

TEMPLATE P29 · GATE DECISION RECORD

# Gate decision record

Provides an auditable record of each gate decision: evidence, status of each criterion, degree of compliance, outcome, conditions, reason, and who verified and who decided.

## 01

# Instructions for use

| Aspect           | Guidance                                                                                                                                                                                                                              |
|------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| When it is used  | At all the gates of the lifecycle: G0, G1, G2, G3, G4, G5, the R6 continuity review and G7. One record for each iteration of the same <i>gate</i> .                                                                                   |
| Who completes it | The team submits the evidence (block 3); the verifier completes blocks 4 to 7; the decision-maker, blocks 8 to 11; block 12 is reviewed by the AI Auditor (at Lite, by sampling, 01 §9.3). The AI Office keeps custody of the record. |

| Aspect                                 | Guidance                                                                                                                                                                                                                                            |
|----------------------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Who verifies it and who decides</b> | As per 01 §7.5 (table in block 13).                                                                                                                                                                                                                 |
| <b>Lite versus Enterprise</b>          | Lite may omit the fields marked <b>(Enterprise)</b> . At Lite, G0, G1 and G2 may be resolved in a single session, as may G4 and G5; one decision is recorded per <i>gate</i> even if the session is shared, and each piece of evidence is verified. |
| <b>Tool</b>                            | T03 <i>Gate</i> manager (module of T01). The statuses and the calculation of the degree of compliance follow 03 §3.4.                                                                                                                               |
| <b>Relationship</b>                    | Document 21 (criteria <code>G&lt;n&gt;.&lt;nn&gt;</code> and <code>R6.&lt;nn&gt;</code> ) · document 22 (LV checklists) · P04 Intensity · P07 Ambition · P23 Go-live sign-off · P28 Value tracking · P30 Scale or retirement decision.              |

Decision rules (01 §7.4):

- 1. Nobody decides on their own work.** Whoever provides evidence neither verifies it nor decides.
- 2. No mandatory evidence, no decision.**
- 3. Evidence must exist before the *gate*.** Documentation prepared after the fact to justify progress already made invalidates the *gate* and is a major nonconformity.
- 4. Conditions have a deadline and an owner.** An expired condition that has not been fulfilled turns the outcome into Iterate.
- 5. Iteration limit.** After two iterations at the same *gate*, the decision is escalated to the higher body.
- 6. Stop criteria are set in advance** and are not relaxed without the approval of the body that authorised the initiative.
- 7. Every decision is recorded** with outcome, reason, conditions, decision-maker and verifier.

## 02

# Identification

| Field                  | Content                                                                                                                                  | Guidance |
|------------------------|------------------------------------------------------------------------------------------------------------------------------------------|----------|
| <b>Initiative code</b> | IA-AAAA-NNN (T01).                                                                                                                       |          |
| <b>Initiative name</b> |                                                                                                                                          |          |
| <b>Gate</b>            | G0 Authorisation · G1 Opportunity · G2 Hypothesis · G3 Feasibility · G4 Design · G5 Go-live · R6 Continuity review · G7 Scale or retire. |          |
| <b>Iteration</b>       | 1, 2, 3... If it is the 3rd or later, the decision falls to the higher body (rule 5).                                                    |          |

| Field                            | Content                                                                                                                              | Guidance |
|----------------------------------|--------------------------------------------------------------------------------------------------------------------------------------|----------|
| <b>Grouped session (Lite)</b>    | No · G0–G2 · G4–G5.                                                                                                                  |          |
| <b>Intensity</b>                 | Lite · Enterprise (P04).                                                                                                             |          |
| <b>Ambition level</b>            | Optimise · Augment · Transform (P07).                                                                                                |          |
| <b>Regulatory classification</b> | Prohibited · High risk · Transparency obligations · Minimal risk · Out of scope · Pending classification.                            |          |
| <b>Request date</b>              | Date on which the team submits the evidence.                                                                                         |          |
| <b>Verification date</b>         |                                                                                                                                      |          |
| <b>Decision date</b>             |                                                                                                                                      |          |
| <b>Days to decision</b>          | Working days between request and decision. Indicative reference time limit: 5 (Lite) · 10 (Enterprise), as approved in C2 (03 §3.6). |          |
| <b>Record version</b>            |                                                                                                                                      |          |

