TEMPLATE P28 · VALUE REALISATION TRACKING

Value realisation tracking

Measures, period by period, the value that the initiative in production actually delivers, with the formula and status of each amount, and compares it with the approved hypothesis.

Fernando García Varela Version 0.1 (working draft) 16-09-2026 Draft for review

Legal notice and disclaimer. SEVEN-G is a reference methodological framework provided "as is" and for information purposes only. It does not constitute legal, regulatory, financial or professional advice, nor does it guarantee compliance with any law or standard. References to general regulation (such as the EU AI Act, the GDPR, DORA or NIS2), to technical standards and to regulation specific to each sector or jurisdiction may be incomplete, may not apply to a particular case or may become out of date as a result of regulatory changes, interpretations or supervisory positions after their consultation date. **Each organisation that uses SEVEN-G is solely responsible for identifying the regulation that applies to it, verifying that it is current and certifying its own regulatory compliance**, with the appropriate qualified advice. This methodology is a generic, free aid shared with the community so that nobody has to start from scratch; each person or organisation can and should adapt it to its own use. It must not be inferred that its legally sensitive parts have been reviewed by legal counsel: those reviews, for each company or sector, are the ultimate responsibility of the company, consultant or organisation that uses it. Although every effort is made to keep it up to date, some regulation may have changed without being reflected here. To the fullest extent permitted by law, the author accepts no responsibility whatsoever for the effects of its application in any organisation or for its full applicability. The methodology does not grant certification of any kind. The author accepts no liability for any use made of this content or for any decisions taken on the basis of it. The data, figures, companies and cases in the examples are fictitious or illustrative.

01

Instructions for use

Aspect	Guidance
When it is used	From go-live (phase 6) until the G7 decision. It is updated at the set frequency (monthly or quarterly) and always before each R6 and before G7.
Who completes it	AI Product Owner.

Aspect	Guidance
Who validates the amounts	Management control or audit for the *validated* status; the responsible area for *declared*; the committee, the board or the assessment team for *estimated* (01 §11).
Who verifies it	AI Office at Lite intensity; AI Auditor at Enterprise intensity.
At which *gate* it is reviewed	R6 and G7. It feeds the board dashboard (T17) and the portfolio (document 14).
Lite versus Enterprise	Lite may omit the fields marked **(Enterprise)**.
Tool	T12 Value realisation tracking.
Relationship	P08 Value hypothesis canvas · P09 Baseline · P20 Adoption and capacity plan · P22 Pilot results · P30 Scale or retire decision · P31 Use case record · P62 Benefits realisation plan (curve, owners, enablers; reference for the expected value per period) · documents 40, 42 and 43.

Applicable measurement rules (00 §6):

- **Rule 1.** Every amount has a **formula** (units × unit value) and is **incremental** against the baseline or the control group.
- **Rule 2.** Every amount has a **status**: validated, declared or estimated. The validated proportion is always reported.
- **Rule 3. Released capacity is not counted** as savings until it is realised or explicitly reassigned; it is reported separately (block 6).
- **Rule 5. Each euro is attributed to a single use case**; allocations are declared (block 8).
- **Rule 6. Efficiencies, return and recurring cost** are kept separate. **Annual net value = efficiencies + return − recurring cost.**
- **Rule 7.** Every magnitude is translated into money, or it is stated that it could not be quantified.
- **Rule 8. "No data" is not zero.**

02

Identification

Field	Content	Guidance
Initiative code		IA-AAAA-NNN (T01).
Initiative name		

Field	Content	Guidance
Ambition level		Optimise · Augment · Transform (confirmed in phase 2).
Intensity		Lite · Enterprise.
Go-live date		
Tracking frequency		Monthly · Quarterly.
Reported period		For example, Q3-2026.
Document version		
Author		Role and name.
Date		DD-MM-YYYY.
Document status		Draft · Submitted for verification · Verified · Approved · Superseded.

03

Reference to the approved hypothesis

It is copied from P08 and P09 and is not modified during tracking. If the hypothesis changes, this is a Pivot or a new decision of the competent body.

Field	Content	Guidance
Main metric and baseline		Value and measurement date (P09).
Target and success threshold		
Attribution method		Control group · Before and after · Other, justified.
Expected annual value: efficiencies (€)		
Expected annual value: return (€)		
Expected annual recurring cost (€)		
Expected annual net value (€)		Efficiencies + return − recurring cost.
Approved investment (€)		

Field	Content	Guidance
Timeframe set in C2		
Stop criteria		Those approved in phase 2.

