

DOCUMENT 34 · REGULATORY MAPPING

# Regulatory mapping

Each obligation linked to a SEVEN-G phase, role, evidence item and tool

Fernando García · SEACHAD    Version 0.1 (working draft)    16-09-2026    Draft for review

|                                                      |                                                                                 |                                                                  |                                                               |

**Legal notice and disclaimer.** SEVEN-G is a reference methodological framework provided "as is" and for information purposes only. It does not constitute legal, regulatory, financial or professional advice, nor does it guarantee compliance with any law or standard. References to general regulation (such as the EU AI Act, the GDPR, DORA or NIS2), to technical standards and to regulation specific to each sector or jurisdiction may be incomplete, may not apply to a particular case or may become out of date as a result of regulatory changes, interpretations or supervisory positions after their consultation date. **Each organisation that uses SEVEN-G is solely responsible for identifying the regulation that applies to it, verifying that it is current and certifying its own regulatory compliance**, with the appropriate qualified advice. The author and SEACHAD accept no liability for any use made of this content or for any decisions taken on the basis of it. The data, figures, companies and cases in the examples are fictitious or illustrative.

# Purpose and scope

**Scope and responsibility.** This mapping is **for guidance only** and does not constitute legal advice. It reflects the state of the legislation as consulted on 16 September 2026 (consultation date) and is not updated automatically. Both general regulation ([EU AI Act](#), [GDPR](#), [DORA](#), [NIS2](#) or national legislation) and **regulation specific to each industry** (banking, insurance, healthcare, energy, public sector, among others) change: dates of application, articles and texts in the legislative process are amended, and their scope depends on the interpretation, guidelines and supervisory positions of the competent authorities. The sector references annex (section 12) and the other jurisdictions annex (section 11) are for guidance only and do not identify all applicable obligations. Before using any row in a decision, verify that it is still in force in the official source. **The user organisation is solely responsible for identifying the regulation that applies to it, carrying out the regulatory classification of each system (01 §13) and verifying and certifying its compliance with qualified legal advice;** neither the author nor SEACHAD accepts that responsibility (document 93, section 11).

## 1.1 Principle: SEVEN-G maps, it does not embed

SEVEN-G does not reproduce regulation within its phases. It links each obligation to **a phase or stage, an accountable role, an evidence item and a tool**. When a regulation changes, the affected row of this document and tool T07 are updated, without redoing the lifecycle, the *gates* or the templates.

This document develops section 13 of document 01 and covers: Regulation (EU) 2024/1689 (EU AI Act) as amended by Regulation (EU) 2026/1744 (section 3); ISO/IEC 42001:2023 (section 4); [NIST AI RMF 1.0](#) and [NIST AI 600-1](#) (section 5); the GDPR and the [EDPB](#) guidelines (section 6); DORA and NIS2 where applicable (section 7); Spanish legislation and AESIA (Spanish Agency for the Supervision of Artificial Intelligence) (section 8); and, for guidance purposes, other jurisdictions and sectors (sections 11 and 12).

## 1.2 What this document does not do

It does not classify specific systems (that is done in phase 3 with P11 and T07), it does not replace the text of the regulations or the authorities' guidelines, it does not assert unverified sector-specific requirements and it does not reproduce the text of ISO/IEC standards: it only identifies clauses and groups of controls by number and topic.

## 1.3 How to read the mapping tables

All mapping tables use the same columns:

| Column                          | Content                                                                                                                           |
|---------------------------------|-----------------------------------------------------------------------------------------------------------------------------------|
| <b>Obligation / requirement</b> | Our own summary of the obligation, not a literal quotation.                                                                       |
| <b>Article or clause</b>        | Exact reference in the regulation or standard.                                                                                    |
| <b>Applies to</b>               | Operator or obliged organisation (for example, provider, deployer, controller, financial entity).                                 |
| <b>SEVEN-G phase or stage</b>   | Lifecycle phase (0–7), gate (G0–G5, R6, G7) or corporate cycle stage (C1–C5).                                                     |
| <b>Accountable role</b>         | SEVEN-G initiative role or body (01 §8; document 30). Legal counsel and the data protection officer form part of the second line. |
| <b>Evidence</b>                 | Template P01–P31 or library document where the proof is held.                                                                     |
| <b>Tool</b>                     | Tool T01–T22 where it is recorded (document 03).                                                                                  |

**Terminology note.** SEVEN-G's *AI Office* is an internal body of the company (01 §8.3). For the European Commission body provided for in the AI Act, [\*European AI Office\*](#) is always used.

## 1.4 Verification status

Every statement about dates or recent changes implicitly carries one of these statuses, detailed in section 13:

| Status                      | Meaning                                                                                                                                                                                       |
|-----------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Verified (official)</b>  | Confirmed in an official source: EUR-Lex, European Commission, European Parliament, BOE (Official State Gazette), Congreso de los Diputados (Congress of Deputies), AESIA, ISO, NIST or EDPB. |
| <b>Verified (secondary)</b> | Confirmed in official sources in essence and detailed with published legal analyses; pending literal comparison with the text published in the Official Journal.                              |

| Status               | Meaning                                                                                          |
|----------------------|--------------------------------------------------------------------------------------------------|
| Pending confirmation | Could not be confirmed as at the consultation date. Must not be used without prior verification. |

## 02

# Determinations prior to any mapping

Before applying the tables, each system must have four questions resolved. They are recorded provisionally in phase 0 (P02, P05) and confirmed in phase 3 (P11).

| Question                                                           | Reference                                                                                                                        | Possible outcome                                                                                                               | Phase                                | Evidence      | Tool          |
|--------------------------------------------------------------------|----------------------------------------------------------------------------------------------------------------------------------|--------------------------------------------------------------------------------------------------------------------------------|--------------------------------------|---------------|---------------|
| <b>Is it an AI system or a general-purpose AI model?</b>           | <a href="#">AI Act , Art. 3(1) and 3(63); Commission guidelines on the definition of an AI system (February 2025)</a>            | AI system · General-purpose model · Not AI (tag <i>Rules (not AI)</i> )                                                        | 0, confirmed in 3                    | P05, P11      | T02, T07      |
| <b>Is it within the scope of the Regulation?</b>                   | Art. 2 (exclusions: defence and national security, scientific research, purely personal non-professional activity, among others) | Within scope · Out of scope                                                                                                    | 0, confirmed in 3                    | P02, P11      | T07           |
| <b>What role does the company have in relation to that system?</b> | Art. 3(3) to 3(8) (provider, deployer, authorised representative, importer, distributor, operator) and Art. 25                   | One or more roles per system                                                                                                   | 0, confirmed in 3 and reviewed in R6 | P02, P11, P14 | T02, T07, T09 |
| <b>Which risk category does it fall into?</b>                      | Arts. 5, 6, 50 and Annexes I and III                                                                                             | Prohibited · High risk · Transparency obligations · Minimal risk · Out of scope · Pending classification (taxonomy in 03 §3.3) | 3; review in R6 and G7               | P11           | T07, T02      |

**Change of role (Art. 25).** A company acting as deployer takes on provider obligations if it puts its name or trademark on a high-risk AI system, makes a substantial modification to it or changes its intended purpose in such a way that it becomes high-risk. The role must therefore be reviewed at G4 (design), at G5 (before production) and at every relevant change recorded in P27.

# Regulatory classification in phase 3

Sequence followed by the T07 classifier

Source: SEVEN-G · SEACHAD

The categories are not mutually exclusive: T07 must record all those that apply.

