TEMPLATE P60 · AUDIT REPORT AND FINDING RECORDS

Audit report and finding records

Communicates the outcome of an AI audit with an opinion, scope, limitations, classified findings, recommendations and the management response, in a format that management and the board can read and follow up.

Fernando García Varela Version 0.1 (working draft) 19-09-2026 Draft for review

Legal notice and disclaimer. SEVEN-G is a reference methodological framework provided "as is" and for information purposes only. It does not constitute legal, regulatory, financial or professional advice, nor does it guarantee compliance with any law or standard. References to general regulation (such as the EU AI Act, the GDPR, DORA or NIS2), to technical standards and to regulation specific to each sector or jurisdiction may be incomplete, may not apply to a particular case or may become out of date as a result of regulatory changes, interpretations or supervisory positions after their consultation date. **Each organisation that uses SEVEN-G is solely responsible for identifying the regulation that applies to it, verifying that it is current and certifying its own regulatory compliance**, with the appropriate qualified advice. This methodology is a generic, free aid shared with the community so that nobody has to start from scratch; each person or organisation can and should adapt it to its own use. It must not be inferred that its legally sensitive parts have been reviewed by legal counsel: those reviews, for each company or sector, are the ultimate responsibility of the company, consultant or organisation that uses it. Although every effort is made to keep it up to date, some regulation may have changed without being reflected here. To the fullest extent permitted by law, the author accepts no responsibility whatsoever for the effects of its application in any organisation or for its full applicability. The methodology does not grant certification of any kind. The author accepts no liability for any use made of this content or for any decisions taken on the basis of it. The data, figures, companies and cases in the examples are fictitious or illustrative.

Why it matters. The report is what reaches those who decide: the *gate* body, the AI Committee, the board committee or the board. If it does not separate facts, criterion, cause and effect, the finding is debated instead of corrected; if it does not declare its limitations, a Conformant conclusion appears to give more assurance than it does. Finding records turn each breach into an action with an owner and a time limit, and link to the nonconformity register so that nothing is lost.

01

Instructions for use

Aspect	Guidance
When it is used	At the end of the fieldwork of any AI audit: continuity, framework, thematic, supplier, value and post-*gate* audits. For the verification of a *gate*, the abridged version integrated into P29 and T03 is used (section 3.1).
Who completes it	The lead auditor drafts it; the responsible management completes section 11 (management response).
Who verifies it	The head of AI audit reviews the draft against the working papers (P59).
Who decides or approves	The lead auditor issues the opinion. The actions are approved by the body corresponding to the class of finding (30 §8.2: AI Office for minor, AI Committee for major, AI Committee and board committee for critical).
Stage, *gate* or moment	According to the annual plan (P58). The framework audit and the value audit feed into C5. Indicative time limits (38 §6.1): draft within 10 working days after closing, management response within 10 and final within 5.
Tool	T08 (registration of each nonconformity with NC-AAAA-NNN and a link to its originating audit) · T03 and T01 (verification and audit outcome) · T12 (value audit).
Reference document	Document 38 §8–§10; document 21 §10.2, §10.5–§10.7; document 43 §12; document 37.
Lite versus Enterprise	The report structure does not change. In Lite, documentary verification of minor actions may be carried out by the AI Office (38 §10).

Completion rules:

- The audit is identified with **AUD-AAAA-NNN** and each finding with **H-01, H-02...** within the report (38 §9). Every nonconformity is also recorded in T08 with **NC-AAAA-NNN**.
- Classification follows the **most serious effect** on the decision, people or compliance, and the aggregation and recurrence rules in 38 §8.1 and 21 §10.5 are applied.
- The audit outcome **is not the *gate* decision**: the auditor does not recommend whether the use case should proceed on the basis of its business value.
- Every critical nonconformity is communicated **before the report**, as soon as it is confirmed (30, E-5).
- The recommendation states **what** must be corrected, not how to design it in detail: the auditor does not design the controls they later audit.

02

Identification

Field	Content	Guidance
Audit code		AUD-AAAA-NNN.
Type		Continuity · Framework · Thematic · Supplier · Value · Post-*gate* · Re-audit.
Subject matter		SIA-AAAA-NNN, IA-AAAA-NNN, supplier, process or theme.
Period audited		
Dates of the work		Opening, closing, draft and final report.
Lead auditor and experts		With reference to their declarations of independence (P41).
Recipients		According to section 13.
Report version		Draft · Final.

