TEMPLATE P34 · MATURITY QUESTIONNAIRE AND REPORT

Maturity questionnaire and report

Records the evidence-based answers to the 84 questions of the maturity model, calculates the level by dimension and the overall level with the rule in document 11 and structures the report for the board.

Fernando García Varela Version 0.1 (working draft) 19-09-2026 Draft for review

Legal notice and disclaimer. SEVEN-G is a reference methodological framework provided "as is" and for information purposes only. It does not constitute legal, regulatory, financial or professional advice, nor does it guarantee compliance with any law or standard. References to general regulation (such as the EU AI Act, the GDPR, DORA or NIS2), to technical standards and to regulation specific to each sector or jurisdiction may be incomplete, may not apply to a particular case or may become out of date as a result of regulatory changes, interpretations or supervisory positions after their consultation date. **Each organisation that uses SEVEN-G is solely responsible for identifying the regulation that applies to it, verifying that it is current and certifying its own regulatory compliance**, with the appropriate qualified advice. This methodology is a generic, free aid shared with the community so that nobody has to start from scratch; each person or organisation can and should adapt it to its own use. It must not be inferred that its legally sensitive parts have been reviewed by legal counsel: those reviews, for each company or sector, are the ultimate responsibility of the company, consultant or organisation that uses it. Although every effort is made to keep it up to date, some regulation may have changed without being reflected here. To the fullest extent permitted by law, the author accepts no responsibility whatsoever for the effects of its application in any organisation or for its full applicability. The methodology does not grant certification of any kind. The author accepts no liability for any use made of this content or for any decisions taken on the basis of it. The data, figures, companies and cases in the examples are fictitious or illustrative.

Why it matters. The maturity assessment is a mandatory output of C1 and is repeated in C5 to check progress: with it, the board sets the thesis, the ambition and the risk appetite on a verified basis rather than on impressions. Without an answer sheet with evidence and verification, the level becomes a statement, the assessments of two years are not comparable and the company cannot substantiate the ten questions that support the SEVEN-G declaration of application (01 §14).

01

Instructions for use

Aspect	Guidance
When it is used	In **C1 · Diagnosis** (baseline) and in **C5 · Review** (comparison), as a verified assessment. Between cycles, the AI Office may update it as a self-assessment, with no level value (11 §7.1). Also before an independent assessment or before publicly declaring that SEVEN-G is applied.
Who completes it	The lead assessor (head of the AI Office or external assessor) with the assessment team of at least two people. Nobody assesses a dimension whose practices they lead; if the AI Office leads D1, D2 or D7 practices, those dimensions are assessed by another member of the team or by a third party (11 §4.2).
Who verifies it	The independent verifier (internal audit, AI Auditor or third party), with the scope in 11 §4.6. The verifier may modify answers and records the change.

Aspect	Guidance
Who decides or approves	The promoter (chair of the AI Committee) approves the scope, cut-off date and team. The AI Committee approves the report and presents it to the board or its board committee; it does not modify answers and may only request a new verification.
Stage of the corporate cycle	C1 and C5. The result is published in the board dashboard (T17) and the actions that the board asks to be tracked are added to the register of recommendations (T18).
Tool	T15 · Maturity assessment: questionnaire of 84 questions with evidence and verification, calculation in 11 §5 with the D1 and D6 cap, comparison between assessments, interview guide, printable report with the seven sections in 11 §6 and JSON and CSV export of the answers. This template is its paper or spreadsheet equivalent.
Reference document	Document 11 (maturity model): dimensions and levels (§2), text of each question and required evidence (§3), method (§4), calculation (§5), report (§6), links (§7) and targets by ambition (§8).
Lite versus Enterprise	The questionnaire and the calculation are the same. Indicative duration: three to four weeks for a Lite scope and six to eight for Enterprise (11 §4.3). With an Enterprise scope, an independent assessment should also be carried out at least every two years (11 §4.1).

Completion rules:

- The text of each question and the required evidence are in document 11 §3; this sheet records the code, the level and the markers. Questions are not reworded: the questionnaire version is recorded in section 2 and only assessments with the same version are compared.
- Possible answers (11 §4.5): **Yes**, **Partial**, **No, no evidence**, **No, contrary evidence** and **Not applicable** (only for questions marked *if applicable*, with verified justification). **Partial counts as not met.**
- An **unanswered question is left blank and counts as "no data"**: it is never treated as met or replaced by an estimate. If the only thing preventing a higher level is blank questions, the level of the dimension is "no data" and the minimum level reached is reported.
- Only evidence that exists and is applied on the **cut-off date** counts. An interview is an indication, not evidence: a "Yes" requires triangulation (11 §4.4).
- Questions marked **§14** substantiate the declaration of application; all of them are at level 3.