## 03

# Evidence submitted

The mandatory evidence for each phase is set out in 01 §6.10.

| Evidence                                                            | Template | Version | Date of the evidence | Link                | Prior to the request? (Yes · No) | Verified (Yes · No) | Verifier's observations                                           |
|---------------------------------------------------------------------|----------|---------|----------------------|---------------------|----------------------------------|---------------------|-------------------------------------------------------------------|
| <b>Value hypothesis canvas</b><br><i>(illustrative example, G2)</i> | P08      | 1.0     | 02-03-2026           | Document repository | Yes                              | Yes                 | —                                                                 |
| <b>Baseline</b><br><i>(illustrative example, G2)</i>                | P09      | 0.9     | 28-02-2026           | Document repository | Yes                              | No                  | Baseline estimated without justification; measurement is required |
|                                                                     |          |         |                      |                     |                                  |                     |                                                                   |
|                                                                     |          |         |                      |                     |                                  |                     |                                                                   |
|                                                                     |          |         |                      |                     |                                  |                     |                                                                   |

## Gate criteria

The criteria in document 21 for the *gate*, the intensity and the ambition level are listed. No codes are invented: they are copied from document 21. **Status:** Met · Not met · Not applicable · Pending (03 §3.4).

| Code<br>(document 21)                                     | Criterion                                                 | Mandatory<br>(Yes · No) | Status  | Linked<br>evidence | Justification<br>(mandatory for <i>Not met</i> and <i>Not applicable</i> ) | Does it block<br>the decision?<br>(Yes · No) |
|-----------------------------------------------------------|-----------------------------------------------------------|-------------------------|---------|--------------------|----------------------------------------------------------------------------|----------------------------------------------|
| <i>[code from document 21]<br/>(illustrative example)</i> | The baseline is measured, not estimated, unless justified | Yes                     | Not met | P09 v0.9           | An estimate from the business area is provided without measurement         | Yes                                          |
|                                                           |                                                           |                         |         |                    |                                                                            |                                              |
|                                                           |                                                           |                         |         |                    |                                                                            |                                              |
|                                                           |                                                           |                         |         |                    |                                                                            |                                              |
|                                                           |                                                           |                         |         |                    |                                                                            |                                              |

Binary checklist applied: LV-Gn from document 22 · version: \_\_\_\_\_.

## Degree of compliance

| Measure                           | Value | Calculation                                       |
|-----------------------------------|-------|---------------------------------------------------|
| Total criteria                    |       |                                                   |
| <i>Not applicable</i> criteria    |       |                                                   |
| Applicable criteria               |       | Total – Not applicable.                           |
| <i>Met</i> criteria               |       |                                                   |
| Degree of compliance              | %     | Met ÷ applicable × 100.                           |
| Mandatory criteria <i>Not met</i> |       | If greater than zero, Proceed cannot be recorded. |
| Mandatory criteria <i>Pending</i> |       | If greater than zero, Proceed cannot be recorded. |

| Measure                                                                                                | Value       | Calculation                                                |
|--------------------------------------------------------------------------------------------------------|-------------|------------------------------------------------------------|
| Does any criterion not met affect critical controls for security, legal compliance or human oversight? | Yes ·<br>No | If Yes, Proceed with conditions is not possible (01 §7.3). |

## 06

# Criteria differentiated by ambition level

Only at G2, G3, G5 and G7 (01 §7.6). The column for the initiative's level is assessed.