03

Summary for management

Field	Content	Guidance
Outcome		**Conformant** (no nonconformities) · **Conformant with observations** (minor only) · **Nonconformant** (at least one major or critical).
Findings by class		Critical · major · minor · observations.
Three key messages		In non-technical language.
Risk to the company if no action is taken		Decision, people, compliance or value affected.
Express warning		If a minor nonconformity affects critical security, legal compliance or human oversight controls, Proceed with conditions is not admissible (01 §7.3; 38 §8.2).

3.1 Abridged version for the verification of a *gate*

It is recorded in P29 and T03 (38 §9.1): verification outcome, criteria Not met or Pending, findings and limitations. With a Nonconformant outcome, the request returns to the team **without a decision** (21 §10.2).

04

Objective, scope and criteria

Field	Content	Guidance
Objective		
What was audited		Systems, versions, use cases, *gates*, processes, period.
What was not audited		And why.
Criteria applied		G*n.nn* and R6.*nn* codes in document 21, LV checklists in document 22, EV rules, framework documents and applicable standards (for example, the AI Act or the GDPR depending on the system's classification).

05

Limitations

Limitation	Type	Effect on the conclusion
	Information not available · Access denied · Test not performed · Time limit · Dependence on the auditee for technical evidence	None · Conclusion qualified for the area · Unable to conclude on the area

06

Methodology

Field	Content	Guidance
Techniques used		38 §7.1.
Populations, samples and selection method		Summary of the record in P59 §7.4.
Technical tests and version of the system tested		38 §7.3.
Work of others relied on		Report, author, date and assessment of their independence and competence.

07

Summary of findings

7.1 By classification

Class	Number	Codes	Containment (38 §8.1)	Action plan	Reported to
Critical nonconformity			Immediate, within 48 hours at most, including shutdown if necessary	Within 10 days at most	AI Committee and board committee
Major nonconformity			Within 10 days at most	Within 30 days at most	AI Committee
Minor nonconformity			Not required	Before the next *gate* or review	AI Office
Observation			—	Management decides whether to act	—

The time limits are for reference; the company may adjust them in C2 without exceeding those set by regulation.

7.2 Outcome per audited item

Mandatory in post-*gate* audits and in thematic audits covering several systems (21 §10.7).

Item (use case, *gate*, system or supplier)	Outcome	Findings
	Conformant · Conformant with observations · Nonconformant	

08

Finding records

One record per finding (38 §9.2).

Field	Content	Guidance
Code		H-NN; NC-AAAA-NNN in T08 if it is a nonconformity.
Title		Brief, descriptive phrase.
Condition		What has been found, with facts and figures.
Criterion		Requirement not met, with its exact reference.
Cause		Preliminary analysis; the full root cause is dealt with under document 37.
Effect		Decision affected, risk, compliance or value.
Evidence		AUD-AAAA-NNN/PT-NN references in P59.
Classification		Observation · Minor · major · critical nonconformity, with the rule applied if it is aggregated or reclassified.
Recommendation		What should be corrected.
Management action		Action, owner and time limit.

(illustrative example) **H-02 · Doubtful answers without human review on the night shift.** Condition: 1 of 29 answers flagged as doubtful in the period was not reviewed; the night shift had no designated supervisor for three weeks. Criterion: oversight defined in P17 and the corresponding R6 criterion in document 21. Cause: the supervisor's absence did not trigger a replacement. Effect: answers to

customers without the review approved at G5. Evidence: PT-05. Classification: minor nonconformity; it affects human oversight, so it is not admissible as a condition for continuity. Recommendation: ensure oversight coverage on all shifts. Action: designation of deputies and an alert for shifts without a supervisor, AI Operations Owner, 30 days.

