TEMPLATE P05 · AI SYSTEM INVENTORY RECORD

AI system inventory record

Registers and keeps up to date each AI system in the company's inventory, with its type of use, classification, regulatory role and owners.

Fernando García Varela Version 0.1 (working draft) 16-09-2026 Draft for review

Legal notice and disclaimer. SEVEN-G is a reference methodological framework provided "as is" and for information purposes only. It does not constitute legal, regulatory, financial or professional advice, nor does it guarantee compliance with any law or standard. References to general regulation (such as the EU AI Act, the GDPR, DORA or NIS2), to technical standards and to regulation specific to each sector or jurisdiction may be incomplete, may not apply to a particular case or may become out of date as a result of regulatory changes, interpretations or supervisory positions after their consultation date. **Each organisation that uses SEVEN-G is solely responsible for identifying the regulation that applies to it, verifying that it is current and certifying its own regulatory compliance**, with the appropriate qualified advice. This methodology is a generic, free aid shared with the community so that nobody has to start from scratch; each person or organisation can and should adapt it to its own use. It must not be inferred that its legally sensitive parts have been reviewed by legal counsel: those reviews, for each company or sector, are the ultimate responsibility of the company, consultant or organisation that uses it. Although every effort is made to keep it up to date, some regulation may have changed without being reflected here. To the fullest extent permitted by law, the author accepts no responsibility whatsoever for the effects of its application in any organisation or for its full applicability. The methodology does not grant certification of any kind. The author accepts no liability for any use made of this content or for any decisions taken on the basis of it. The data, figures, companies and cases in the examples are fictitious or illustrative.

01

Instructions for use

Aspect	Guidance
When it is used	In phase 0 the planned system is registered. It is completed in phases 3 to 5, updated at each R6 and at each relevant change, and closed on retirement. It is also used in C1 to inventory existing systems, corporate use of general-purpose AI and detected unauthorised uses.
Who completes it	The AI Product Owner (or the head of the user area for corporate use). The AI Office maintains the inventory.

Aspect	Guidance
Who verifies it	Lite: AI Office. Enterprise: AI Auditor.
Who decides	It is not a decision: it is a record. Registration is mandatory evidence for G0.
Gate at which it is reviewed	G0 (registration), G3 (full classification), G5 (production data), R6 (currency) and G7 (retirement).
Tool	T02 · AI system inventory (module of T01). Detailed structure in document 32.
Lite versus Enterprise	Lite may omit the fields marked **(Enterprise)**. The controlled taxonomy tags are mandatory in both.

Completion rules:

- **One record per AI system.** An initiative may have several systems and a system may serve several initiatives.
- The classification fields use the controlled taxonomy of 03 §3.3 **verbatim**.
- "No data" is not zero: anything not yet known is marked "no data" with the phase in which it will be completed.

02

Record identification

Field	Content	Guidance
System code		Persistent code assigned by the inventory in accordance with document 32.
System name		Functional name, not the commercial name of the product.
Linked initiatives		IA-AAAA-NNN codes. Empty only for corporate use or unauthorised use.
Record version		
Inventory registration date		DD-MM-AAAA.
Last update date		DD-MM-AAAA.
Author of the last update		Name and role.

03

Description

Field	Content	Guidance
Understandable description		What it does and what it is used for, in language for non-specialists (rule 10).
Intended purpose		Specific use for which the system is designed or acquired, with its limits. It is the basis of the regulatory classification.
Unintended or excluded uses		Uses that must not be made of the system.
User area		
Users		Profiles and approximate number.
System status		Planned · In construction or integration · In pilot · In production · Suspended · Retired. Proposed list, to be confirmed in document 32.
Initiative phase and status		Phase 0–7 and status (03 §3.2): Registered · In phase · Awaiting gate · On hold · In production · Awaiting G7 · Stopped · Retired.
Go-live date		

04

Type of use and classification

Field	Content	Guidance
Type of AI use		AI initiative · Third-party AI embedded in processes · Corporate use of general-purpose AI · Unauthorised use (01 §1.2).
Primary sphere		01 Customer · 02 Product and service · 03 People · 04 Operations · 05 Data · 06 Knowledge · 07 Decision · 08 Regulation, ethics and accountability · 09 AI governance
Secondary sphere		Same list or "none".
Ambition level		Optimise · Augment · Transform.
Intensity		Lite · Enterprise (P04).

Field	Content	Guidance
Technology		Predictive ML · Generative AI · Agent · Language and document processing · Vision · Optimisation · Embedded third-party AI · Rules (not AI). More than one may be marked.
Exposure		Internal · Employees · Customers indirectly · Customers or external persons directly.
Autonomy level		A0 Assistance · A1 Recommendation · A2 Supervised action · A3 Autonomous action.
Regulatory classification		Prohibited · High risk · Transparency obligations · Minimal risk · Out of scope · Pending classification (P11).
Value type		Efficiency · Return · Avoided risk · Compliance.