04

Value by period

One row per item and period. **Type:** Efficiencies · Return · Recurring cost. **Status:** Validated · Declared · Estimated.

Period	Item	Type	Formula	Units	Unit value (€)	Amount (€)	Status	Who validates, declares or estimates	Evider
Q3-2026 ***(illustrative example)***	Reduction in outsourcing of document review	Efficiencies	Documents not outsourced × cost per document	6,000	2.50	15,000	Validated	Management control (external supplier invoices)	Q3 cos report
Q3-2026 ***(illustrative example)***	Attributable retained customers	Return	Additional customers retained against control group × annual margin per customer ÷ 4	40	180	7,200	Declared	Sales management	Q3 retenti analysi
Q3-2026 ***(illustrative example)***	Model consumption, licences and operation	Recurring cost	Invoices for the period + operating hours × cost per hour	—	—	9,400	Validated	Management control	Q3 cos report

05

Summary for the period and cumulative

Amounts in euros. The net value in the example is 15,000 + 7,200 − 9,400 = €12,800 for the quarter *(illustrative example)*.

Magnitude	Validated	Declared	Estimated	Total for the period	Year to date	Expected for the same period	Variance
Efficiencies							
Return							
Recurring cost							
Net value = efficiencies + return − recurring cost							

Indicator	Value	Guidance
Proportion of validated value		(Validated efficiencies + validated return) ÷ (total efficiencies + return).
Annualised net value		State the annualisation method and mark it as estimated.
Cumulative investment made (€)		
Additional net value per additional euro invested (Enterprise)		Only if an extension is proposed: expected additional annual net value ÷ additional investment required. Without investment, hypothesis and timeframe it is not a data point (rule 4).

06

Released capacity (separate, not counted)

Destination: Realised as lower cost · Explicitly reassigned · Destination pending.

Period	Group or activity	Hours released	Formula	Status of the hours (Validated · Declared · Estimated)	Destination	Destination activity or reduced budget line	Realised amount (€)	Evidence
Q3-2026 ***(illustrative example)***	Internal case handlers	900	3,600 cases × 15 min saved ÷ 60	Declared	Explicitly reassigned	Review of high-value contracts, previously not reviewed	— (reassignment, not savings)	Minutes o the area's managem

Only the amount **realised** as lower actual cost may be carried over to block 4 as an efficiency, and only once. Reassigned capacity is reported here and valued by what the new activity produces, if measured.

07

Non-additive value

Type	Description	Translated into money? (Yes · No)	Formula and amount, if translated	Status
Risk avoided				
Compliance				

If it is not translated into money with a formula, it is not counted in block 5 and is marked "not quantified".

08

Attribution and allocation (Enterprise)

Shared outcome	Other use cases or initiatives that contribute	Declared allocation (%)	Allocation criterion	Approved by

09

Missing data

Magnitude	Reason why there is no data	Since when	Action to obtain it	Owner

10

Stop criteria and reading by ambition

Stop criterion (phase 2)	Threshold	Value in the period	Triggered? (Yes · No)

Level	What will be required at G7 (01 §7.6)	Situation in the period
Optimise	Realised savings, not merely released capacity.	
Augment	Sustained performance and reassigned capacity.	
Transform	Measured return and verified change in the operating model or the offering.	

11

Conclusion for the period

Field	Content	Guidance
Assessment		In line with the hypothesis · Below, within the approved tolerance · Relevant deviation.
Is it proposed to bring G7 forward?		Yes · No. A relevant deviation at R6 brings G7 forward (01 §6.8).
Explanation		Causes of the deviation and actions.

12

Quality criteria

Formal R6 and G7 criteria in document 21; rules in document 40.

#	Check	Status (Met · Not met · Not applicable · Pending)
1	Every amount has a formula, type, status and evidence.	
2	Validated amounts have been validated by management control or audit.	
3	Net value is calculated as efficiencies + return − recurring cost.	
4	Released capacity is shown separately and only what has been realised is counted, once.	
5	Missing data are shown as missing, not as zero.	
6	The reference hypothesis has not been modified without a decision of the competent body.	
7	The proportion of validated value is reported.	

13

Approval and verification

Function	Role	Name	Date	Signature or reference
Author	AI Product Owner			
Validation of amounts	Management control			
Verifier	AI Office (Lite) · AI Auditor (Enterprise)			
Review	R6 or G7 decision-maker (recorded in P29)			

Segregation of duties: whoever declares an amount does not validate it; the verifier is not part of the team that builds.

14

Version control

Version	Date	Changes
0.1	16-09-2026	First version of the template.