8.1 Variant: value audit (43 §12)

Additional fields in the record:

Field	Content	Guidance
Use case and amount code		IA-AAAA-NNN; value line in T12.
Test in 43 §12.3 affected		Formula and sources · Baseline and attribution · Status and validity · Materialisation · Exclusivity · Full cost · Presentation.
Amount and status presented		Validated · declared · estimated.
Correct amount and status according to the audit		
Does it affect figures already presented to the board?		Yes · No. If Yes, the AI Office presents at the next meeting the corrected figure alongside the one presented, with the explanation.
Minimum treatment (43 §12.4)		Error with no impact on decisions: minor · Amount presented as validated without validation or with expired validation: major · Double counting or released capacity added to the net with an impact on decisions: major · Deliberate alteration of figures or stop criteria: at least major and communication to the board committee.

8.2 Variant: post-*gate* audit (21 §10.7)

Field	Content	Guidance
Use case, *gate* and iteration		IA-AAAA-NNN · G*n* · iteration.
Decision audited and date		Outcome recorded in P29.
Criterion or rule affected		G*n.nn*, R6.*nn* code or EV rule.

Field	Content	Guidance
Does it invalidate the decision?		Yes · No. Any finding that invalidates a *gate* decision is, at a minimum, a major nonconformity (21 §10.5).
Effect on the *gate* (21 §10.6)		Critical: *gate* invalidated · Major that invalidates: the use case returns to Awaiting gate and is verified again; if it is in production, the AI Committee decides whether to maintain operation with containment · Minor: the decision stands.
Owner		

09

Observations and recommendations

No.	Observation	Recommendation	Management decision (acts · does not act)

10

Follow-up of previous findings

Audit and finding	Class	Committed action	Time limit	Status	Comment
				Corrected · Corrected without demonstrated effectiveness · Within time limit · Overdue · Risk accepted	

11

Management response

Finding	Action	Owner	Time limit	Agrees with the finding? (Yes · No)	If No, management's position and the auditor's position
H-01					
H-02					

Accepting the risk instead of correcting is only possible if the body with a sufficient level (30 §7.2) expressly accepts it and the breach is not a legal one; the finding is closed as "risk accepted", not as "corrected" (38 §10).

12

Conclusion

Field	Content	Guidance
Auditor's opinion		Conclusion on the subject matter and the period, consistent with the findings and the limitations. In post-*gate* audits, a conclusion on how the gates operated during the period.
Outcome		Conformant · Conformant with observations · Nonconformant.
Consequence		Closure of the audit file · Follow-up of actions · Action plan and re-audit; at R6, bring G7 forward if it affects the system's controls.
Open nonconformities in T08		NC-AAAA-NNN codes.

13

Distribution and annexes

Type of audit	Recipients (38 §9.3)
Continuity	Sponsor, operations owner, AI Risk Owner; AI Committee if the outcome is Nonconformant.
Framework	AI Committee, board committee; summary to the board in C5.
Thematic	AI Committee, board committee, owners of the systems affected.
Supplier	Owner of the supplier relationship, second line; AI Committee if it is N3.
Value	AI Committee and board committee; it feeds into C5 (43 §12).

Annexes: evidence reviewed, samples, results of technical tests and declarations of independence (P41).

14

Quality criteria

#	Check	Status
1	Each finding has a condition, criterion, cause, effect, evidence and classification, and refers to a working paper.	Met · Not met · Not applicable · Pending
2	Classification applies the most serious effect and the aggregation, recurrence and reclassification rules.	
3	The outcome is consistent with the findings: no major or critical finding with a Conformant or Conformant with observations outcome.	
4	Limitations are declared with their effect on the conclusion.	
5	Each nonconformity is recorded in T08 with an NC-AAAA-NNN code linked to the audit.	
6	The management response has an action, owner and time limit per finding, and disagreements show both positions.	
7	Critical nonconformities were communicated before the report.	
8	In the value audit, corrected figures that affect the board have a presentation date.	

15

Approval and verification

Function	Role in SEVEN-G	Name and position	Date	Signature or reference
Issues the opinion	AI Auditor (lead auditor)			
Reviews quality	Head of AI audit			
Responds and commits to actions	Management responsible for the subject matter audited			
Approves the actions	AI Office · AI Committee · Board committee, according to the class			

Segregation of duties: whoever responds on behalf of management does not modify the opinion or the classification; if they disagree, their position appears alongside the auditor's.

16

Version control

Completed document

Version	Date	Author	Changes

Template

Version	Date	Changes