## 03

# EU AI Act

## 3.1 Verified timeline of application

Regulation (EU) 2024/1689 entered into force on 1 August 2024 and applies in stages. **Regulation (EU) 2026/1744 (Digital Omnibus on AI)**, proposed by the Commission on 19 November 2025, with political agreement on 7 May 2026, adopted by the European Parliament on 16 June and by the Council on 29 June 2026, signed on 8 July, published in the Official Journal on 24 July and **in force since 27 July 2026**, has amended several dates.

| Date      | What applies                                                                                | Verification status | Consequence in SEVEN-G                                                                                  |
|-----------|---------------------------------------------------------------------------------------------|---------------------|---------------------------------------------------------------------------------------------------------|
| 1-08-2024 | Entry into force of the Regulation.                                                         | Verified (official) | —                                                                                                       |
| 2-02-2025 | General provisions (definitions and AI literacy, Art. 4) and prohibited practices (Art. 5). | Verified (official) | No initiative involving a prohibited practice passes G3. Training and use policy (documents 31 and 50). |

| Date             | What applies                                                                                                                                                                                                                                                       | Verification status                                                                                    | Consequence in SEVEN-G                                                                                |
|------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------------------------------------------------------------------------------------------------------|-------------------------------------------------------------------------------------------------------|
| <b>2-08-2025</b> | Obligations of providers of general-purpose AI models (Chapter V); governance; national competent authorities; penalties regime (except fines on providers of general-purpose AI models).                                                                          | Verified (official)                                                                                    | Information requirements for model providers (P14, T09).                                              |
| <b>2-08-2026</b> | General application of the Regulation, including the transparency obligations of Art. 50 and the Commission's enforcement powers over general-purpose AI models.                                                                                                   | Verified (official)                                                                                    | Art. 50 obligations enforceable for systems in production: review in R6.                              |
| <b>2-12-2026</b> | New prohibitions added to Art. 5 by the omnibus (generation of non-consensual intimate material and child sexual abuse material). End of the transitional period for the machine-readable marking of Art. 50(2) for systems placed on the market before 2-08-2026. | Verified (official) as to date and general content; paragraph numbering pending confirmation           | Incorporate into the T07 questionnaire and into phase 5 testing of generative systems.                |
| <b>2-08-2027</b> | Obligation for Member States to have at least one national AI regulatory sandbox operational (previously 2-08-2026). Deadline for general-purpose AI models placed on the market before 2-08-2025 (Art. 111(3)).                                                   | Verified (official) for the sandbox; Art. 111(3) according to the original text, with no known changes | —                                                                                                     |
| <b>2-12-2027</b> | Requirements and obligations for <b>high-risk AI systems under Art. 6(2) and Annex III</b> (previously 2-08-2026).                                                                                                                                                 | Verified (official)                                                                                    | Initiatives with go-live planned after this date must already be designed with the requirements (G4). |
| <b>2-08-2028</b> | Requirements for <b>high-risk AI systems under Art. 6(1) and Annex I</b> (regulated products; previously 2-08-2027).                                                                                                                                               | Verified (official)                                                                                    | Likewise for regulated products.                                                                      |

**Systems already on the market.** Under Art. 111, high-risk AI systems predating the date of application are only subject to the Regulation if they undergo significant changes in their design, with specific rules for public authorities; the transitional dates following the omnibus are **pending comparison with the published text**. SEVEN-G does not use this exception to lower controls (01 §14).

### 3.2 Changes in the Digital Omnibus on AI relevant to SEVEN-G

| Change                                                                                                                                                                                                                                        | Provision affected               | Application                                                 | Status                                                               | Effect in SEVEN-G                                                                                                                                                                         |
|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|----------------------------------|-------------------------------------------------------------|----------------------------------------------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Postponement of high-risk requirements</b>                                                                                                                                                                                                 | Art. 113                         | 2-12-2027 (Annex III) and 2-08-2028 (Annex I)               | Verified (official)                                                  | Updates T07 and the dates column of P11. Does not change the <i>gates</i> .                                                                                                               |
| <b>AI literacy: the obligation becomes one of supporting the development of staff AI literacy, without requiring a specific level; the role of the Commission and the Member States is strengthened</b>                                       | Art. 4                           | From the entry into force of the omnibus                    | Verified (official) in essence; literal wording verified (secondary) | The policy and training plan remain evidence (documents 31 and 50). Deployers of high-risk AI systems retain the requirement of competence for those who exercise oversight (Art. 26(2)). |
| <b>New prohibited practices: systems that generate or manipulate non-consensual intimate material or child sexual abuse material, including systems in which that outcome is reasonably foreseeable in the absence of adequate safeguards</b> | Art. 5                           | 2-12-2026                                                   | Verified (official)                                                  | New question in T07 and specific test in phase 5 of generative systems (P22).                                                                                                             |
| <b>Transitional period for marking synthetic content</b>                                                                                                                                                                                      | Art. 50(2)                       | 2-12-2026 for systems placed on the market before 2-08-2026 | Verified (official)                                                  | Compliance plan in R6 for existing systems.                                                                                                                                               |
| <b>Processing of special categories of data to detect and correct bias, extended beyond high risk under a strict necessity criterion</b>                                                                                                      | Art. 10 and associated provision | From the entry into force of the omnibus                    | Verified (official) in essence; exact article verified (secondary)   | Requires a documented <a href="#">GDPR</a> legal basis and safeguards (P16, data protection impact assessment in P11).                                                                    |
| <b>Registration in the EU database: maintained, with simplified information, for Annex III systems that the provider considers not to be high-risk</b>                                                                                        | Arts. 6(3), 49(2) and Annex VIII | With the high-risk requirements                             | Verified (secondary)                                                 | P11 retains the documentation of the Art. 6(3) exception.                                                                                                                                 |
| <b>SME support measures extended to small mid-cap enterprises</b>                                                                                                                                                                             | Various provisions               | From the entry into force of the omnibus                    | Verified (official); thresholds verified (secondary)                 | Relevant to the intensity of documentation; does not lower SEVEN-G criteria.                                                                                                              |

| Change                                                                                                                                                                                                   | Provision affected                                | Application                              | Status                                                                                     | Effect in SEVEN-G                                 |
|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|---------------------------------------------------|------------------------------------------|--------------------------------------------------------------------------------------------|---------------------------------------------------|
| <b>Enhanced supervision by the European AI Office of systems based on general-purpose AI models from the same provider and of systems integrated into very large online platforms and search engines</b> | Art. 75                                           | From the entry into force of the omnibus | Verified (official) in essence                                                             | Identify the competent authority in P11.          |
| <b>AI regulatory sandboxes: national deadline moved to 2-08-2027 and possible EU-level sandbox</b>                                                                                                       | Art. 57                                           | 2-08-2027                                | Verified (official)                                                                        | Option for initiatives in phases 3–5 (section 8). |
| <b>Machinery: AI systems in machinery come to be dealt with mainly through Regulation (EU) 2023/1230; narrower definition of safety component</b>                                                        | Art. 3(14), Annex I and Regulation (EU) 2023/1230 | Exact date pending confirmation          | Verified (secondary)                                                                       | Relevant only to product manufacturers.           |
| <b>Template for the post-market monitoring plan</b>                                                                                                                                                      | Art. 72(3)                                        | —                                        | Pending confirmation of whether the implementing act is maintained or replaced by guidance | P25 and P26 do not depend on the final format.    |

### 3.3 Commission guidelines, codes of practice and templates

| Document                                                                    | Date          | Status as at 16-09-2026 | Use in SEVEN-G                              |
|-----------------------------------------------------------------------------|---------------|-------------------------|---------------------------------------------|

### 3.4 Prohibited practices (Art. 5)

| Obligation / requirement                                                                                                        | Article or clause | Applies to    | SEVEN-G phase or stage            | Accountable role                                   | Evidence (P-code or document) | Tool |
|---------------------------------------------------------------------------------------------------------------------------------|-------------------|---------------|-----------------------------------|----------------------------------------------------|-------------------------------|------|
| <b>Do not use subliminal, manipulative or deceptive techniques that materially distort behaviour and cause significant harm</b> | Art. 5(1)(a)      | All operators | 1 (screening), 3 (classification) | AI Product Owner; AI Risk Owner with legal counsel | P06, P11                      | T07  |
| <b>Do not exploit vulnerabilities due to age, disability or social or economic situation</b>                                    | Art. 5(1)(b)      | All operators | 1, 3                              | AI Product Owner; AI Risk Owner                    | P06, P11                      | T07  |
| <b>Do not carry out social scoring leading to detrimental or disproportionate treatment</b>                                     | Art. 5(1)(c)      | All operators | 1, 3                              | AI Risk Owner                                      | P11                           | T07  |