If the technology is "Rules (not AI)", the reason is documented and it is assessed whether it should remain in the inventory.

05

Company role under the EU AI Act

Mark all the roles that apply. The final determination is validated in P11 with legal judgement. *This document does not constitute legal advice.*

Role	Does it apply?	Justification	Guidance
Provider	Yes · No		Develops the system, or has it developed, and places it on the market or puts it into service under its own name or trademark, including for its own use.
Deployer	Yes · No		Uses an AI system under its authority in the course of a professional activity.
Importer	Yes · No		Places on the Union market a system bearing the name or trademark of a person established outside the Union.
Distributor	Yes · No		Makes the system available on the market without being the provider or the importer.
Authorised representative (Enterprise)	Yes · No		Mandate from a provider established outside the Union.
Product manufacturer (Enterprise)	Yes · No		Integrates the system into its own product subject to harmonisation legislation.

Field	Content	Guidance
Possible change of role to provider		Yes · No. Check whether the company puts its name or trademark on it, substantially modifies the system or changes its intended purpose.
Underlying general-purpose AI model		Yes · No. If yes, provider, model and version.
Registration in the EU database (Enterprise)		Yes · No · Not applicable. Only for the systems and roles that require it according to P11.

06

Data

Field	Content	Guidance
Data sources		Source systems or suppliers.
Personal data		Yes · No. Categories of data subjects.
Special categories		Yes · No. Which.
Critical confidential information		Yes · No.
Reference to the record of processing activities		Processing activity into which it is integrated.
Processing location		Country or region of hosting and processing.
International transfers		Yes · No. Destination and safeguard.
Use of data by the supplier for training		Prohibited by contract · Permitted with conditions · No data.
Log retention (Enterprise)		Which inputs, outputs and logs are retained and for how long.

07

Suppliers and components

Supplier	Service or component	Requirement level	Contract	Assessment
		N1 Standard · N2 Enhanced · N3 Critical	Reference and expiry	P14 and date
(illustrative example) **Supplier X**	Language model via API	N2 Enhanced	CT-0000, expires 30-06-2028	P14 of 10-11-2026, Conformant with observations

08

Owners

Role	Person and position
AI Product Owner	
AI Technical Owner	
AI Operations Owner	
AI Risk Owner	
Business owner of the system **(Enterprise)**	

For corporate use of general-purpose AI, at least the service owner and the risk owner are stated.

09

Compliance and control

Field	Content	Guidance
Validated regulatory classification		Date of P11 and person with legal judgement who validates it.
Data protection impact assessment		Carried out (date) · Not required (reason) · Pending.

Field	Content	Guidance
Fundamental rights impact assessment		Carried out (date) · Not required (reason) · Pending.
Transparency obligations implemented		What information is provided and where.
Human oversight		Summary and reference to P17.
Main residual risk level		Low · Medium · High · Critical (P12).
Open nonconformities		NC-AAAA-NNN codes.
Incidents in the last 12 months (Enterprise)		INC-AAAA-NNN codes and severity S1–S4.
Last and next continuity review		R6 dates.

10

Unauthorised use

Complete only if the type of use is "Unauthorised use".

Field	Content	Guidance
Date and means of detection		Technical controls, audit, internal report.
Tool and users		Tool used, areas and approximate number of users.
Data that may have been exposed		Type of data entered.
Associated nonconformity		NC-AAAA-NNN.
Regularisation decision		Authorisation · Replacement · Blocking.
Closure date		

11

Retirement

Field	Content	Guidance
Retirement date		
Reason		No plausible value · Hypothesis refuted · Insufficient data · Technically unfeasible · Cost exceeds value · Unacceptable risk · Regulation · No adoption · Replaced by another solution · Change in strategic priority.
Replacement		System or process that replaces it.
Treatment of data and models		Deletion, retention or transfer. Reference to P30.

12

Quality criteria

The formal criteria are in document 21 (see criteria G0.xx and R6.xx) and the inventory details in document 32.

#	Check	Status
1	There is a record for each system in the initiative.	Met · Not met · Not applicable · Pending
2	The tags use the controlled taxonomy verbatim.	
3	The intended purpose is specific and has limits.	
4	The regulatory role is justified and consistent with P11.	
5	Personal data, special categories and transfers are identified.	
6	Suppliers have a requirement level and a linked assessment.	
7	Assigned owners are consistent with P03.	
8	The last update date is later than the last relevant change.	

13

Approval and verification

Function	Role in SEVEN-G	Name and position	Date	Signature or reference
Prepares	AI Product Owner			
Records in the inventory	AI Office			
Verifies	AI Office (Lite) · AI Auditor (Enterprise)			

Segregation of duties: if the AI Office has prepared the record, the AI Auditor or the risk owner verifies it.

14

Version control

Completed document

Version	Date	Author	Changes

Template

Version	Date	Changes
0.1	16-09-2026	First version. Fields consistent with 03 §3.3 and §4, the four types of use in 01 §1.2 and the roles under the EU AI Act.