02

Identification of the assessment

Field	Content	Guidance
Company and assessed scope		Whole company or declared scope (units, countries, systems).
Assessment identifier		Proposed format EM-YYYY-MM (month of the cut-off date).
Assessment type		Self-assessment · Verified assessment · Independent assessment (11 §4.1).
Point in the cycle		C5 · Update between cycles. `(C1)`
Cut-off date		DD-MM-YYYY. It delimits the admissible evidence.
Questionnaire version		0.1 as long as document 11 does not change questions or levels.
Promoter		Chair of the AI Committee.
Lead assessor and team		Name, position and dimensions assessed by each person.
Independent verifier		Internal audit, AI Auditor or third party.
Dimension weights		Equal by default; if the company set others in C2, they are declared. None below 10 % or above 25 % (11 §2.3).
Previous assessment used for comparison		Identifier, cut-off date and questionnaire version.
Limitations		Access not granted, evidence not available, changes of scope.

03

Answer sheet

One row per question. **Answer**: Yes · Partial · No, no evidence · No, contrary evidence · Not applicable · blank (no data). **Evidence**: traceable reference or link (document, record or system, with author, date and version); for "Not applicable", the justification. **Verification**: Not verified · Conformant · Modified (record the original answer in the verifier note).

3.1 Strategy and governance (D1)

Code	Level	Marker	Answer	Evidence	Verification	Verifier note
D1.01	1					
D1.02	1					
D1.03	2					
D1.04	2					
D1.05	3	§14				
D1.06	3					
D1.07	3	§14				
D1.08	3	§14				
D1.09	4					
D1.10	4

D7.08	3					
D7.09	4					
D7.10	4					
D7.11	5					
D7.12	5					

04

Interviews and samples

4.1 Interviews by role

At least two interviews per dimension, with people from different functions; 45–60 minute script (11 §4.4). Answers are anonymised by role.

Role interviewed	Dimensions	Date	Evidence located
(illustrative example) **Data Protection Officer**	D3, D6	08-06-2026	Register of impact assessments; sample of P11.

4.2 Samples

Minimum size (11 §4.6): population of 1–5, all; 6–20, 5; 21–60, 8; more than 60, 12. The sample is stratified and is selected by the assessment team, not by the assessed area.

Questions	Population	Minimum size	Size	Selection and stratification
(illustrative example) **D1.08, D2.05, D2.06, D2.08**	22 active initiatives	8	8	Two Enterprise, three in production, two Augment, one third-party and one generative AI.

4.3 Independent verification

Minimum scope (11 §4.6)	Reviewed	Result
All "Yes" answers in D1 and D6		Met · Not met
All §14 questions		Met · Not met
At least 25 % of the other "Yes" answers	%	Met · Not met

05

Calculation

5.1 Level by dimension

Level = N, the highest level for which all questions at levels 1 to N are "Yes" or "Not applicable" (11 §5.1). **Progress** to the next level = (Yes + 0.5 × Partial) ÷ applicable questions at level N + 1, as a percentage (11 §5.2). **Blocking criteria**: questions at levels 1 to N + 1 that are neither "Yes" nor "Not applicable". **Criteria met in advance**: questions at levels above N that are "Yes"; they do not raise the level.

Dimension	Pending L1	L2	L3	L4	L5	No data	Level	Progress	Blocking criteria	Criteria met in advance
Strategy and governance (D1)										
Value and portfolio (D2)										

Dimension	Pending L1	L2	L3	L4	L5	No data	Level	Progress	Blocking criteria	Criteria met in advance
Data and knowledge (D3)										
Technology and operations (D4)										
People and adoption (D5)										
Risk, security and compliance (D6)										
Measurement and evidence (D7)										

"Pending Ln" is the number of questions at level n that are neither "Yes" nor "Not applicable".

5.2 Spreadsheet formulas

With the answer sheet in columns (B = level, D = answer) and a named range per dimension (for example, `lev_D1` and `ans_D1`):

- Pending at level n: `=COUNTIFS(lev_D1,n)-COUNTIFS(lev_D1,n,ans_D1,"Yes")-COUNTIFS(lev_D1,n,ans_D1,"Not applicable")`.
- Dimension level, with the pending counts in P1 to P5: `=IF(P1>0,0,IF(P2>0,1,IF(P3>0,2,IF(P4>0,3,IF(P5>0,4,5)))))`. If all the pending questions at the next level are blank, record "no data" and the level obtained as the minimum.
- Progress, with the level in N: `=(COUNTIFS(lev_D1,N+1,ans_D1,"Yes")+0.5*COUNTIFS(lev_D1,N+1,ans_D1,"Partial"))/(COUNTIF(lev_D1,N+1)-COUNTIFS(lev_D1,N+1,ans_D1,"Not applicable"))`.
- Overall level, with the levels in `levels`, the weights in `weights` and the D1 and D6 levels in `lD1` and `lD6`: `=MIN(ROUNDDOWN(ROUND(SUMPRODUCT(weights,levels)/SUM(weights),2),0),MIN(lD1,lD6)+1)`.