| Obligation / requirement                                                                                                                                                                                  | Article or clause                                                                                      | Applies to                  | SEVEN-G phase or stage        | Accountable role                  | Evidence (P-code or document) | Tool     |
|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------------------------------------------------------------------------------------------------------|-----------------------------|-------------------------------|-----------------------------------|-------------------------------|----------|
| <b>Do not assess the risk of a person committing a criminal offence based solely on profiling or personality traits</b>                                                                                   | Art. 5(1)(d)                                                                                           | All operators               | 3                             | AI Risk Owner                     | P11                           | T07      |
| <b>Do not create or expand facial recognition databases through untargeted scraping of images</b>                                                                                                         | Art. 5(1)(e)                                                                                           | All operators               | 3; data controls in 4         | AI Technical Owner; AI Risk Owner | P11, P16                      | T07      |
| <b>Do not infer emotions in the workplace or in educational institutions, except for medical or safety reasons</b>                                                                                        | Art. 5(1)(f)                                                                                           | All operators               | 3                             | AI Risk Owner; second line        | P11                           | T07      |
| <b>Do not use biometric categorisation to deduce race, political opinions, trade union membership, beliefs, sex life or sexual orientation</b>                                                            | Art. 5(1)(g)                                                                                           | All operators               | 3                             | AI Risk Owner                     | P11                           | T07      |
| <b>Do not use real-time remote biometric identification in publicly accessible spaces for law enforcement purposes, except in strictly defined cases</b>                                                  | Art. 5(1)(h) and 5(2)–5(7)                                                                             | Law enforcement authorities | 3                             | AI Risk Owner                     | P11                           | T07      |
| <b>Do not place on the market or use systems that generate non-consensual intimate material or child sexual abuse material, or systems lacking reasonable safeguards against that foreseeable outcome</b> | Art. 5 as amended by Regulation (EU) 2026/1744 (paragraph pending confirmation); application 2-12-2026 | Providers and deployers     | 3; testing in 5; review in R6 | AI Technical Owner; AI Risk Owner | P11, P18, P22                 | T07, T10 |

| Obligation / requirement                                                                       | Article or clause       | Applies to     | SEVEN-G phase or stage | Accountable role                                   | Evidence (P-code or document)             | Tool     |
|------------------------------------------------------------------------------------------------|-------------------------|----------------|------------------------|----------------------------------------------------|-------------------------------------------|----------|
| <b>Detect and stop any prohibited practice in systems in production or in unauthorised use</b> | Art. 5; 01 §6.5 and §12 | Entire company | 6, C4                  | AI Operations Owner; AI Committee; board committee | P27; critical nonconformity (document 37) | T08, T21 |

**SEVEN-G rule.** A prohibited practice never progresses beyond phase 3 (01 §6.5). Its detection in production is a critical nonconformity with immediate containment and E-4 escalation under document 30.

### 3.5 AI literacy (Art. 4)

| Obligation / requirement                                                                                                                                                                                     | Article or clause                             | Applies to              | SEVEN-G phase or stage                            | Accountable role                             | Evidence (P-code or document)          | Tool     |
|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----------------------------------------------|-------------------------|---------------------------------------------------|----------------------------------------------|----------------------------------------|----------|
| <b>Take measures to support the development of AI literacy among staff and others operating or using systems on the company's behalf, taking into account their knowledge, experience and context of use</b> | Art. 4 (wording of Regulation (EU) 2026/1744) | Providers and deployers | C2 (policy), C3 (plan), phases 4–6 per initiative | Senior management; AI Office; Head of People | Document 31 (policy), document 50, P20 | T20      |
| <b>Specific training for those who use or oversee each system</b>                                                                                                                                            | Art. 4; Art. 26(2) for high risk              | Deployers               | 4 (design), 5 (user training)                     | AI Product Owner                             | P17, P20, P21                          | T20      |
| <b>Monitoring of training coverage and corporate use of AI</b>                                                                                                                                               | Art. 4                                        | Providers and deployers | C4                                                | AI Office                                    | Board dashboard (document 60)          | T17, T21 |

### 3.6 High-risk classification (Art. 6 and Annexes I and III)

| Obligation / requirement                                                                                                                                                                                                                                                                                                          | Article or clause                        | Applies to                       | SEVEN-G phase or stage               | Accountable role                                                 | Evidence (P-code or document) | Tool     |
|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|------------------------------------------|----------------------------------|--------------------------------------|------------------------------------------------------------------|-------------------------------|----------|
| <b>Determine whether the system is a safety component of a product, or is itself a product, covered by the Annex I legislation and subject to third-party conformity assessment</b>                                                                                                                                               | Art. 6(1) and Annex I (Sections A and B) | Providers; product manufacturers | 3                                    | AI Risk Owner; AI Technical Owner                                | P11                           | T07      |
| <b>Determine whether the intended purpose is listed in Annex III</b>                                                                                                                                                                                                                                                              | Art. 6(2) and Annex III                  | Providers and deployers          | 1 (early signal), 3 (classification) | AI Product Owner; AI Risk Owner                                  | P06, P11                      | T07      |
| <b>Document, before placing on the market, the exception where an Annex III system does not pose a significant risk (narrow procedural task, improvement of a previously completed human activity, detection of patterns without replacing human assessment, or preparatory task); not available where profiling is performed</b> | Art. 6(3) and 6(4)                       | Providers                        | 3; review at G4 and R6               | AI Risk Owner with legal counsel; verification by the AI Auditor | P11                           | T07, T03 |
| <b>Register the exception in the EU database</b>                                                                                                                                                                                                                                                                                  | Art. 49(2)                               | Providers                        | 5 (before G5)                        | AI Technical Owner                                               | P11, P23                      | T02      |
| <b>Review the classification in the event of changes in purpose, scope, data or autonomy</b>                                                                                                                                                                                                                                      | Arts. 6 and 25                           | Providers and deployers          | R6, G7 and every change              | AI Risk Owner                                                    | P11, P27                      | T07, T08 |

**Annex III areas** (warning signs in phase 1): 1 biometrics · 2 critical infrastructure · 3 education and vocational training · 4 employment, workers' management and access to self-employment · 5 access to and enjoyment of essential private services and essential public services and benefits (including creditworthiness assessment and credit scoring, except fraud detection, and risk assessment and pricing in life and health insurance) · 6 law enforcement · 7 migration, asylum and border control management · 8 administration of justice and democratic processes. Any initiative with one of these signals must be treated as Enterprise from phase 0 until P11 concludes otherwise (01 §9.2).

### 3.7 Requirements for high-risk AI systems (Arts. 9 to 15)

| Obligation / requirement                                                                                                                                                 | Article or clause    | Applies to                                            | SEVEN-G phase or stage                                    | Accountable role                         | Evidence (P-code or document)        | Tool |
|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------|----------------------|-------------------------------------------------------|-----------------------------------------------------------|------------------------------------------|--------------------------------------|------|
| <b>Continuous risk management system throughout the entire lifecycle, with testing against defined metrics and thresholds</b>                                            | Art. 9               | Providers                                             | 3 (assessment), 4 (controls), 5 (testing), 6 (monitoring) | AI Risk Owner; AI Technical Owner        | P12, P13, P22; document 33           | T06  |
| <b>Governance and quality of training, validation and testing data: relevance, representativeness, freedom from errors to the extent possible, examination of biases</b> | Art. 10              | Providers                                             | 3 (availability), 4 (lineage), 5 (bias testing)           | AI Technical Owner                       | P10, P16, P22; document 51           | T06  |
| <b>Technical documentation in accordance with Annex IV, drawn up before placing on the market and kept up to date</b>                                                    | Art. 11 and Annex IV | Providers                                             | 4 and 5; maintenance in 6                                 | AI Technical Owner                       | P15, P16, P17, P18, P21; document 53 | T03  |
| <b>Automatic recording of events (<i>logs</i>) enabling traceability</b>                                                                                                 | Art. 12              | Providers (design); deployers (retention, Art. 26(6)) | 4 (design), 6 (retention)                                 | AI Technical Owner; AI Operations Owner  | P15, P18, P25                        | T10  |
| <b>Transparency and instructions for use for deployers</b>                                                                                                               | Art. 13              | Providers                                             | 4, 5                                                      | AI Product Owner; AI Technical Owner     | P17, P21, P24                        | —    |
| <b>Effective human oversight: measures proportionate to risk and autonomy, ability to interpret, not use, override or stop the system</b>                                | Art. 14              | Providers (design) and deployers (implementation)     | 4 (design), 5 (testing), 6 (operation)                    | AI Technical Owner; AI Product Owner     | P17, P19, P22, P24                   | T10  |
| <b>Appropriate accuracy, robustness and cybersecurity, including resilience against manipulation of data, models and inputs</b>                                          | Art. 15              | Providers                                             | 4 (design), 5 (testing), 6 (monitoring)                   | AI Technical Owner; information security | P18, P22, P25; document 35           | T10  |