| Gate | Optimise                                                                          | Augment                                                                                | Transform                                                                               | Status |
|------|-----------------------------------------------------------------------------------|----------------------------------------------------------------------------------------|-----------------------------------------------------------------------------------------|--------|
| G2   | Baseline for cost, time or errors; expected savings with a formula.               | Performance and cost metrics; adoption target.                                         | Return hypothesis with learning milestones; investment limit per stage; board approval. |        |
| G3   | Positive expected annual net value within the horizon set in C2.                  | Feasibility of adoption and of the role change, in addition to the expected net value. | Feasibility of the first stage; stop criteria per stage; documented option value.       |        |
| G5   | Efficiency validated against the baseline; plan to realise the released capacity. | Actual adoption and performance improvement measured.                                  | Verified market or customer evidence.                                                   |        |
| G7   | Realised savings, not just released capacity.                                     | Sustained performance and reassigned capacity.                                         | Measured return and verified change in the operating model or the offering.             |        |

## 07

# Dual validation

| Condition (01 §7.2)                                                                        | Is it met? (Yes · No) | Verifier's comment |
|--------------------------------------------------------------------------------------------|-----------------------|--------------------|
| Tangible results: the criteria are met with real data, tests or results.                   |                       |                    |
| Verified documentation: the mandatory evidence exists, is traceable and has been verified. |                       |                    |

If either is *No*, the *gate* cannot be passed.

# Outcome

Tick a single outcome permitted for the *gate*.

| <i>Gate</i> | Permitted outcomes                                                                                      |
|-------------|---------------------------------------------------------------------------------------------------------|
| G0          | Proceed · Proceed with conditions · Iterate · Stop                                                      |
| G1, G2, G3  | Proceed · Proceed with conditions · Iterate · Pivot · Stop                                              |
| G4, G5      | Proceed · Proceed with conditions · Iterate · Stop                                                      |
| R6          | Proceed with operation · Proceed with conditions · Bring G7 forward (01 §7.3)                           |
| G7          | Scale · Iterate · Retire. Keeping the system unchanged is recorded as Iterate with a return to phase 6. |

| Outcome                          | Tick                     |
|----------------------------------|--------------------------|
| Proceed                          | <input type="checkbox"/> |
| Proceed with operation (R6 only) | <input type="checkbox"/> |
| Proceed with conditions          | <input type="checkbox"/> |
| Iterate                          | <input type="checkbox"/> |
| Pivot                            | <input type="checkbox"/> |
| Stop                             | <input type="checkbox"/> |
| Scale (G7 only)                  | <input type="checkbox"/> |
| Retire (G7 only)                 | <input type="checkbox"/> |
| Bring G7 forward (R6 only)       | <input type="checkbox"/> |

| Field                                                                 | Content | Guidance                                                                        |
|-----------------------------------------------------------------------|---------|---------------------------------------------------------------------------------|
| Reason for the decision                                               |         | Brief reasoning based on blocks 4 to 7. Mandatory for all outcomes.             |
| If Iterate: what must be repeated and planned date of the new request |         | At G7, the phase to which it returns (phase 6 if the system is kept unchanged). |

| Field                                                | Content | Guidance                                                                      |
|------------------------------------------------------|---------|-------------------------------------------------------------------------------|
| If Pivot: new hypothesis to be formulated in phase 2 |         | The approved context is retained.                                             |
| If Scale: reference to the new phase 0               |         | Detailed in P30.                                                              |
| Risks accepted in this decision (Enterprise)         |         | Risk, residual level and who accepts it according to its level (document 33). |

09

## Conditions

Only with *Proceed with conditions*. The conditions are verified at the next *gate* or on the date indicated.

**Status:** Open · Fulfilled · Expired.

| #                                 | Condition                                                               | Related criterion       | Owner            | Deadline   | How it will be verified  | Status |
|-----------------------------------|-------------------------------------------------------------------------|-------------------------|------------------|------------|--------------------------|--------|
| 1 ( <i>illustrative example</i> ) | Complete the training of the designated supervisors on the second shift | [code from document 21] | AI Product Owner | 30-06-2026 | Attendance record in P20 | Open   |
|                                   |                                                                         |                         |                  |            |                          |        |
|                                   |                                                                         |                         |                  |            |                          |        |
|                                   |                                                                         |                         |                  |            |                          |        |

