, with the appropriate qualified advice. This methodology is a generic, free aid shared with the community so that nobody has to start from scratch; each person or organisation can and should adapt it to its own use. It must not be inferred that its legally sensitive parts have been reviewed by legal counsel: those reviews, for each company or sector, are the ultimate responsibility of the company, consultant or organisation that uses it. Although every effort is made to keep it up to date, some regulation may have changed without being reflected here. To the fullest extent permitted by law, the author accepts no responsibility whatsoever for the effects of its application in any organisation or for its full applicability. The methodology does not grant certification of any kind. The author accepts no liability for any use made of this content or for any decisions taken on the basis of it. The data, figures, companies and cases in the examples are fictitious or illustrative.

> **Why it matters.** Without capable people there is no real human oversight, verification of outputs or detection of misuse (31 §6.1). The plan sets who must be trained, in what and when; the record shows that it has happened. Three controls depend on it: no one receives AI licences without F1, no one oversees a system in production without F3 and no one takes up a use case role without F4 (31 §6.3). Without a record per person, the company cannot show at G5 that the overseers are trained (G5.14) or give the board the actual coverage.

Instructions for use

Aspect	Guidance
When it is used	The plan is approved each year in C2 together with the policy (31 §6.3) and reviewed in C5. The record is living: it is updated with each training action, each assignment of a licence, oversight role or use case role, and each expiry.
Who completes it	The AI Office with the people function prepares the plan and maintains the record. The AI Product Owner provides the specific training for each use case (P20, section 5).
Who verifies it	AI Auditor or internal audit, by sampling (document 38); at each *gate*, the verifier checks the training of the people in that use case.
Who decides or approves	The annual plan is approved by the AI Committee within the direction approved in C2; the budget, in the *adoption and training* cost category (document 42).
Stage, *gate* or moment	C2 (plan), C4 (monitoring in the T21 monitor and in the board dashboard), C5 (review). In the use case: G0 (F4 of the roles), G5 (F3 of the overseers and user training, G5.14 and G5.19) and R6 (validity).
Tool	T20 · Adoption and capacity plan (training record). The indicators are shown in T21 and the record is linked to P03 for the roles (31 §6.3).
Reference document	31 §6; 50 §5; 23 §8; 34 §3.5; 41 (IND-ADO-05, IND-ADO-10); 90 §9.
Lite versus Enterprise	The plan and the record are mandatory in both implementation scopes (90 §2.1). In a Lite scope, the fields marked **(Enterprise)** may be omitted; the F3 condition for oversight is not simplified.

Completion rules:

- **Common profiles.** The nine profiles F1–F9 of 31 §6.2 are used; section 4 gives their correspondence with profiles PER-PA to PER-PF of 50 §5.2. A person may hold several profiles.
- **Indicative durations.** Those in 31 §6.2 are a starting point and are adjusted to the size of the company and the actual use of AI.
- **Effectiveness, not just attendance.** Each mandatory action has an assessment or practical exercise and an expiry date.
- **Data protection.** The record contains employees' personal data: access is restricted to the AI Office, the people function and the verifier; indicators are presented in aggregate.

03

Literacy obligation

Article 4 of the AI Act has applied since 2-2-2025. Under the wording of Regulation (EU) 2026/1744 (in force since 27-07-2026) it requires providers and deployers **to take measures to support the development of AI literacy** among their staff and other persons operating or using AI systems on their

behalf, taking into account their knowledge, experience, training and context of use, without setting a specific level (31 §6.1; 34 §3.5). For high-risk systems, Article 26(2) requires human oversight to be assigned to persons who have the necessary competence, training and authority (34 §3.9).

Regardless of that minimum, **SEVEN-G requires** a programme by profile with a record of participation and an assessment of effectiveness (31 §6.1). The policy and the plan are the evidence of the measures taken (50 §5.1). This template does not constitute legal advice; the validity of these references is checked against document 34.

Programme effectiveness and review

Field	Content	Guidance
Assessment results by profile		Pass rate and questions with the most errors.
Signals from other sources		Detections of unauthorised use (T21), results of the annual survey (P44, questions U10 to U12), verifications of outputs by sampling.
Content changes decided		Due to changes in regulation, tools or incidents (31 §6.3).
Suppliers and collaborators (Enterprise)		Contracts that require training equivalent to the profile (31 §6.3).

Quality criteria

#	Check	Status
1	There is an approved literacy programme with target audiences, content and timetable (question D5.03 of document 11).	Met · Not met · Not applicable · Pending
2	All staff who use or oversee AI systems have training appropriate to their function, with a record (question D5.05).	
3	People with SEVEN-G roles have F4 or a plan to obtain it before G0 (question D5.06; 31 §8).	

#	Check	Status
4	No designated overseer acts without recorded F3 (criterion G5.14 of document 21; 50 §5.3).	
5	The users of each system are trained before access (criterion G5.19 of document 21).	
6	Each mandatory training has an assessment and an expiry date, and expired training generates an alert.	
7	The indicators are calculated on the obligated group defined in section 2.