### 3.8 Obligations of providers and along the value chain (Arts. 16 to 25)

| Obligation / requirement                                                                                                                                                     | Article or clause              | Applies to | SEVEN-G phase or stage               | Accountable role                  | Evidence (P-code or document)                        | Tool     |
|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------------------------------|------------|--------------------------------------|-----------------------------------|------------------------------------------------------|----------|
| <b>Ensure compliance with the requirements of Arts. 9–15 and indicate their identity on the system or its documentation</b>                                                  | Art. 16(a) and 16(b)           | Providers  | 4, 5                                 | AI Technical Owner                | P21, P23                                             | T03      |
| <b>Documented quality management system (compliance strategy, design, development, testing, data management, risks, post-market monitoring, incidents, responsibilities)</b> | Art. 17                        | Providers  | C2 (framework), 4–6 (implementation) | AI Office; AI Technical Owner     | Documents 01, 20, 21, 53; section 4 of this document | T01, T03 |
| <b>Keep the documentation for ten years after placing on the market</b>                                                                                                      | Art. 18                        | Providers  | 5–7                                  | AI Technical Owner; AI Office     | P21, P30                                             | T01      |

| <b>Take on provider obligations when putting a name or trademark on the system, making a substantial modification or changing the purpose to high risk; written agreements with component suppliers</b> | Art. 25           | Deployers, distributors, importers and other third parties | 3, 4 and every change (P27) | AI Risk Owner; legal counsel | P11, P14; document 36         | T07, T09 |

### 3.9 Obligations of deployers (Art. 26)

| Obligation / requirement                                                                                                  | Article or clause | Applies to                        | SEVEN-G phase or stage      | Accountable role    | Evidence (P-code or document) | Tool |
|---------------------------------------------------------------------------------------------------------------------------|-------------------|-----------------------------------|-----------------------------|---------------------|-------------------------------|------|
| <b>Use the system in accordance with the instructions for use, with appropriate technical and organisational measures</b> | Art. 26(1)        | Deployers of high-risk AI systems | 4, 6                        | AI Operations Owner | P17, P24                      | —    |
| <b>Assign human oversight to persons who have the necessary competence, training, authority and support</b>               | Art. 26(2)        | Deployers of high-risk AI systems | 4 (design), 5 (training), 6 | AI Product Owner    | P03, P17, P20                 | T20  |
| <b>Ensure that input data under their control are relevant and sufficiently representative</b>                            | Art. 26(4)        | Deployers of high-risk AI systems | 4, 6                        | AI Technical Owner  | P16, P25                      | —    |
| <b>Monitor operation, inform the provider, suspend use in the event of risk and report serious incidents</b>              | Art. 26(5)        | Deployers of high-risk AI systems | 6                           | AI Operations Owner | P25, P26, P27                 | T08  |

| Obligation / requirement                                                                                                             | Article or clause         | Applies to                                  | SEVEN-G phase or stage               | Accountable role                       | Evidence (P-code or document) | Tool |
|--------------------------------------------------------------------------------------------------------------------------------------|---------------------------|---------------------------------------------|--------------------------------------|----------------------------------------|-------------------------------|------|
| <b>Keep logs under their control for at least six months, unless otherwise provided</b>                                              | Art. 26(6)                | Deployers of high-risk AI systems           | 6                                    | AI Operations Owner                    | P24, P25                      | —    |
| <b>Inform workers' representatives and affected workers before putting a high-risk AI system into use in the workplace</b>           | Art. 26(7)                | Employers deploying high-risk AI systems    | 4 (plan), before G5                  | AI Sponsor; Head of People             | P20, P23; document 50         | T20  |
| <b>Registration in the EU database where the deployer is a public authority</b>                                                      | Art. 26(8) and Art. 49(3) | Public authorities and bodies               | 5                                    | AI Technical Owner                     | P23                           | T02  |
| <b>Use the provider's information for the data protection impact assessment</b>                                                      | Art. 26(9); GDPR Art. 35  | Deployers                                   | 3                                    | AI Risk Owner; data protection officer | P11                           | T07  |
| <b>Inform natural persons that they are subject to the use of an Annex III system that makes decisions or assists in making them</b> | Art. 26(11)               | Deployers of high-risk AI systems           | 4 (design), 6                        | AI Product Owner                       | P17, P24                      | —    |
| <b>Explanation of individual decisions to the affected person, where applicable</b>                                                  | Art. 86                   | Deployers of Annex III high-risk AI systems | 4 (design), 6 (handling of requests) | AI Product Owner; second line          | P17, P24                      | T08  |
| <b>Cooperate with the authorities</b>                                                                                                | Art. 26(12)               | Deployers                                   | 6, C4                                | AI Risk Owner                          | P27                           | T08  |

**Financial entities.** Some obligations are deemed fulfilled through the internal governance required by financial services legislation (for example, Arts. 17(4) and 26(5)); P11 must identify which sector-specific evidence covers each one.

### 3.10 Fundamental rights impact assessment (Art. 27)

| Obligation / requirement                                                                                                                                                                                      | Article or clause        | Applies to                                                                                                                                                                 | SEVEN-G phase or stage       | Accountable role                             | Evidence (P-code or document) | Tool     |
|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------|------------------------------|----------------------------------------------|-------------------------------|----------|
| <b>Carry out the assessment before first use: processes, period and frequency of use, affected persons and groups, specific risks, human oversight measures and measures to be taken if risks materialise</b> | Art. 27(1)               | Bodies governed by public law, private entities providing public services and deployers of systems under Annex III, point 5(b) and (c); does not apply to Annex III area 2 | 3 (assessment), updated in 4 | AI Risk Owner; second line; AI Product Owner | P11                           | T07      |
| <b>Update the assessment when any of its elements change</b>                                                                                                                                                  | Art. 27(2)               | Same                                                                                                                                                                       | R6 and every change          | AI Risk Owner                                | P11, P27                      | T07, T08 |
| <b>Notify the market surveillance authority of the results using the prescribed form</b>                                                                                                                      | Art. 27(3)               | Same                                                                                                                                                                       | 5 (before G5)                | AI Risk Owner                                | P11, P23                      | T07      |
| <b>Complement, without duplicating, the data protection impact assessment</b>                                                                                                                                 | Art. 27(4); GDPR Art. 35 | Same                                                                                                                                                                       | 3                            | AI Risk Owner; data protection officer       | P11                           | T07      |

It applies together with the high-risk requirements (2-12-2027 for Annex III); the European AI Office template is **pending confirmation**. Every Enterprise initiative involving decisions about people should apply this content in P11 even if not obliged to do so.

### 3.11 Transparency (Art. 50)

| Obligation / requirement                                                                 | Article or clause | Applies to                                     | SEVEN-G phase or stage  | Accountable role | Evidence (P-code or document) | Tool |
|------------------------------------------------------------------------------------------|-------------------|------------------------------------------------|-------------------------|------------------|-------------------------------|------|
| <b>Inform people that they are interacting with an AI system, unless this is obvious</b> | Art. 50(1)        | Providers of systems that interact with people | 4 (design), 5 (testing) | AI Product Owner | P17, P22                      | T07  |

| Obligation / requirement                                                                                                                                                                                                | Article or clause                                                                | Applies to                      | SEVEN-G phase or stage      | Accountable role                          | Evidence (P-code or document) | Tool     |
|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|----------------------------------------------------------------------------------|---------------------------------|-----------------------------|-------------------------------------------|-------------------------------|----------|
| <b>Mark synthetic audio, image, video or text content in a machine-readable format</b>                                                                                                                                  | Art. 50(2) (transitional period until 2-12-2026 for systems predating 2-08-2026) | Providers of generative systems | 4, 5; compliance plan in R6 | AI Technical Owner                        | P18, P22                      | T07, T10 |
| <b>Inform people exposed to emotion recognition or biometric categorisation systems</b>                                                                                                                                 | Art. 50(3)                                                                       | Deployers                       | 4, 6                        | AI Product Owner; data protection officer | P17, P24                      | T07      |
| <b>Disclose that content is a deep fake, and that text published to inform the public on matters of public interest has been generated or manipulated, unless subject to human review with editorial responsibility</b> | Art. 50(4)                                                                       | Deployers                       | 4, 6                        | AI Product Owner                          | P17, P24                      | T07      |
| <b>Provide the information clearly and at the latest at the time of the first interaction or exposure</b>                                                                                                               | Art. 50(5)                                                                       | Providers and deployers         | 5 (testing)                 | AI Product Owner                          | P22                           | —        |

### 3.12 General-purpose AI models (Arts. 51 to 55) for those who integrate them

Most companies are **downstream providers** or deployers of systems built on third-party models: they are affected by the information they must receive and by the risk of becoming providers.