5.3 Overall level

Dimension	Weight	Level
Strategy and governance (D1)		

Dimension	Weight	Level
Value and portfolio (D2)		
Data and knowledge (D3)		
Technology and operations (D4)		
People and adoption (D5)		
Risk, security and compliance (D6)		
Measurement and evidence (D7)		

Step (11 §5.3)	Result	Guidance
1. Weighted average		Σ (weight × level) ÷ Σ weights, to two decimal places.
2. Rounding down		To the lower whole number.
3. Cap		min (D1 level, D6 level) + 1.
4. Overall level		min (step 2, step 3).
Has the cap been applied?		Yes, because of D1 · Yes, because of D6 · No.
(illustrative example, 11 §9)	3.00 → 3; cap min (3, 1) + 1 = 2	Overall level 2, with the cap applied because of D6.

06

Maturity report

Structure in 11 §6. T15 generates it from the answer sheet; on paper it is completed with these blocks.

6.1 Summary for the board (one page maximum)

Field	Content	Guidance
Overall level and level by dimension		Table in section 5.3 with the progress of each dimension.
D1 or D6 cap		Whether it has been applied and because of which dimension.

Field	Content	Guidance
Three key messages	1. 2. 3.	Overall result; strengths; main gap with its blocking criteria.
Status of the declaration of application		Possible only if the ten §14 questions are "Yes" in a verified assessment (11 §7.3).

6.2 Scope and method

Field	Content	Guidance
Scope, assessment type and cut-off date		From section 2.
Questionnaire version and weights		
Team and verifier		With the dimensions assessed by each person.
Interviews by role and sample sizes		Summary of section 4.
Limitations		

6.3 Results by dimension

Dimension	Level	Progress	Blocking criteria	Criteria met in advance	Strengths and gaps, with reference to the evidence
Strategy and governance (D1)					
Value and portfolio (D2)					
Data and knowledge (D3)					
Technology and operations (D4)					
People and adoption (D5)					
Risk, security and compliance (D6)					
Measurement and evidence (D7)					

6.4 Cross-reading

Field	Content	Guidance
Transformation index profile		Result of document 12 (T14) at the same cut-off date, if available.
Applicable reading		Situations in 11 §7.2: maturity 3 or higher with efficiency at scale; transformation under way with D7 below 2; Transform bets with D1 or D6 below 2 (escalated to the board); high maturity with scattered exploration.
§14 questions		D1.05, D1.07, D1.08, D2.05, D2.06, D4.07, D6.05, D6.07, D7.05 and D7.06, with their answer.

6.5 Comparison

Dimension	Previous assessment	This assessment	Change	Questions whose answer changes

Only if the previous assessment is verified and has the same questionnaire version or a correspondence table. If the weights do not match, the comparison of the overall level is not like-for-like.

6.6 Targets and improvement plan

Dimension	Current level	Target set in C2	Horizon
			12 · 24 months

The reference targets by ambition are in 11 §8; level 5 is not a default target.

Code	Dimension	Action	Owner	Deadline	Closure criterion	Tracked in T18
AM-YYYY-NN						Yes · No
***(illustrative example)* AM-2026-01**	D6	Complete the inventory with third-party systems and corporate use of general-purpose AI, with a completeness statement by area.	AI Risk Owner	31-10-2026	D6.03 and D6.05 verified as "Yes".	Yes

6.7 Annexes

- Complete answer sheet (section 3), with evidence.
- Samples and interviews by role (section 4).
- Verifier adjustments: question, original answer, final answer and reason.

07

Quality criteria

#	Check	Status
1	Each "Yes" has valid evidence: it exists, is traceable, approved and current, shows application and predates the cut-off date (11 §4.5).	Met · Not met · Not applicable · Pending
2	No blank question has been counted as met or estimated: it is shown as no data.	
3	"Not applicable" only for questions marked *if applicable* and with verified justification.	
4	Each dimension has at least two interviews from different functions and nobody has assessed a dimension whose practices they lead.	
5	The samples have the minimum size, are stratified and were selected by the assessment team.	
6	The verifier reviewed all "Yes" answers in D1 and D6, all §14 questions and at least 25 % of the other "Yes" answers.	
7	Level by dimension and overall level calculated with the rule in 11 §5; the report states whether the D1 or D6 cap was applied.	
8	The weights are declared, between 10 % and 25 %, and match those of the assessment used for comparison.	
9	The comparison only uses verified assessments with the same questionnaire version.	
Sphere map and ambition levels `(10)`	Each improvement action has an owner, a deadline and a closure criterion; those requested by the board are in T18.	

08

Approval and verification

Function	Role in SEVEN-G	Name and position	Date	Signature or reference
Approves scope, cut-off date and team	Promoter (chair of the AI Committee)			
Leads the assessment and drafts the report	Lead assessor (AI Office or external assessor)			
Verifies	Independent verifier (internal audit, AI Auditor or third party)			
Approves the report	AI Committee			
Receives the report	Board or its board committee			

Segregation of duties: whoever is accountable for a dimension does not assess it; the verifier has not taken part in the assessment being verified; the AI Committee approves the report but does not modify answers.

09

Version control