10

## Coded stop or retirement reason

Mandatory with *Stop* or *Retire*. Tick one main reason and, where appropriate, one secondary reason (03 §3.3).

| Reason                 | Main                     | Secondary                |
|------------------------|--------------------------|--------------------------|
| No plausible value     | <input type="checkbox"/> | <input type="checkbox"/> |
| Hypothesis refuted     | <input type="checkbox"/> | <input type="checkbox"/> |
| Insufficient data      | <input type="checkbox"/> | <input type="checkbox"/> |
| Technically unfeasible | <input type="checkbox"/> | <input type="checkbox"/> |

| Reason                       | Main                     | Secondary                |
|------------------------------|--------------------------|--------------------------|
| Cost exceeds value           | <input type="checkbox"/> | <input type="checkbox"/> |
| Unacceptable risk            | <input type="checkbox"/> | <input type="checkbox"/> |
| Regulation                   | <input type="checkbox"/> | <input type="checkbox"/> |
| No adoption                  | <input type="checkbox"/> | <input type="checkbox"/> |
| Replaced by another solution | <input type="checkbox"/> | <input type="checkbox"/> |
| Change in strategic priority | <input type="checkbox"/> | <input type="checkbox"/> |

| Field                               | Content | Guidance                                     |
|-------------------------------------|---------|----------------------------------------------|
| Lessons learned                     |         | Link to the lessons block in P30 or summary. |
| Resources released                  |         | Unspent budget, people and licences.         |
| Retirement plan (if <i>Retire</i> ) |         | P30.                                         |

## 11

# Escalation and board approval

| Field                                                            | Content | Guidance                                                          |
|------------------------------------------------------------------|---------|-------------------------------------------------------------------|
| Is it escalated to the higher body owing to the iteration limit? |         | Yes · No. Body and date.                                          |
| Does it require board approval?                                  |         | Yes for Transform at G2 and for Scale at G7 (01 \$7.5).           |
| Body, date and minutes reference (Enterprise)                    |         | Board or board committee.                                         |
| Linked board recommendation (Enterprise)                         |         | Identifier in the recommendations register (document 62), if any. |

# Quality criteria

The AI Auditor (at Lite, by sampling) checks the quality of the record itself, in addition to the criteria in document 21 for the specific *gate*:

| # | Check                                                                                                    | Status (Met · Not met · Not applicable · Pending) |
|---|----------------------------------------------------------------------------------------------------------|---------------------------------------------------|
| 1 | All mandatory evidence is recorded, dated prior to the request.                                          |                                                   |
| 2 | Each criterion has a status, evidence and, where appropriate, justification.                             |                                                   |
| 3 | The degree of compliance is correctly calculated.                                                        |                                                   |
| 4 | The outcome is one of those permitted for the <i>gate</i> and is consistent with the mandatory criteria. |                                                   |
| 5 | The conditions do not affect critical controls and have an owner and a deadline.                         |                                                   |
| 6 | Stop and Retire have a coded reason.                                                                     |                                                   |
| 7 | Verifier and decision-maker are different people and are not part of the team.                           |                                                   |
| 8 | The iteration limit is respected.                                                                        |                                                   |

# Approval and verification

| Function             | Role as per 01 §7.5                   | Name | Date | Part of the team that builds? | Declaration of no conflict of interest |
|----------------------|---------------------------------------|------|------|-------------------------------|----------------------------------------|
| Submits the evidence | AI Product Owner or another team role |      |      | Yes                           | —                                      |
| Verifier             |                                       |      |      | Must be No                    | <input type="checkbox"/>               |
| Decision-maker       |                                       |      |      | Must be No                    | <input type="checkbox"/>               |

| Function                        | Role as per 01 §7.5 | Name | Date | Part of the team that builds? | Declaration of no conflict of interest |
|---------------------------------|---------------------|------|------|-------------------------------|----------------------------------------|
| Risk clearance (where required) | AI Risk Owner       |      |      | Must be No                    | <input type="checkbox"/>               |