| Obligation / requirement                                                                                                                  | Article or clause           | Applies to                                                               | SEVEN-G phase or stage                    | Accountable role                  | Evidence (P-code or document) | Tool |
|-------------------------------------------------------------------------------------------------------------------------------------------|-----------------------------|--------------------------------------------------------------------------|-------------------------------------------|-----------------------------------|-------------------------------|------|
| <b>Obtain from the model provider the information and documentation for downstream providers (capabilities, limitations, integration)</b> | Art. 53(1)(b) and Annex XII | Obligation of the model provider; the integrating company must demand it | 3 (supplier assessment), 4 (architecture) | AI Technical Owner; AI Risk Owner | P14, P15, P16                 | T09  |

| Obligation / requirement                                                                                                                                                                                            | Article or clause                                                         | Applies to                       | SEVEN-G phase or stage   | Accountable role                      | Evidence (P-code or document) | Tool     |
|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|---------------------------------------------------------------------------|----------------------------------|--------------------------|---------------------------------------|-------------------------------|----------|
| <b>Check that the provider has a copyright policy and a public summary of training content</b>                                                                                                                      | Art. 53(1)(c) and 53(1)(d)                                                | Obligation of the model provider | 3                        | AI Risk Owner; legal counsel          | P14; document 36              | T09      |
| <b>Know whether the model is classified as having systemic risk and which evaluations, mitigations and incident reporting its provider applies</b>                                                                  | Arts. 51, 52 and 55                                                       | Obligation of the model provider | 3, 6                     | AI Risk Owner                         | P12, P14                      | T06, T09 |
| <b>Assess whether the company's own modifications (for example, significant retraining or fine-tuning) make it the provider of the modified model, using the criteria of the Commission guidelines of July 2025</b> | Arts. 3(63), 3(66), 3(68) and 53; guidelines on general-purpose AI models | Companies that modify models     | 4 (design), every change | AI Technical Owner with legal counsel | P11, P15, P16                 | T07      |
| <b>If the system built on the model is high-risk, comply with all the obligations of the system provider</b>                                                                                                        | Arts. 6, 16 and 25                                                        | Downstream providers             | 3–6                      | AI Technical Owner; AI Risk Owner     | Sections 3.7 and 3.8          | T07      |
| <b>Consider the provider's adherence to the code of practice as an element of the assessment, not as a guarantee</b>                                                                                                | Art. 56; code of July 2025                                                | Integrating companies            | 3                        | AI Risk Owner                         | P14                           | T09      |

Timeline: obligations of model providers from 2-08-2025; Commission enforcement powers from 2-08-2026; models placed on the market before 2-08-2025, until 2-08-2027.

### 3.13 Registration in the EU database (Arts. 49 and 71)

| Obligation / requirement                                                                                                                                                             | Article or clause                                    | Applies to                       | SEVEN-G phase or stage | Accountable role    | Evidence (P-code or document) | Tool     |
|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|------------------------------------------------------|----------------------------------|------------------------|---------------------|-------------------------------|----------|
| <b>Register the provider and the Annex III high-risk AI system (except area 2, which is registered at national level) before placing it on the market or putting it into service</b> | Art. 49(1), Art. 71 and Annex VIII                   | Providers                        | 5, before G5           | AI Technical Owner  | P23                           | T02, T03 |
| <b>Register Annex III systems that the provider considers not to be high-risk under Art. 6(3), with the simplified information laid down in the amended text</b>                     | Art. 49(2) (as amended by Regulation (EU) 2026/1744) | Providers                        | 5, before G5           | AI Technical Owner  | P11, P23                      | T02      |
| <b>Register and select the system in the database where the deployer is a public authority</b>                                                                                       | Art. 49(3)                                           | Public authorities and bodies    | 5, before G5           | AI Technical Owner  | P23                           | T02      |
| <b>Keep the registered information up to date</b>                                                                                                                                    | Arts. 49 and 71                                      | Providers and public authorities | 6, R6, G7              | AI Operations Owner | P27, P30                      | T02, T08 |

Registration in the internal inventory (P05, T02) is mandatory from phase 0 for every system; EU registration is distinct and is verified at G5.

### 3.14 Post-market monitoring (Art. 72)

| Obligation / requirement                                                                                                                               | Article or clause    | Applies to                        | SEVEN-G phase or stage    | Accountable role                        | Evidence (P-code or document) | Tool |
|--------------------------------------------------------------------------------------------------------------------------------------------------------|----------------------|-----------------------------------|---------------------------|-----------------------------------------|-------------------------------|------|
| <b>Establish and document a proportionate post-market monitoring system that collects and analyses performance data throughout the entire lifetime</b> | Art. 72(1) and 72(2) | Providers of high-risk AI systems | 4 (design), 6 (execution) | AI Operations Owner; AI Technical Owner | P24, P25, P28                 | T12  |

| Obligation / requirement                                                                              | Article or clause       | Applies to                                                      | SEVEN-G phase or stage | Accountable role                                        | Evidence (P-code or document) | Tool |
|-------------------------------------------------------------------------------------------------------|-------------------------|-----------------------------------------------------------------|------------------------|---------------------------------------------------------|-------------------------------|------|
| <b>Post-market monitoring plan as part of the technical documentation</b>                             | Art. 72(3) and Annex IV | Providers of high-risk AI systems                               | 4, verified at G5      | AI Technical Owner                                      | P21, P25                      | T03  |
| <b>Integrate monitoring into existing systems where equivalent sector-specific legislation exists</b> | Art. 72(4)              | Providers subject to Annex I, Section A, and financial entities | 4                      | AI Risk Owner                                           | P11, P25                      | —    |
| <b>Periodically review the monitoring results and the continued validity of the classification</b>    | Art. 72; 01 §6.8        | Providers                                                       | R6                     | AI Auditor verifies; AI Committee decides in Enterprise | P29                           | T03  |

### 3.15 Serious incidents (Art. 73)

| Obligation / requirement                                                                                                                                                                                                                                                                       | Article or clause    | Applies to                        | SEVEN-G phase or stage | Accountable role                                  | Evidence (P-code or document) | Tool |
|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|----------------------|-----------------------------------|------------------------|---------------------------------------------------|-------------------------------|------|
| <b>Classify whether an incident is a "serious incident" (death or serious harm to health; serious and irreversible disruption of critical infrastructure; infringement of obligations under Union law intended to protect fundamental rights; serious harm to property or the environment)</b> | Art. 3(49)           | Providers and deployers           | 6                      | AI Operations Owner; AI Risk Owner; legal counsel | P26, P27                      | T08  |
| <b>Report to the market surveillance authority as soon as the causal link or its reasonable likelihood has been established and, at the latest, within 15 days of becoming aware</b>                                                                                                           | Art. 73(1) and 73(2) | Providers of high-risk AI systems | 6 (severity S1)        | AI Risk Owner; legal counsel                      | P26, P27                      | T08  |

| Obligation / requirement                                                                                                                                                                    | Article or clause    | Applies to                        | SEVEN-G phase or stage | Accountable role                        | Evidence (P-code or document) | Tool |
|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|----------------------|-----------------------------------|------------------------|-----------------------------------------|-------------------------------|------|
| <b>Shorter time limits: immediately and no later than 2 days for widespread infringements or serious disruption of critical infrastructure; no later than 10 days in the event of death</b> | Art. 73(3) and 73(4) | Providers of high-risk AI systems | 6 (S1)                 | AI Risk Owner                           | P26, P27                      | T08  |
| <b>Investigate, assess the risk and take corrective action without altering the system in a way that could affect the evaluation of the causes before informing the authorities</b>         | Art. 73(6)           | Providers of high-risk AI systems | 6; G7 if appropriate   | AI Operations Owner; AI Technical Owner | P27; document 37              | T08  |
| <b>Inform the provider without delay and, where applicable, the authorities when the deployer identifies a serious incident</b>                                                             | Art. 26(5)           | Deployers                         | 6                      | AI Operations Owner                     | P26, P27                      | T08  |
| <b>Treat every possible serious incident as severity S1 and E-4 escalation</b>                                                                                                              | Documents 30 and 37  | Entire company                    | 6, C4                  | AI Committee; board committee           | P27                           | T08  |

The Commission's guidance and template on serious incidents were published in draft in 2025; the final version is **pending confirmation**. The reporting obligation applies together with the high-risk obligations.

### 3.16 Penalties (Art. 99), for information purposes

| Infringement                                                                 | Article    | Maximum amount                                                                | Use in SEVEN-G                                           |
|------------------------------------------------------------------------------|------------|-------------------------------------------------------------------------------|----------------------------------------------------------|
| <b>Prohibited practices</b>                                                  | Art. 99(3) | EUR 35 million or 7 % of total worldwide annual turnover, whichever is higher | Impact 5 (Critical) on the regulatory axis (document 33) |
| <b>Other obligations of operators (including Arts. 16, 22–24, 26 and 50)</b> | Art. 99(4) | EUR 15 million or 3 %                                                         | Impact 4 or 5 depending on the case                      |
| <b>Incorrect, incomplete or misleading information to authorities</b>        | Art. 99(5) | EUR 7.5 million or 1 %                                                        | Impact 3 or 4                                            |

| Infringement                                                     | Article    | Maximum amount               | Use in SEVEN-G                                                            |
|------------------------------------------------------------------|------------|------------------------------|---------------------------------------------------------------------------|

# ISO/IEC 42001:2023

ISO/IEC 42001:2023 (published in December 2023; under systematic review according to ISO as at the consultation date) specifies the requirements for an AI management system. In SEVEN-G, **the C1–C5 corporate cycle acts as the management system** and the 0–7 lifecycle as the operational process (01 §13). Certification is not part of SEVEN-G, but a company applying the framework should be able to provide the evidence in this section.

## 4.1 Clauses 4 to 10

| Obligation / requirement                                                                          | Article or clause | Applies to                                      | SEVEN-G phase or stage | Accountable role             | Evidence (P-code or document)      | Tool     |
|---------------------------------------------------------------------------------------------------|-------------------|-------------------------------------------------|------------------------|------------------------------|------------------------------------|----------|
| <b>Understand the organisation and its context, including its role with respect to AI systems</b> | 4.1               | Organisation implementing the management system | C1                     | AI Office                    | Document 11 (diagnosis); inventory | T02, T15 |
| <b>Needs and expectations of interested parties</b>                                               | 4.2               | Same                                            | C1, C2                 | AI Office; senior management | Document 13                        | T19      |
| <b>Scope of the management system</b>                                                             | 4.3               | Same                                            | C2                     | Senior management            | Documents 13 and 31                | T19      |
| <b>Establish the management system</b>                                                            | 4.4               | Same                                            | C2–C5                  | AI Committee                 | Document 01                        | T01      |

| Obligation / requirement                                            | Article or clause | Applies to     | SEVEN-G phase or stage              | Accountable role                         | Evidence (P-code or document)                   | Tool     |
|---------------------------------------------------------------------|-------------------|----------------|-------------------------------------|------------------------------------------|-------------------------------------------------|----------|
| <b>Leadership and commitment of top management</b>                  | 5.1               | Top management | C2, C4                              | Board; senior management                 | Documents 13 and 60                             | T17, T18 |
| <b>AI policy</b>                                                    | 5.2               | Top management | C2                                  | Senior management; approved by the board | Document 31                                     | T19      |
| <b>Roles, responsibilities and authorities</b>                      | 5.3               | Top management | C2; phase 0                         | AI Committee                             | Document 30; P03                                | T01      |
| <b>Actions to address risks and opportunities</b>                   | 6.1.1             | Organisation   | C2, C3                              | AI Committee                             | Documents 13 and 14                             | T06      |
| <b>AI risk assessment</b>                                           | 6.1.2             | Organisation   | C2 (criteria), phase 3 (assessment) | AI Risk Owner                            | Document 33; P12                                | T06      |
| <b>AI risk treatment and statement of applicability of controls</b> | 6.1.3             | Organisation   | C2 (statement), phases 3–4          | AI Office; AI Risk Owner                 | P13; section 4.2 as the basis for the statement | T06      |
| <b>AI system impact assessment</b>                                  | 6.1.4             | Organisation   | Phase 3                             | AI Risk Owner                            | P11                                             | T07      |
| <b>AI objectives and planning to achieve them</b>                   | 6.2               | Organisation   | C2, C3; phase 2                     | Senior management; AI Product Owner      | Documents 13 and 14; P08                        | T11, T19 |
| <b>Planning of changes</b>                                          | 6.3               | Organisation   | C3, C5                              | AI Committee                             | Document 14; P27                                | T01      |
| <b>Resources</b>                                                    | 7.1               | Organisation   | C3                                  | AI Committee                             | Document 14                                     | T13      |
| <b>Competence</b>                                                   | 7.2               | Organisation   | C3; phases 4–5                      | Head of People; AI Office                | Document 50; P20                                | T20      |

## 4.2 Annex A: controls by group

Annex A groups the reference controls into nine groups. The table states the objective of each group in our own words and where SEVEN-G covers it. The company's statement of applicability must be checked against the purchased text of the standard.

| Obligation / requirement                                                                   | Article or clause | Applies to   | SEVEN-G phase or stage | Accountable role             | Evidence (P-code or document) | Tool |
|--------------------------------------------------------------------------------------------|-------------------|--------------|------------------------|------------------------------|-------------------------------|------|
| <b>Policies related to AI: documented policy, aligned with other policies and reviewed</b> | A.2               | Organisation | C2, C5                 | Senior management; AI Office | Document 31                   | T19  |

| Obligation / requirement                                                                                                                                                                                          | Article or clause | Applies to   | SEVEN-G phase or stage | Accountable role                        | Evidence (P-code or document)                       | Tool     |
|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-------------------|--------------|------------------------|-----------------------------------------|-----------------------------------------------------|----------|
| <b>Internal organisation: roles and responsibilities; channel for reporting concerns</b>                                                                                                                          | A.3               | Organisation | C2; phase 0            | AI Committee                            | Document 30; P03; reporting channel in document 31  | T01      |
| <b>Resources for AI systems: documentation of data, tooling, computing and human resources</b>                                                                                                                    | A.4               | Organisation | Phases 3–4             | AI Technical Owner                      | P10, P15, P16                                       | T13      |
| <b>Assessing impacts: process, documentation, impact on individuals or groups and societal impact</b>                                                                                                             | A.5               | Organisation | Phase 3; R6            | AI Risk Owner                           | P11                                                 | T07      |
| <b>AI system lifecycle: objectives and processes for responsible development, requirements, design, verification and validation, deployment, operation and monitoring, technical documentation, event logging</b> | A.6               | Organisation | Phases 2–6             | AI Technical Owner; AI Operations Owner | P08, P15, P17, P18, P21, P22, P24, P25; document 53 | T03, T10 |
| <b>Data for AI systems: development data, acquisition, quality, provenance and preparation</b>                                                                                                                    | A.7               | Organisation | Phases 3–5             | AI Technical Owner                      | P16; document 51                                    | T06      |
| <b>Information for interested parties: user documentation, external communication, incident communication</b>                                                                                                     | A.8               | Organisation | Phases 4–6             | AI Product Owner; AI Operations Owner   | P17, P24, P26                                       | T08      |
| <b>Use of AI systems: processes and objectives for responsible use, intended use</b>                                                                                                                              | A.9               | Organisation | C2; phases 4–6         | AI Product Owner; AI Office             | Document 31; P17                                    | T21      |
| <b>Third-party and customer relationships: allocation of responsibilities, suppliers and customers</b>                                                                                                            | A.10              | Organisation | Phases 3–4; C4         | AI Risk Owner                           | P14; document 36                                    | T09      |

## 4.3 Related standards

[ISO/IEC 42005:2025](#) (AI system impact assessment) is the methodological reference for P11; [ISO/IEC 23894:2023](#) (AI risk management), for document 33; and [ISO/IEC 42006:2025](#) (audit and certification bodies), for document 38.

# NIST AI RMF 1.0 and NIST AI 600-1 generative AI profile

The [NIST AI RMF 1.0](#) (January 2023) is a voluntary framework. As at the consultation date, NIST indicates that it is under revision; the [NIST AI 600-1](#) profile was published on 26 July 2024. SEVEN-G uses them as a good practice reference, not as an obligation.

## 5.1 AI RMF functions and categories

| Obligation / requirement                                     | Article or clause | Applies to                                                       | SEVEN-G phase or stage | Accountable role             | Evidence (P-code or document) | Tool     |
|--------------------------------------------------------------|-------------------|------------------------------------------------------------------|------------------------|------------------------------|-------------------------------|----------|
| <b>AI risk management policies, processes and procedures</b> | GOVERN 1          | Organisations that design, develop, deploy or use AI (voluntary) | C2                     | Senior management; AI Office | Documents 01, 31 and 33       | T19      |
| <b>Accountability structures</b>                             | GOVERN 2          | Same                                                             | C2; phase 0            | AI Committee                 | Document 30; P03              | T01      |
| <b>Workforce diversity and inclusion in risk management</b>  | GOVERN 3          | Same                                                             | C3; phase 0            | Head of People               | Document 50; P03              | —        |
| <b>Risk management and communication culture</b>             | GOVERN 4          | Same                                                             | C2, C4                 | AI Office                    | Documents 31 and 60           | T17      |
| <b>Engagement with external actors and affected parties</b>  | GOVERN 5          | Same                                                             | Phases 1, 3 and 6      | AI Product Owner             | P11, P17                      | —        |
| <b>Third-party and supply chain risks</b>                    | GOVERN 6          | Same                                                             | Phase 3; C4            | AI Risk Owner                | P14; document 36              | T09      |
| <b>Establish and understand the context</b>                  | MAP 1             | Same                                                             | Phases 0–1             | AI Product Owner             | P01, P02, P06                 | T01      |
| <b>Categorise the AI system</b>                              | MAP 2             | Same                                                             | Phases 1 and 3         | AI Risk Owner                | P07, P11                      | T05, T07 |
| <b>Capabilities, intended use, goals, benefits and costs</b> | MAP 3             | Same                                                             | Phases 2–3             | AI Product Owner             | P08, P10                      | T11, T13 |

| Obligation / requirement                                                                                                      | Article or clause | Applies to | SEVEN-G phase or stage | Accountable role               | Evidence (P-code or document) | Tool     |
|-------------------------------------------------------------------------------------------------------------------------------|-------------------|------------|------------------------|--------------------------------|-------------------------------|----------|
| Risks and benefits of all components, including third-party ones                                                              | MAP 4             | Same       | Phase 3                | AI Risk Owner                  | P12, P14                      | T06, T09 |
| Impacts on individuals, groups, organisations and society                                                                     | MAP 5             | Same       | Phase 3                | AI Risk Owner                  | P11                           | T07      |
| Appropriate methods and metrics                                                                                               | MEASURE 1         | Same       | Phases 2 and 5         | AI Technical Owner             | P09, P22                      | T11      |
| Evaluation of trustworthiness characteristics (validity, safety, resilience, transparency, explainability, privacy, fairness) | MEASURE 2         | Same       | Phase 5                | AI Technical Owner             | P22                           | T10      |
| Tracking of risks over time                                                                                                   | MEASURE 3         | Same       | Phase 6                | AI Operations Owner            | P25, P27                      | T06, T08 |
| Feedback on the efficacy of measurement                                                                                       | MEASURE 4         | Same       | R6, C5                 | AI Office                      | P28; document 41              | T12      |
| Prioritise and respond to risks                                                                                               | MANAGE 1          | Same       | Phases 3 and 6         | AI Risk Owner                  | P12, P13                      | T06      |
| Strategies to maximise benefits and minimise negative impacts                                                                 | MANAGE 2          | Same       | Phases 4–7             | AI Product Owner; AI Committee | P13, P19, P30                 | T22      |
| Manage third-party risks                                                                                                      | MANAGE 3          | Same       | Phases 3–6             | AI Risk Owner                  | P14                           | T09      |
| Documented and monitored risk treatments, including response, recovery and communication                                      | MANAGE 4          | Same       | Phase 6                | AI Operations Owner            | P24, P26, P27                 | T08      |

## 5.2 Generative AI profile (NIST AI 600-1)

The profile describes risks that are unique to or exacerbated by generative AI and suggested actions associated with the AI RMF categories. SEVEN-G incorporates them as typical risks in the **GEN** category (and **SEG**, **TER** where applicable) of document 33.

| Obligation / requirement                                                         | Article or clause                                | Applies to | SEVEN-G phase or stage                              | Accountable role                         | Evidence (P-code or document) | Tool     |
|----------------------------------------------------------------------------------|--------------------------------------------------|------------|-----------------------------------------------------|------------------------------------------|-------------------------------|----------|
| <b>Chemical, biological, radiological or nuclear information or capabilities</b> | NIST AI 600-1, risk "CBRN"                       | Voluntary  | Phase 3 (only if relevant to the use)               | AI Risk Owner                            | P12                           | T06      |
| <b>Confabulation (erroneous content presented confidently)</b>                   | Risk "Confabulation"                             | Voluntary  | Phases 3, 5 and 6                                   | AI Technical Owner                       | P12, P22, P25                 | T06      |
| <b>Dangerous, violent or hateful content</b>                                     | Risk "Dangerous, violent or hateful content"     | Voluntary  | Phases 4–5                                          | AI Technical Owner                       | P18, P22                      | T10      |
| <b>Data privacy</b>                                                              | Risk "Data privacy"                              | Voluntary  | Phases 3–4                                          | AI Risk Owner; data protection officer   | P11, P16                      | T07      |
| <b>Environmental impacts</b>                                                     | Risk "Environmental impacts"                     | Voluntary  | Phase 3; C4                                         | AI Technical Owner                       | P10; document 42              | T13      |
| <b>Harmful bias and homogenisation</b>                                           | Risk "Harmful bias and homogenization"           | Voluntary  | Phases 3 and 5                                      | AI Technical Owner                       | P12, P22                      | T06      |
| <b>Human–AI configuration (overreliance, anthropomorphisation)</b>               | Risk "Human-AI configuration"                    | Voluntary  | Phase 4                                             | AI Product Owner                         | P17, P20                      | T20      |
| <b>Information integrity</b>                                                     | Risk "Information integrity"                     | Voluntary  | Phases 4–5                                          | AI Product Owner                         | P17, P22                      | —        |
| <b>Information security (including prompt injection)</b>                         | Risk "Information security"                      | Voluntary  | Phases 4–6                                          | AI Technical Owner; information security | P18, P22; document 35         | T10      |
| <b>Intellectual property</b>                                                     | Risk "Intellectual property"                     | Voluntary  | Phases 3–5                                          | AI Risk Owner; legal counsel             | P14; document 53              | T09      |
| <b>Obscene, degrading or abusive content</b>                                     | Risk "Obscene, degrading and/or abusive content" | Voluntary  | Phases 3–5 (related to the new Art. 5 prohibitions) | AI Technical Owner                       | P11, P22                      | T07, T10 |

| Obligation / requirement                     | Article or clause                            | Applies to | SEVEN-G phase or stage | Accountable role | Evidence (P-code or document) | Tool |
|----------------------------------------------|----------------------------------------------|------------|------------------------|------------------|-------------------------------|------|
| <b>Value chain and component integration</b> | Risk "Value chain and component integration" | Voluntary  | Phases 3–4             | AI Risk Owner    | P14, P16                      | T09  |

**Proposed amendment to the GDPR.** The digital omnibus package of November 2025 includes, in addition to the AI part already adopted, a proposal amending the [GDPR](#) (among other aspects, the definition of personal data, legitimate interest for AI development and breach notification). As at the consultation date, that part **is still in the legislative process and has not been adopted**; its final content is pending confirmation. It is not applied in this mapping.

## 07

# DORA and NIS2

They apply only to companies within their scope: [DORA](#) to the financial entities in Art. 2 of Regulation (EU) 2022/2554, applicable since 17-01-2025; [NIS2](#) to the essential and important entities defined in Directive (EU) 2022/2555 and in its national transposition. Where they apply, an AI system supporting a critical or important function is an Enterprise criterion (01 §9.2).

## 7.1 DORA

| Obligation / requirement                                                                                                                       | Article or clause | Applies to                                                         | SEVEN-G phase or stage | Accountable role                         | Evidence (P-code or document) | Tool |
|------------------------------------------------------------------------------------------------------------------------------------------------|-------------------|--------------------------------------------------------------------|------------------------|------------------------------------------|-------------------------------|------|
| <b>Responsibility of the management body for ICT risk</b>                                                                                      | Art. 5            | Financial entities                                                 | C2, C4                 | Board; board committee                   | Documents 13 and 60           | T17  |
| <b>ICT risk management framework that includes AI systems</b>                                                                                  | Art. 6            | Financial entities                                                 | C2; phases 3–6         | Second line; AI Risk Owner               | Documents 33 and 35; P12      | T06  |
| <b>Identification, protection, detection, response and recovery, backups, learning</b>                                                         | Arts. 8 to 13     | Financial entities                                                 | Phases 4–6             | AI Technical Owner; AI Operations Owner  | P15, P18, P19, P24, P25, P26  | T10  |
| <b>Process for managing, classifying and reporting major ICT-related incidents, within the time limits of the relevant technical standards</b> | Arts. 17 to 19    | Financial entities                                                 | Phase 6                | AI Operations Owner; second line         | P26, P27; document 37         | T08  |
| <b>Digital operational resilience testing</b>                                                                                                  | Arts. 24 to 27    | Financial entities (advanced testing only for designated entities) | Phase 5; C4            | AI Technical Owner; information security | P22                           | T10  |
| <b>Management of ICT third-party risk, register of information and assessment of concentration risk</b>                                        | Arts. 28 and 29   | Financial entities                                                 | Phase 3; C4            | AI Risk Owner                            | P14; document 36              | T09  |
| <b>Key contractual provisions with ICT third-party service providers (including providers of AI models and platforms)</b>                      | Art. 30           | Financial entities                                                 | Phases 3–4             | AI Risk Owner; legal counsel             | P14; document 36              | T09  |

7.2 NIS2

| Obligation / requirement                                                                                                                   | Article or clause                | Applies to                       | SEVEN-G phase or stage | Accountable role                          | Evidence (P-code or document) | Tool     |
|--------------------------------------------------------------------------------------------------------------------------------------------|----------------------------------|----------------------------------|------------------------|-------------------------------------------|-------------------------------|----------|
| Approval and oversight of cybersecurity measures by management bodies and training of their members                                        | Art. 20                          | Essential and important entities | C2, C4                 | Board; senior management                  | Documents 13, 35 and 60       | T17      |
| Cybersecurity risk-management measures, including supply chain security                                                                    | Art. 21 (in particular 21(2)(d)) | Essential and important entities | Phases 3–6             | Information security; AI Technical Owner  | P14, P18; document 35         | T09, T10 |
| Reporting of significant incidents: early warning within 24 hours, incident notification within 72 hours and final report within one month | Art. 23                          | Essential and important entities | Phase 6 (S1–S2)        | AI Operations Owner; information security | P26, P27                      | T08      |

**Transposition in Spain.** As at the consultation date, the law transposing NIS2 ([Anteproyecto de Ley de Coordinación y Gobernanza de la Ciberseguridad](#) (Draft Law on Cybersecurity Coordination and Governance), approved at first reading in January 2025) **does not appear as published in the BOE**; exact status of the legislative process pending confirmation.

**Products with digital elements.** If the company manufactures products with digital elements that incorporate AI, [Regulation \(EU\) 2024/2847 on cyber resilience \(Cyber Resilience Act\)](#) must also be assessed (reporting obligations from 11-09-2026 and main obligations from 11-12-2027). This is developed in document 35.

08

Spanish legislation and AESIA

8.1 Status as at the consultation date

| Regulation or action                                                              | Reference                                                                              | Status as at 16-09-2026                                                            |

## 10

# Mapping maintenance procedure

## 10.1 Responsibilities

| Role or body     | Responsibility for the mapping                                                                                          |
|------------------|-------------------------------------------------------------------------------------------------------------------------|
| <b>AI Office</b> | Owns document 34 and tool T07. Maintains regulatory watch, prepares change proposals and communicates approved changes. |

| Role or body                                                                                  | Responsibility for the mapping                                                                                                                  |
|-----------------------------------------------------------------------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Second line</b> (compliance, legal counsel, data protection officer, information security) | Validates the legal content of each change and its interpretation. No change of date, article or criterion is published without its validation. |
| <b>AI Committee</b>                                                                           | Approves changes with an impact on initiatives, <i>gates</i> or intensity, and decides portfolio reclassifications.                             |
| <b>Board committee</b>                                                                        | Receives a quarterly summary of relevant regulatory changes (C4).                                                                               |
| <b>Third line</b>                                                                             | Verifies at least once a year that the mapping is up to date and that the changes have been applied to the affected initiatives.                |

## 10.2 Triggers and frequency

| Trigger                                                                                         | Examples                                                                                                                              | Analysis time limit                |
|-------------------------------------------------------------------------------------------------|---------------------------------------------------------------------------------------------------------------------------------------|------------------------------------|
| <b>Publication of a regulation or amendment in the Official Journal of the EU or in the BOE</b> | New amending regulation; Spanish organic law; <a href="#">NIS2</a> transposition                                                      | 10 working days from publication   |
| <b>Commission guidelines, codes of practice, templates or implementing acts</b>                 | Final guidelines on high risk; serious incident template                                                                              | 20 working days                    |
| <b>Harmonised standards or revisions of technical standards</b>                                 | <a href="#">CEN-CENELEC JTC 21</a> standards; revision of <a href="#">ISO/IEC 42001</a> ; revision of the <a href="#">NIST AI RMF</a> | 30 working days                    |
| <b>Guidance from national authorities or the EDPB; CJEU judgments</b>                           | <a href="#">AESIA guides</a> ; final EDPB guidelines                                                                                  | 20 working days                    |
| <b>Upcoming date of application</b>                                                             | Six months before each date in the timeline in section 3.1                                                                            | Review of the affected initiatives |
| <b>Ordinary review</b>                                                                          | Monthly watch; formal quarterly review (C4); full annual review (C5)                                                                  | According to schedule              |

## 10.3 Steps

| Step     | What is done                                                                                                          | Responsible                    | Evidence                        |
|----------|-----------------------------------------------------------------------------------------------------------------------|--------------------------------|---------------------------------|
| <b>1</b> | Detect the change and record it with the official source and consultation date                                        | AI Office                      | Entry in the mapping change log |
| <b>2</b> | Analyse the impact: affected rows, T07 questions, <i>gate</i> criteria (document 21), templates and inventory systems | AI Office with the second line | Impact note                     |

| Step | What is done                                                                                             | Responsible                       | Evidence                   |
|------|----------------------------------------------------------------------------------------------------------|-----------------------------------|----------------------------|
| 3    | Validate the legal interpretation                                                                        | Second line                       | Recorded clearance         |
| 4    | Approve the change if it affects initiatives, intensity or <i>gates</i>                                  | AI Committee                      | P29 or committee minutes   |
| 5    | Update document 34 (new version), T07 and, where applicable, the templates                               | AI Office                         | Version control            |
| 6    | Reclassify the affected systems and open actions in the initiatives (classification change event in T01) | AI Risk Owners of each initiative | Updated P11; event in T01  |
| 7    | Communicate to the teams and, if relevant, to the board committee                                        | AI Office                         | C4 report                  |
| 8    | Verify implementation at the next annual review                                                          | Third line                        | Audit report (document 38) |

A regulatory change that turns a previously compliant situation into non-compliance is not in itself a nonconformity; failing to act within the time limits above or letting an applicable obligation fall due unmet is (document 37).

## 11

# Annex A · Other jurisdictions (for guidance)

It serves only to detect possible obligations outside the EU; it does not analyse requirements and requires local advice.

| Jurisdiction                     | Indicative situation as at the consultation date                                                                                                                                                                                                                                                           | Treatment in SEVEN-G                                                    |
|----------------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-------------------------------------------------------------------------|
| <b>United Kingdom</b>            | Principles-based approach applied by sector regulators, without a general AI law equivalent to the EU Regulation (possible legislative initiatives pending confirmation). Data protection follows its own regime, with recent reforms concerning automated decision-making (details pending confirmation). | Declare it as a constraint in P02 and consult local counsel in phase 3. |
| <b>United States</b>             | No general federal AI law; voluntary frameworks ( <a href="#">NIST AI RMF</a> ), action by sector agencies and state laws whose scopes and dates of application have changed and must be verified case by case.                                                                                            | Declare it in P02; use section 5 as a good practice reference.          |
| <b>International instruments</b> | <a href="#">OECD AI Principles</a> ; Council of Europe Framework Convention on Artificial Intelligence and Human Rights, Democracy and the Rule of Law (opened for signature in 2024; ratification status pending confirmation).                                                                           | Reference for the corporate policy (document 31).                       |

## Annex B · Sector references (for guidance)

It does not assert sector-specific requirements; it points out interactions that the second line must analyse in P02 and P11. It is for guidance only: responsibility for identifying the applicable sector regulation, for the regulatory classification and for compliance lies with the organisation, with qualified advice.

| Sector               | Points of contact with the AI Act                                                                                                                                                                                                                                             | Sector references to review                                                                                                                                                                                                                                                            |
|----------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Banking and payments | Creditworthiness assessment and credit scoring of natural persons (Annex III, point 5(b), except fraud detection); integration of obligations into internal governance (Arts. 17(4) and 26(5)); <a href="#">DORA</a> (section 7.1).                                           | <a href="#">EBA exercise on the implications of the AI Act</a> (November 2025), with no immediate need for new guidelines; <a href="#">EBA guidelines on loan origination</a> ; role of the <a href="#">Banco de España</a> as authority (pending the organic law).                    |
